Installing for GNU/Linux

As far as we know, the available Debian, Ubuntu, and Fedora repositories provide very outdated versions of Sozi. You can still install them, but be aware that no documentation or support will be available. Starting from Sozi 18, we provide packages of the Sozi executable for Debian, Ubuntu, and their derivatives.

STEP-5

Download and install x +

sozi.baierouge.fr/pages/20-install.html#installing-for-windows

Installing for Windows

Sozi for Windows is only distributed in the form of a zip archive, no installer is provided. From the [download page for the latest release](#), download one of the following files:

- `sozi-{version}-windows-ia32.zip` for Windows, 32-bit.
- `sozi-{version}-windows-ia64.zip` for Windows, 64-bit.

Several tools are available to extract this archive. If unsure, you can use [7-Zip](#).

Extracting the archive will create a folder with the same name. Then you can run Sozi directly by launching the Sozi executable inside that folder.

Installing for OS X

Sozi for OS X is distributed in the form of a "tar.xz" archive. From the [download page for the latest release](#), download the file `sozi-{version}-osx-ia64.tar.xz`.

Several tools are available to extract this archive. If unsure, you can use [The Unarchiver](#).

Extracting the archive will create a folder with the same name, containing a subfolder `Sozi.app`. Drag `Sozi.app` to your Applications folder and execute it like any other OS X application.

Installing from a Docker image

For Linux or OS X, this solution installs Sozi, Inkscape and the [presentation conversion tools](#) in a single Docker container.

After installing Docker, Sozi can be installed using this command:
