About this site

Liveworksheets allows you to transform your traditional printable worksheets (doc, pdf, jpg...) into **interactive online exercises with self-correction**, which we call "interactive worksheets".

Students can do the worksheets online and **send their answers to the teacher**. This is good for the students (it's motivating), for the teacher (it saves time) and for the environment (it saves paper).

Additionally, our interactive worksheets take full advantage of the **new technologies applied to education**: they may include sounds, videos, drag and drop exercises, join with arrows, multiple choice... and even speaking exercises, that the students must do using the microphone.

How can I use it?
You can use liveworksheets to make your own interactive worksheets or you can use the ones shared by other teachers. We have a collection of thousands of interactive worksheets that cover lots of languages and subjects.

How can I make my own interactive worksheets?
It's very easy. Basically, you have to upload your document (doc, pdf, jpg...) and it will be converted into an image. Then you just have to draw boxes on the worksheet and enter the right answers
