ETHICS OF ARTIFICIAL INTELLIGENCE IN EDUCATION

SHITANSHU MISHRA, PhD
(EdTech) HEAD OF TECHNOLOGY, UNESCO
MGIEP
s.mishra@unesco.org

MGIEP is UNESCO's Category 1 Research Institute focused on Transforming Education towards SDG 4.7 through programmes that promote social and emotional learning, innovate digital pedagogies and empower youth.

Our vision is “Building Kinder Brains”

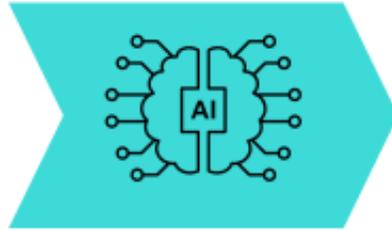

FOCUS OF THIS TALK

ETHICS OF "AI" IN EDUCATION

1 - Education

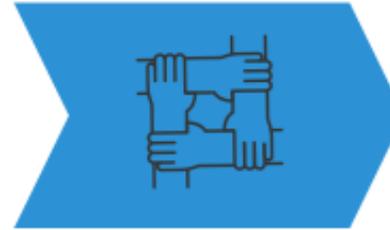

2 - Artificial
Intelligence

3 - AI in Education

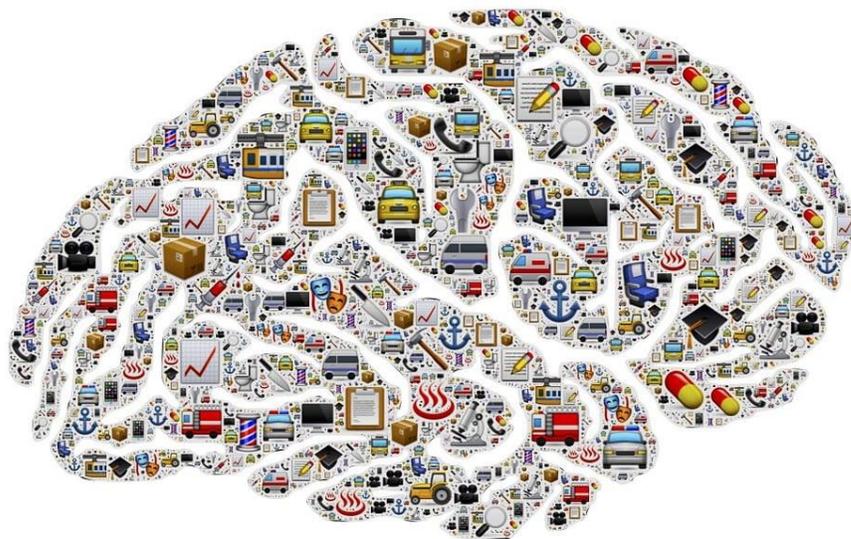

4 - Ethics

5 - Ethics of AIEd

Aspect 1

WHAT DO WE WANT 'AI' TO DO IN EDUCATION?

WHAT DO WE WANT "AI" TO DO IN EDUCATION?

IMPROVE
LEARNING
EFFECTIVENESS

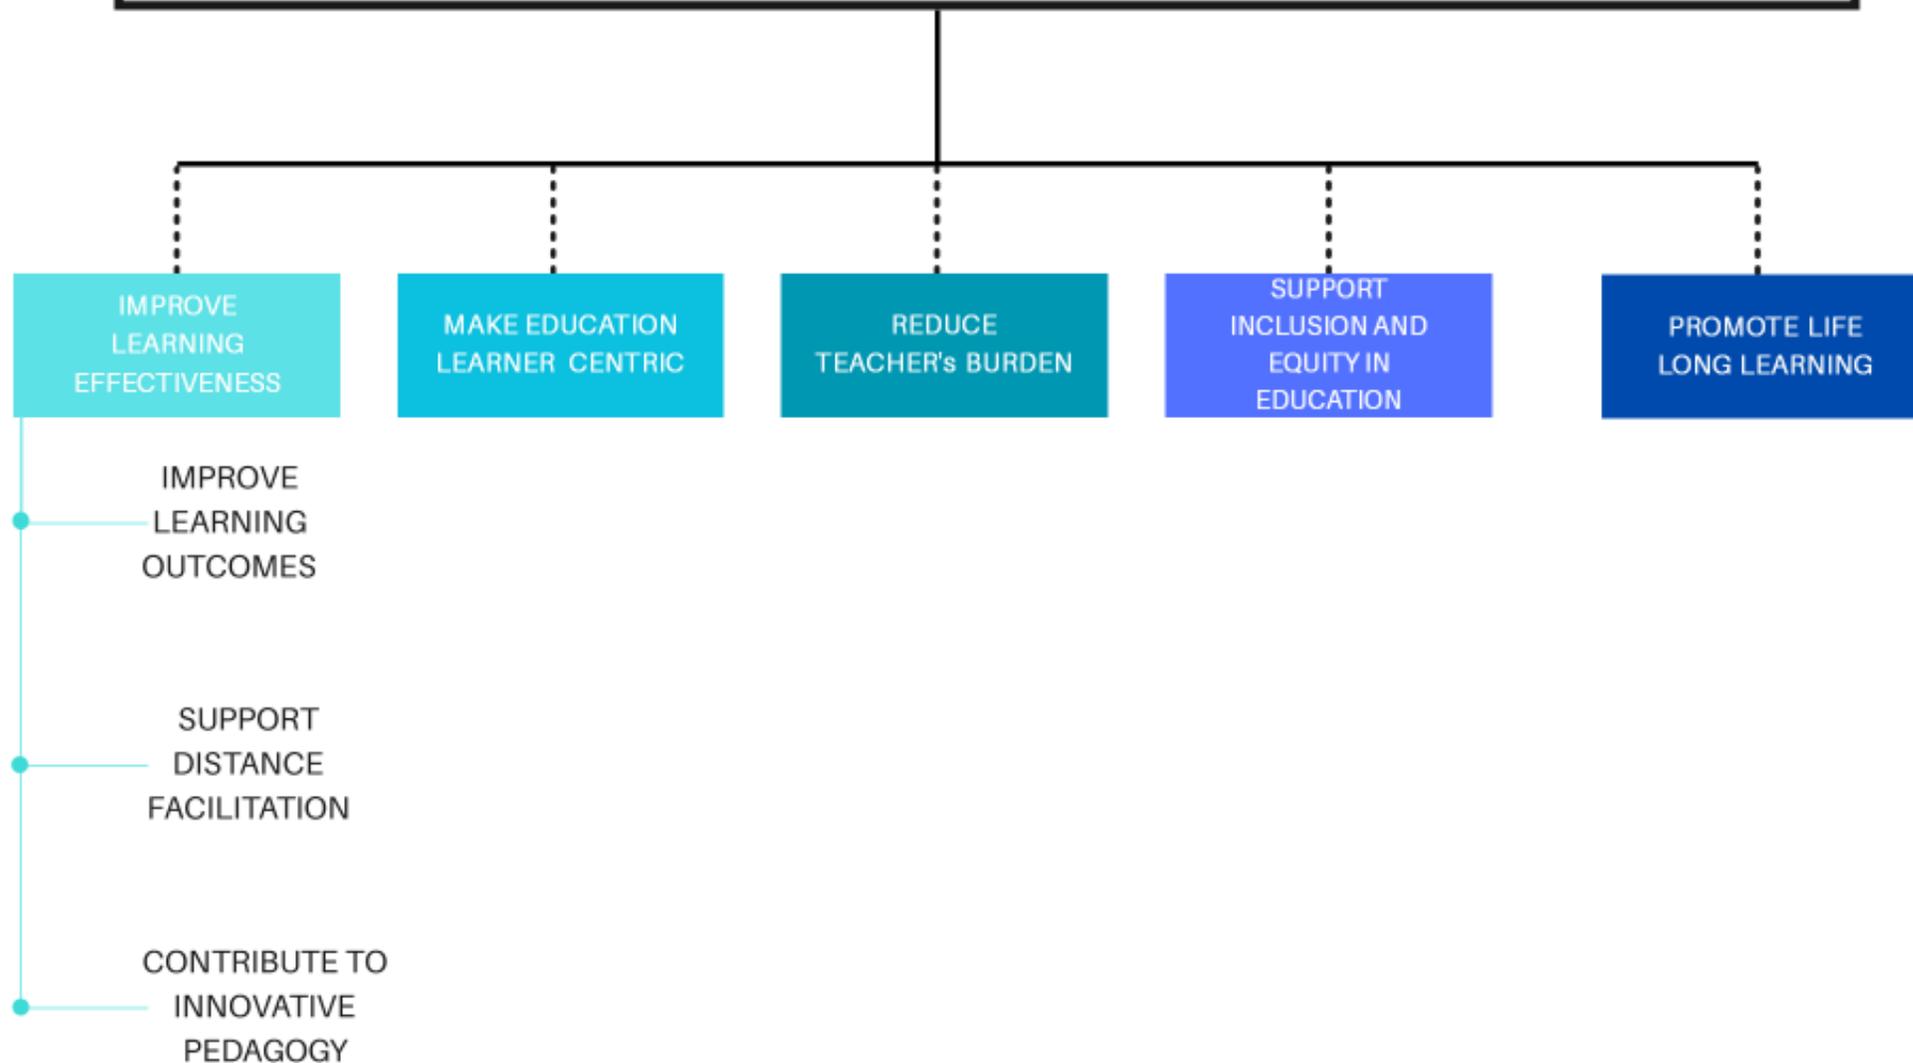

MAKE EDUCATION
LEARNER CENTRIC

REDUCE
TEACHER'S BURDEN

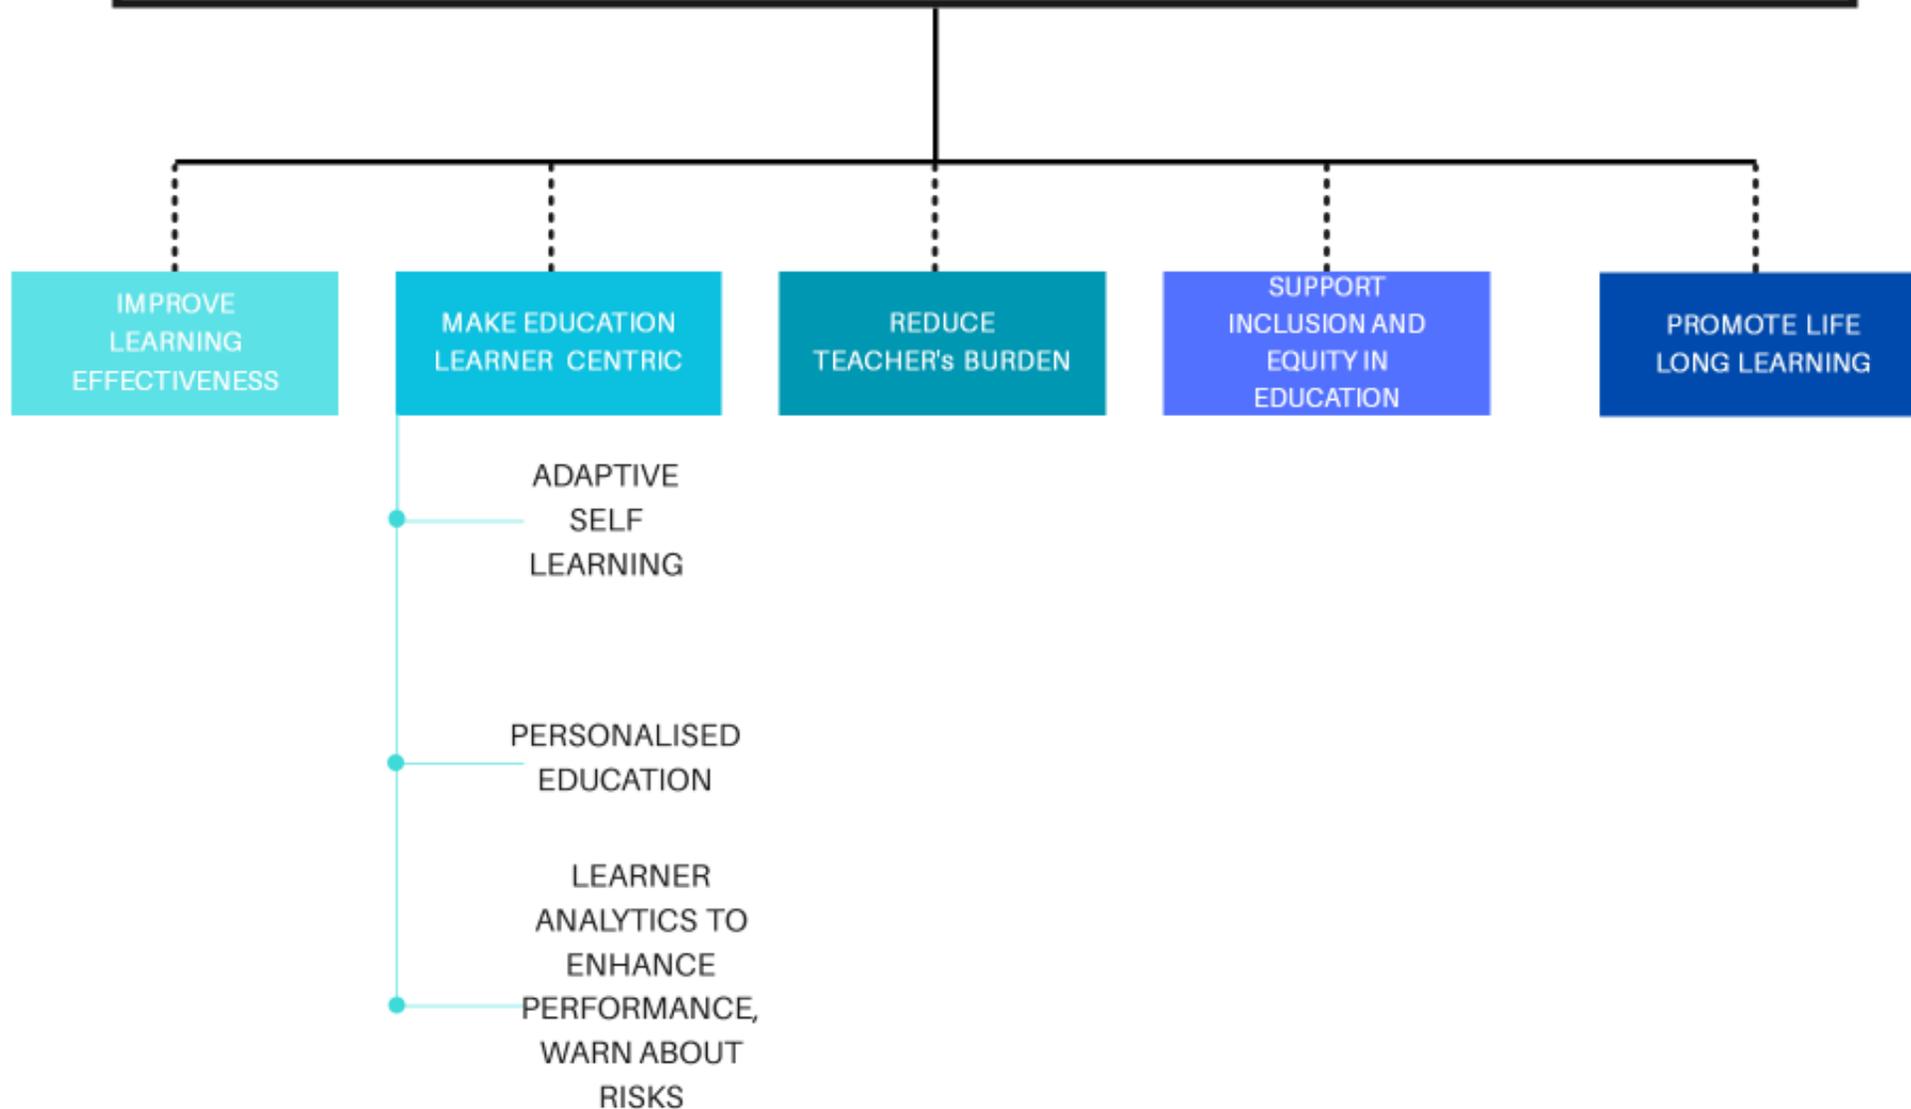

SUPPORT
INCLUSION AND
EQUITY IN
EDUCATION

PROMOTE LIFE
LONG LEARNING

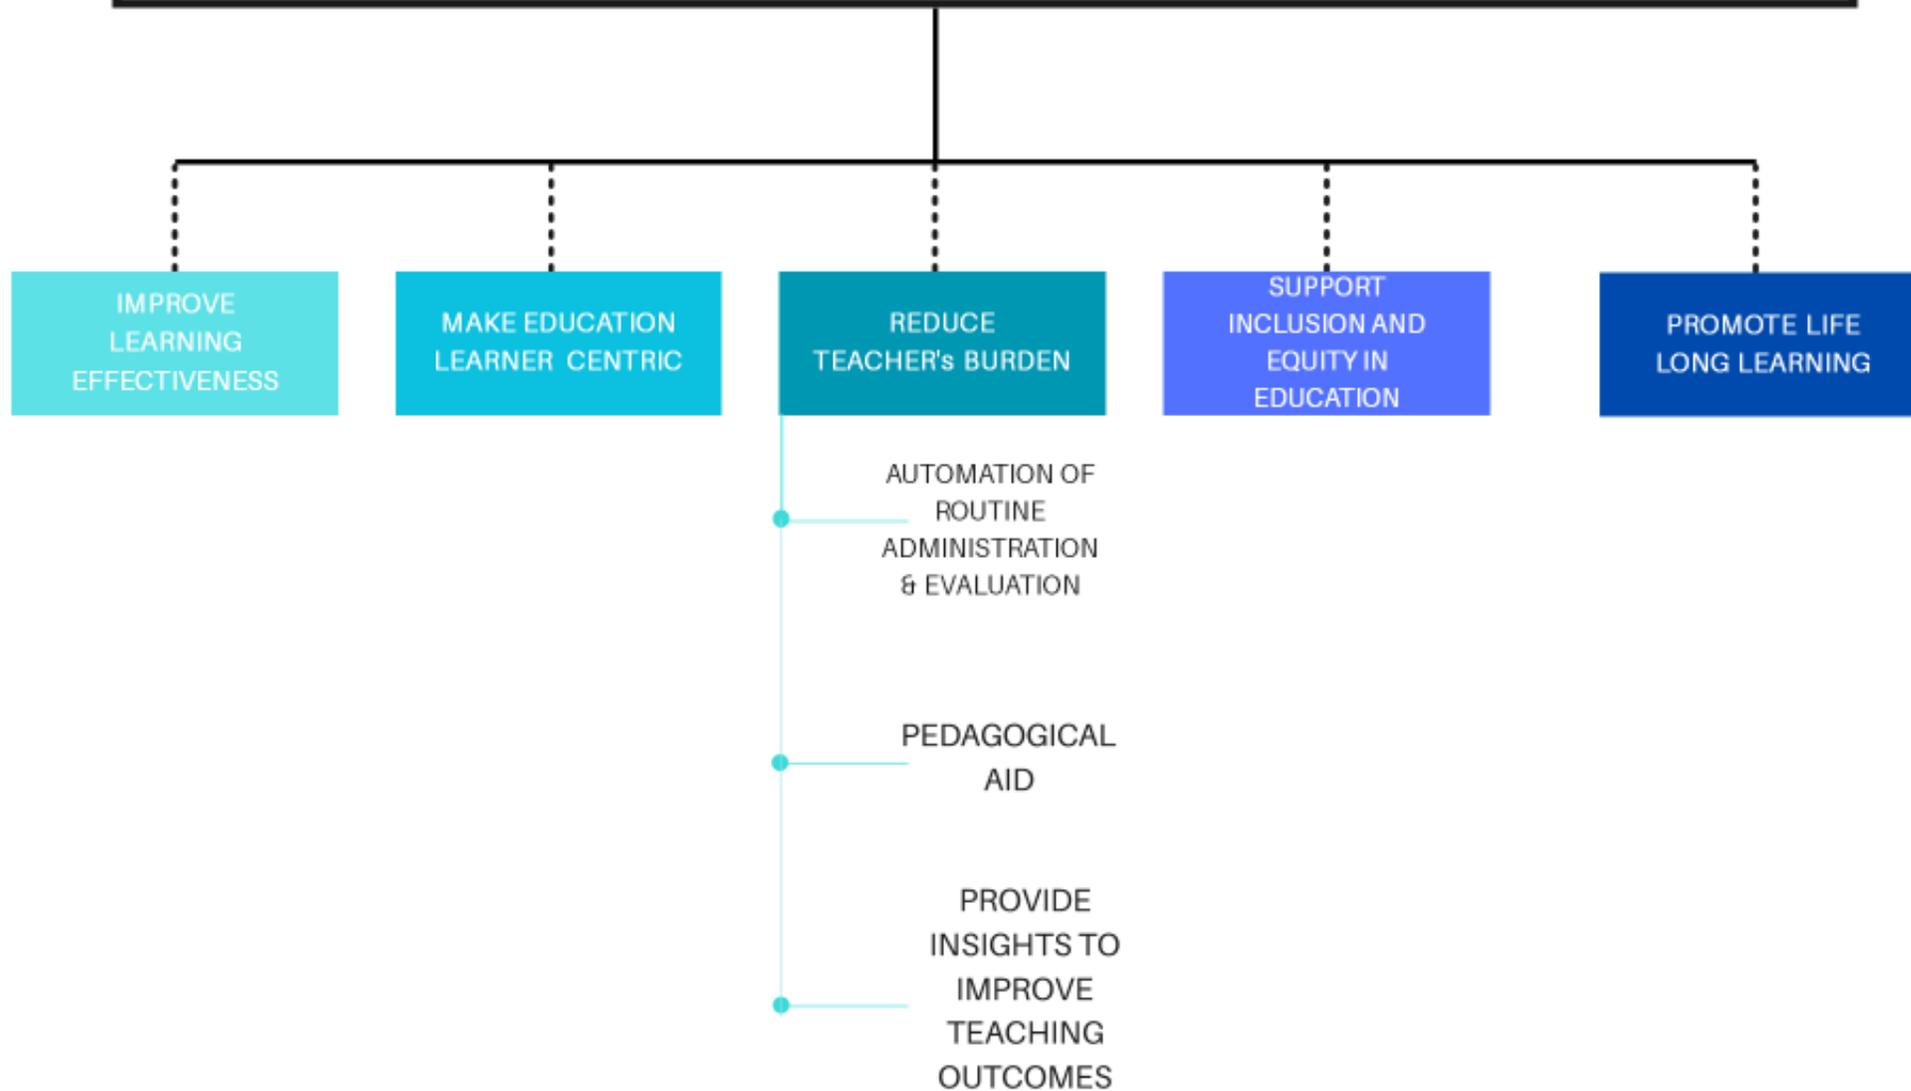

WHAT DO WE WANT "AI" TO DO IN EDUCATION?

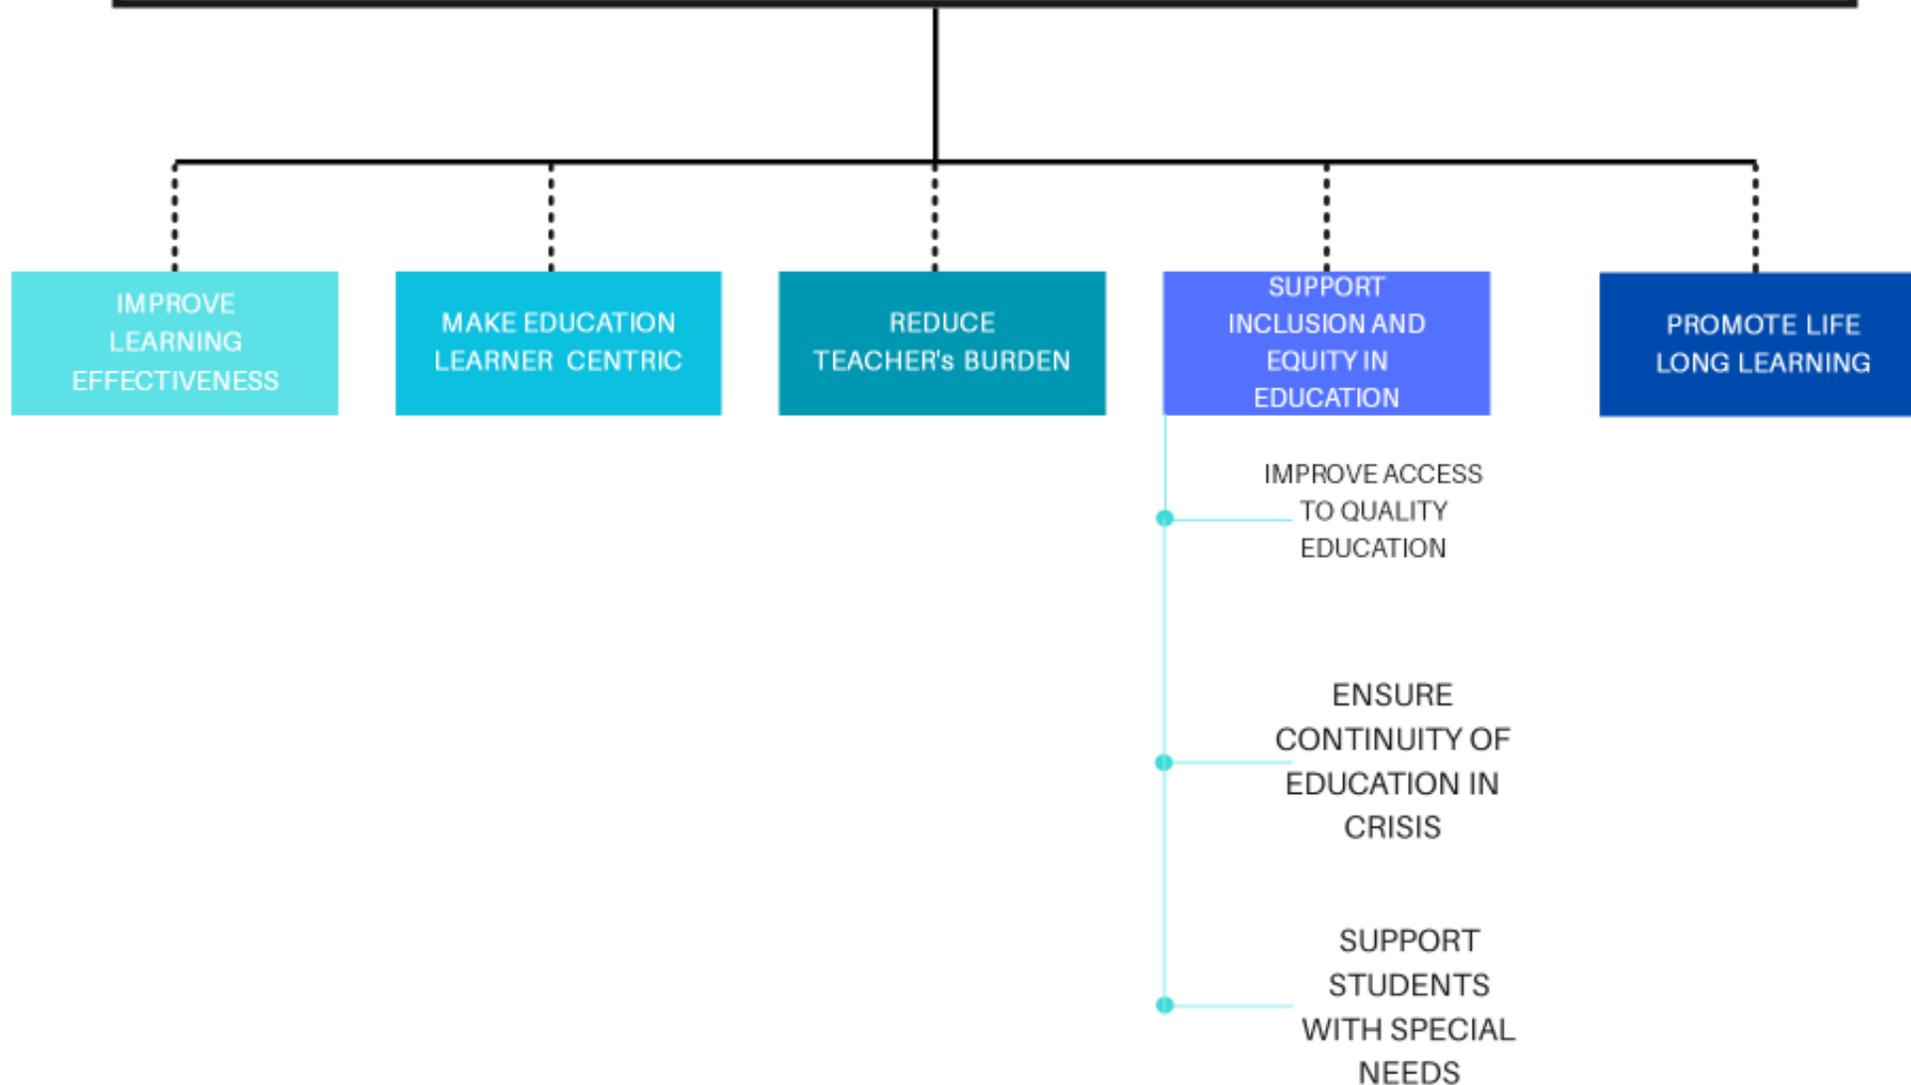

WHAT DO WE WANT "AI" TO DO IN EDUCATION?

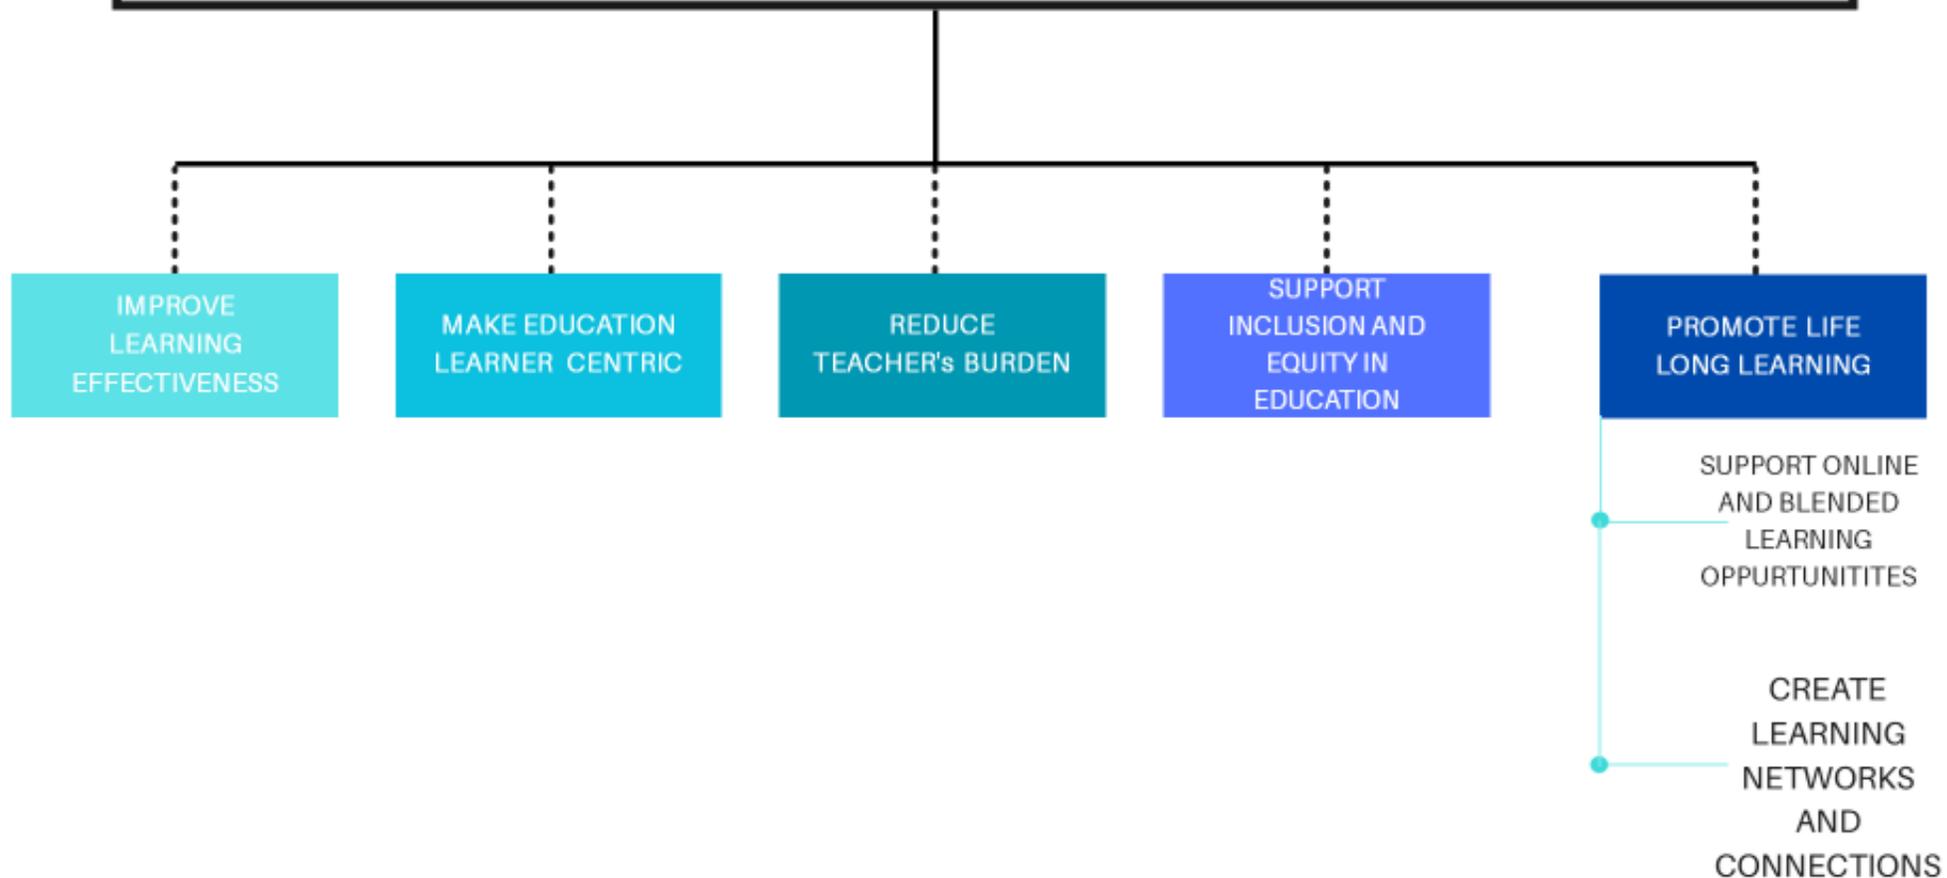

WHAT DO WE WANT "AI" TO DO IN EDUCATION?

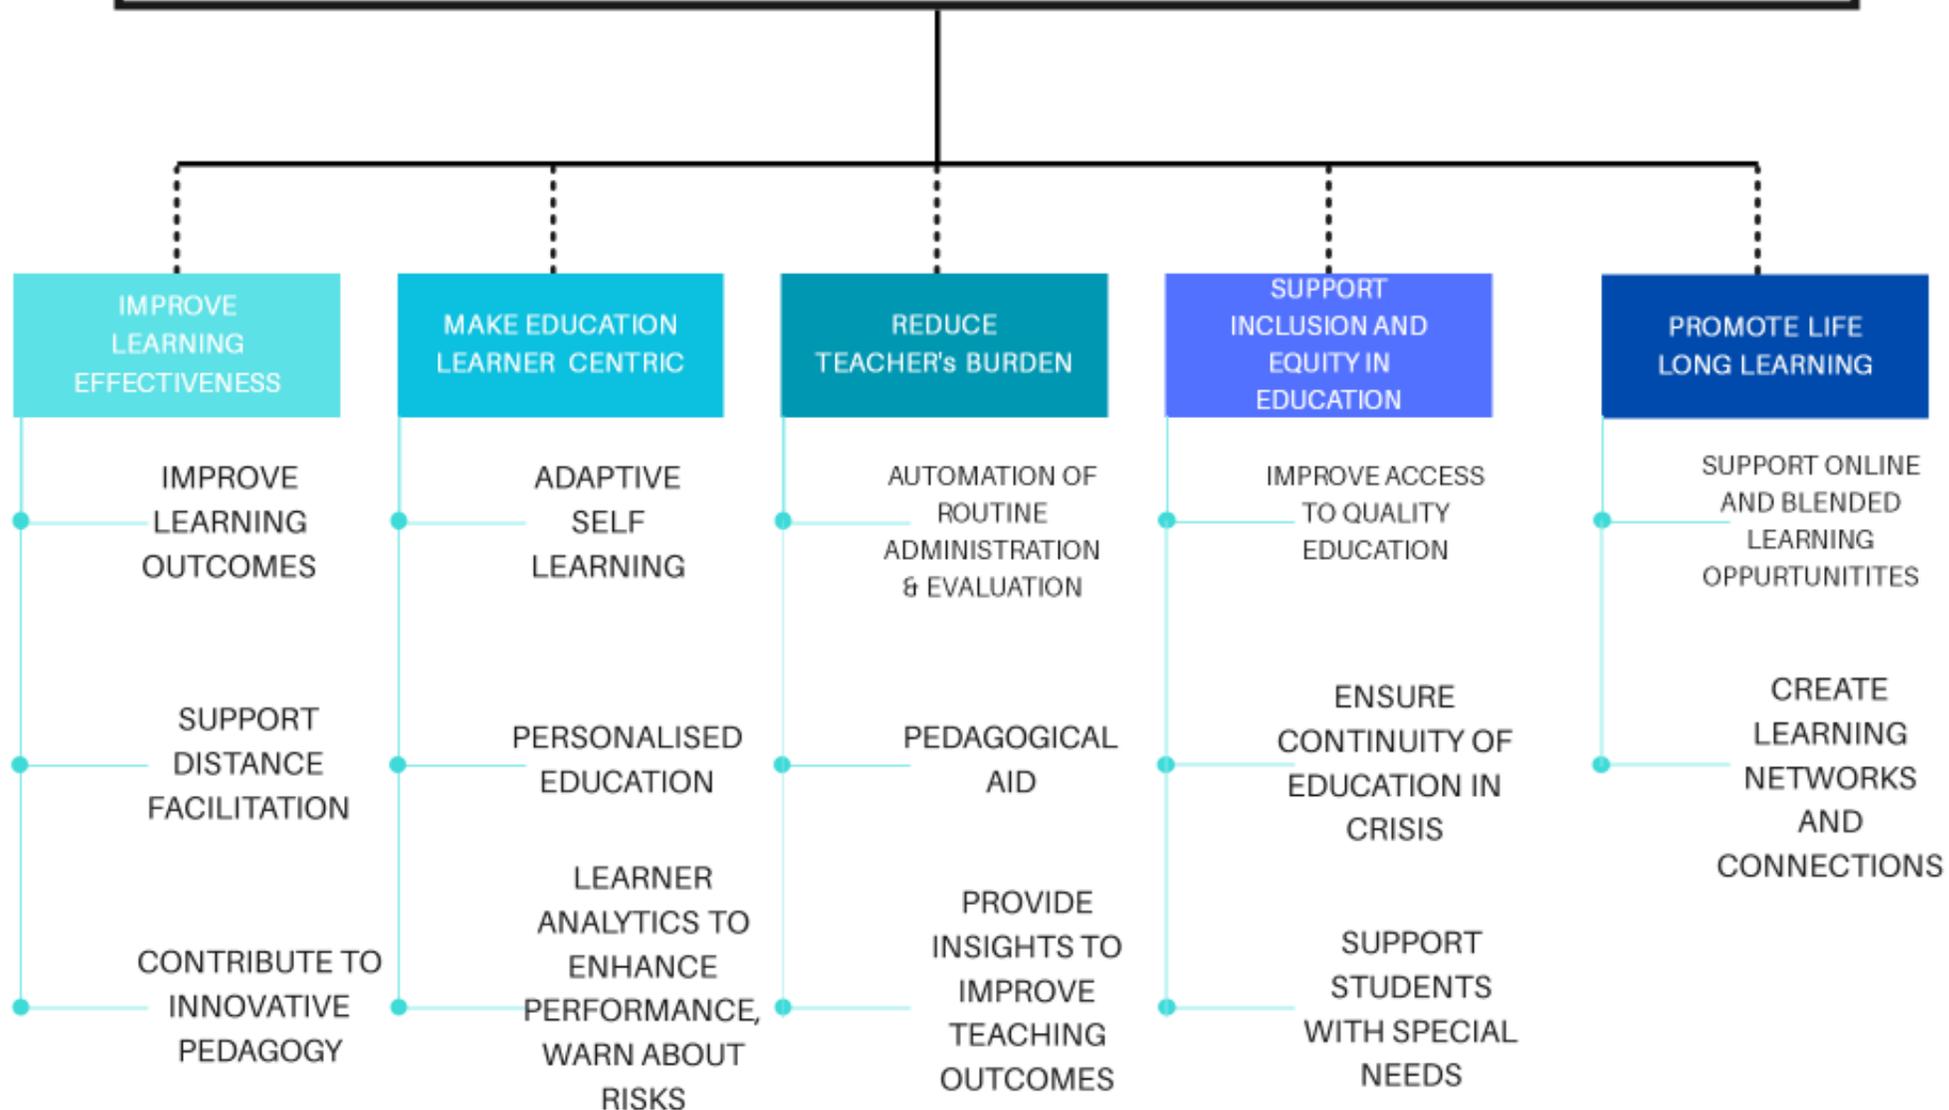

WHAT DO WE WANT "AI" TO DO IN EDUCATION?

WHAT DO WE WANT "AI" TO DO IN EDUCATION?

WHAT DO WE WANT "AI" TO DO IN EDUCATION?

TAXONOMY OF AIED SYSTEMS

- Student Focused AIED Systems
- Teacher Focused AIED Systems
- Institution Focused AIED Systems

TAXONOMY OF AIED SYSTEMS

• Student Focused AIED Systems

- Intelligent Tutoring Systems (ITS)* * *
- AI-assisted Apps (e.g., maths, text-to- speech, language learning)* * *
- AI-assisted Simulations (e.g., games-based learning, VR, AR)* * *
- AI to Support Learners with Disabilities* * *
- Automatic Essay Writing (AEW)* * *
- Chatbots* * */* *
- Automatic Formative Assessment (AFA)* * */* *
- Learning Network Orchestrators* * */* *
- Dialogue-based Tutoring Systems (DBTS)* * *
- Exploratory Learning Environments (ELE)* *
- AI-assisted Lifelong Learning Assistant*

TAXONOMY OF AIED SYSTEMS

• Teacher Focused AIED Systems

- Plagiarism detection* * *
- Smart Curation of Learning Materials* * *
- Classroom Monitoring* * *
- Automatic Summative Assessment* * */* *
- AI Teaching Assistant (including assessment assistant)* * */* *
- Classroom Orchestration* *

TAXONOMY OF AIED SYSTEMS

- **Institution Focused AIED Systems**
 - Admissions (e.g., student selection)* * *
 - Course-planning, Scheduling, Timetabling* * *
 - School Security* * *
 - Identifying Dropouts and Students at risk* * *
 - e-Proctoring* * *

ETHICS OF 'AI' IN EDUCATION

'AI' IN EDUCATION

ETHICAL ISSUES

1. Data Issues
2. Fairness of access
3. Fairness of the training dataset
4. AI Summative Judgements
5. Potential Monopoly on Education

Reflection Question

How would you react if your child's private educational data, including their personal information and academic performance, were ruthlessly exploited by cybercriminals?

ETHICAL ISSUES OF AIED

DATA ISSUES

- Security
- Data Ownership
- Privacy

ETHICAL ISSUES OF AIED

FAIRNESS OF ACCESS

Reflection Question

How would you feel if your child's access to quality education is determined solely by availability of some AI system?

ETHICAL ISSUES OF AIED

FAIRNESS OF ACCESS

- Digital divide
 - Widening the gap between privileged and underprivileged
- Global North vs. Global South
- Who would get access to what AIED services
 - Different price points (premium education, mid-range education, budget education)

ETHICAL ISSUES OF AIED

FAIRNESS OF TRAINING DATASET

Reflection Question

Can you trust an AI system if they got their intelligence from biased data?

ETHICAL ISSUES OF AIED

FAIRNESS OF TRAINING DATASET

- Imbalanced representation
- Underrepresented perspectives
- Unfair algorithmic decisions
- Discriminatory outcomes
- Reinforcing inequalities

ETHICAL ISSUES OF AIED

"AI" SUMMATIVE JUDGEMENTS

Reflection Question

Can you accept a future for your children where their career possibilities are dictated by an enigmatic AI, leaving you in the dark?"

ETHICAL ISSUES OF AIED

"AI" SUMMATIVE JUDGEMENTS

- What if AI "black box" judgements
 - replace exams?
 - determine who goes to university?
 - determine who gets the job?

ETHICAL ISSUES OF AIED

MONOPOLY OF EDUCATION

Reflection Question

Can you envision a future where educational opportunities are dictated by a few dominant AI companies in education sector?

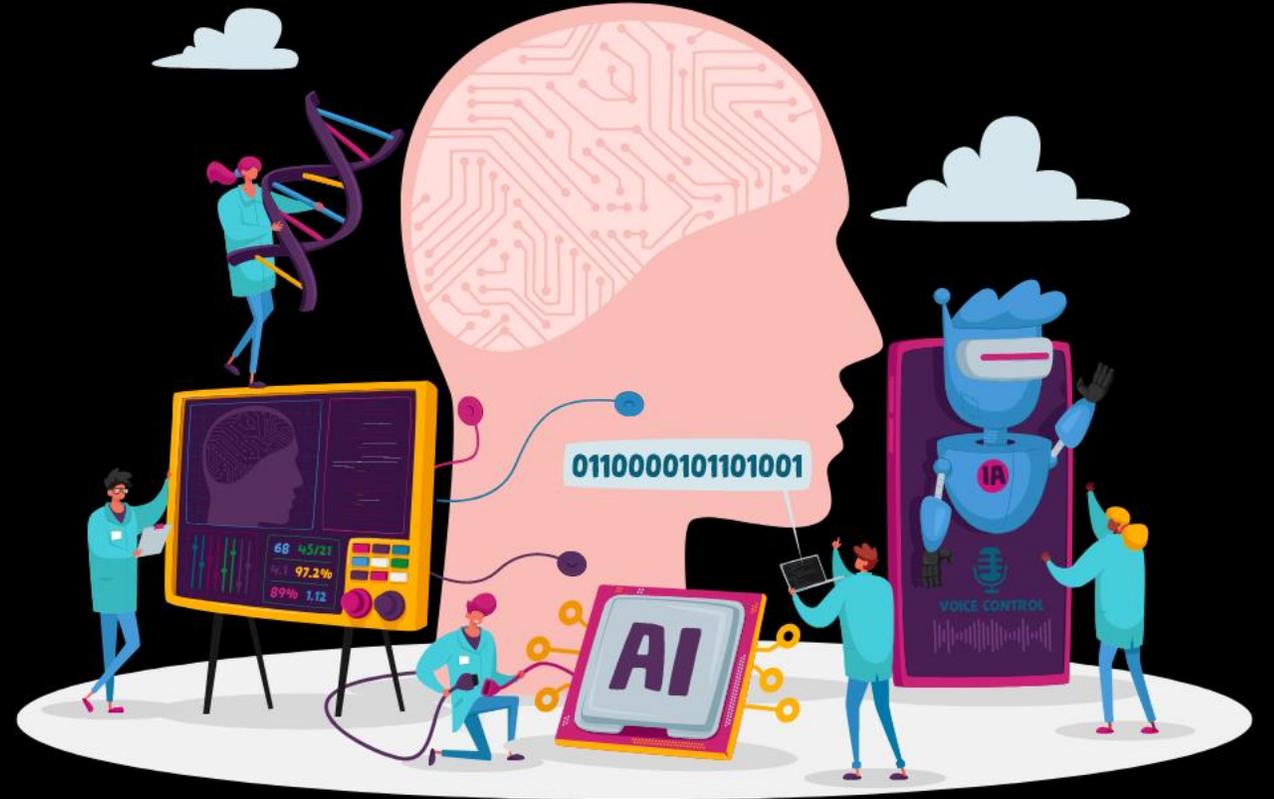

ETHICAL ISSUES OF AIED

MONOPOLY OF EDUCATION

There is potential for there to be an *"Amazon of Education"* which:

- Controls what is taught
- Controls what is allowed be taught
- Promoting certain ideologies or lifestyles

WHAT ARE THE SOLUTIONS?

TRADE OFFS

REAL CHALLENGES

- **Privacy VS Effectiveness**

- Machine learning offers better outcomes and increases accuracy. However, for privacy and security, these may therefore need to be balanced with stronger consent rules.
- In other situations, one may need to let go of privacy in remedial delivery for increasing one's utility or productivity.

- **Explainability VS Accuracy**

- Although deep learning systems may make more accurate predictions, they may conflict with the Explainability of the decisions/outcomes.

- **Innovation VS Precision**

- Use of sandbox pilot tests to properly understand systems which might prolong the time it takes for an AI education system to be used on-ground.

- **Efficiency VS non-discrimination**

- AI system might need to let go of certain variables like race, gender, caste and such, particularly if the training dataset was not representative.

TO ARRIVE AT PERMISSIBLE TRADE-OFFS

THREE STAGE ANALYSIS

Ethical risk assessment

What are the likely ethical risks

How probable they are of occurring

Risk evaluation

Who are most likely to face these risks

What would be effects/implications of the risks on them

Risk management

Cost benefit analysis to arrive at acceptability levels of risks

Exploring solutions to mitigate risks to the extent possible

TECH ETHICS BY DESIGN

SYSTEMIC EMPATHY

Layers of Effects

- Primary - intended effects
- Secondary - intended effects
- Unintended effects

Dichotomy Mapping

Benefits	Harms
.....

Ethical Hacking

- Principles/ Rights
- Design Modifications
- Strategy Modifications

- GDPR (General Data Protection Regulation)
- Data Organization
 - Anonymized data collection and storage
 - Revocable data organization
(Organize data in such a manner that revoking is easy)
- Augmentations of the phases of *Education Design Research* (DBR, DBIR, DDR) with Ethical Auditing process
- Systemic Empathy

USEFUL RESOURCES

3 trends driving the future of education

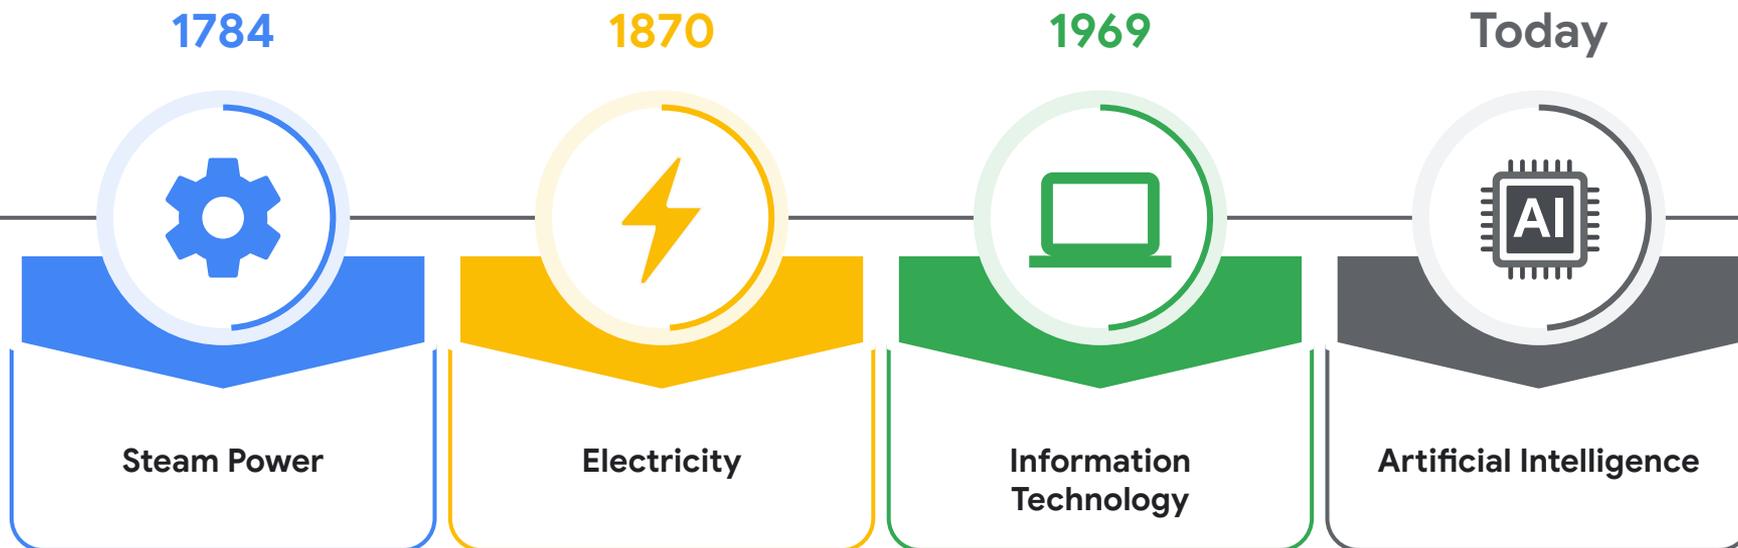

Bani Paintal Dhawan

Head of Education, South Asia,
Google India

Date: June 16, 2023

We're in an AI driven revolution

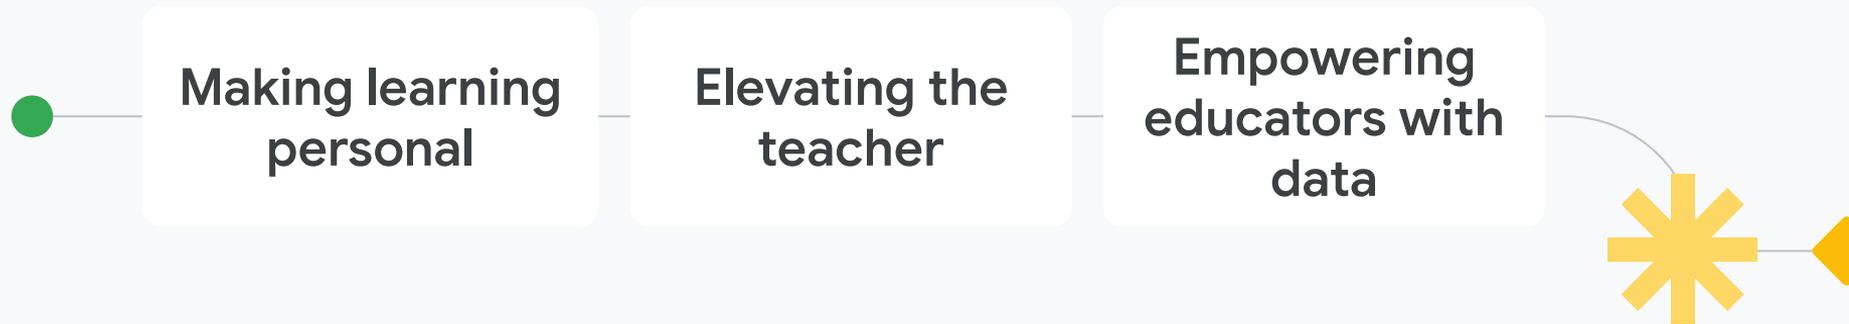

We realize we are going to be bold and responsible...We haven't hooked up Bard to our most capable models yet, and we plan to do it deliberately. And so through this moment, I think we are going to stay balanced, but we are going to innovate.”

Sundar Pichai

March 2023, Hard Fork - NY Times Podcast

3 trends driving the future of education

Making learning personal

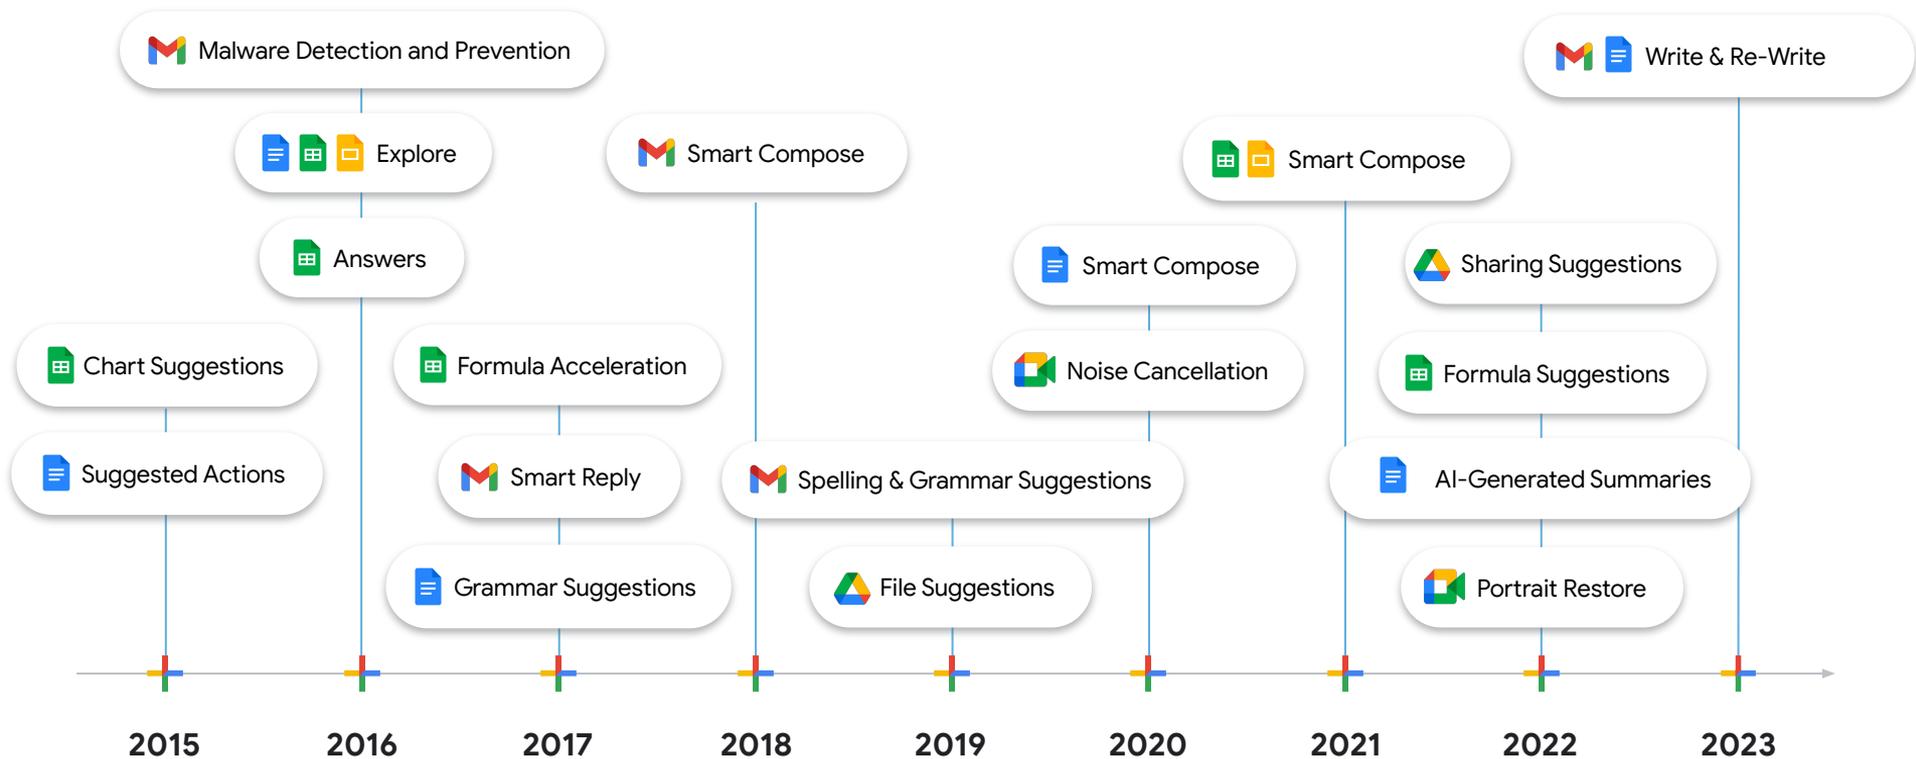

Giving students the tools they need

Harnessing AI
to make learning
personal

Helping to make
learning
more accessible

We've put AI to Work for 3 Billion Users in Google Workspace

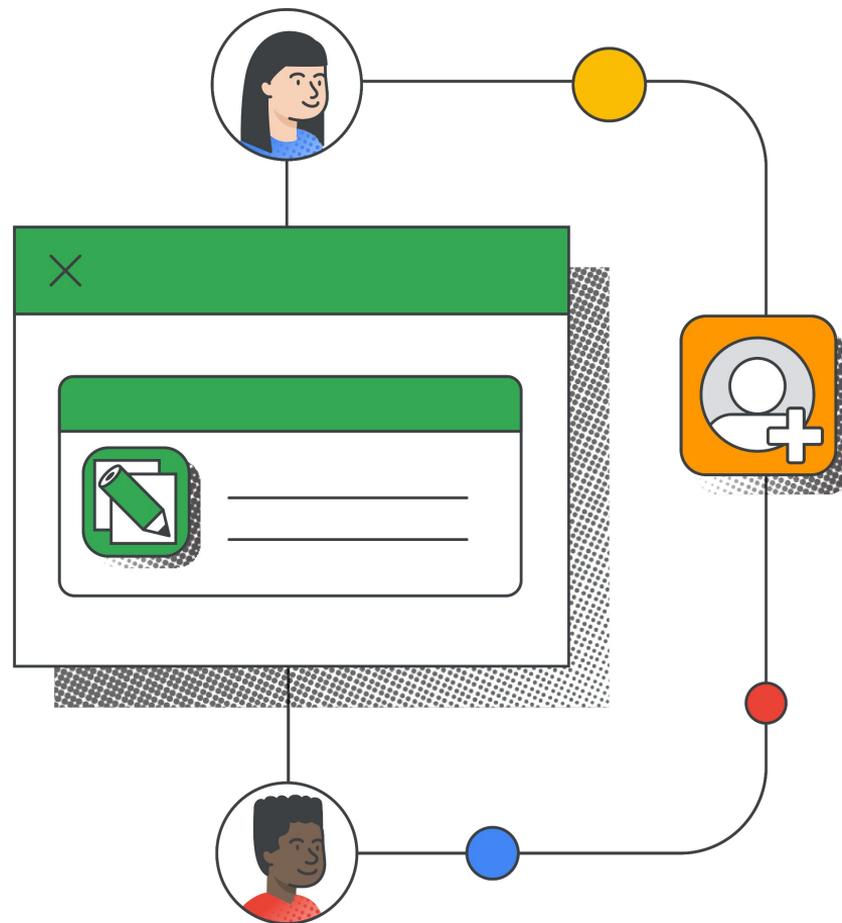

Practice Sets

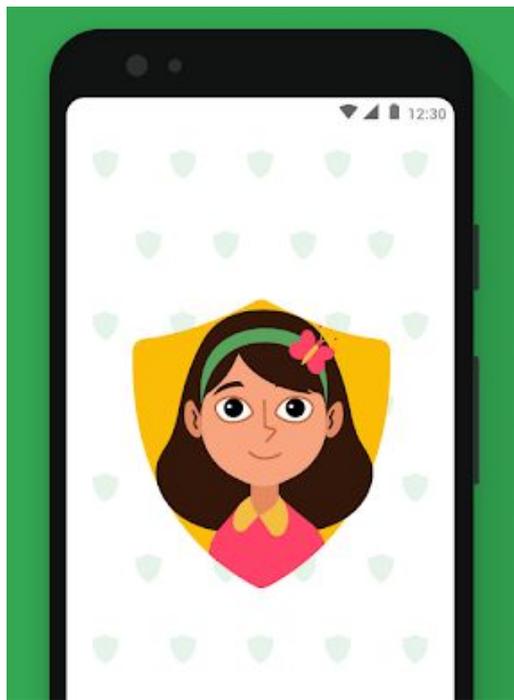

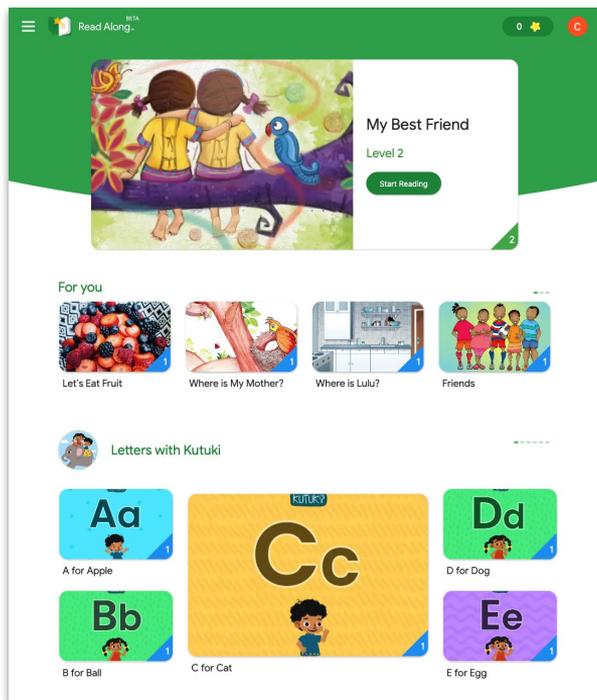

Time-saving, interactive lessons with practice sets

Transform any teaching content into engaging, student-centered, interactive assignments that give educators better insights and inspire students as they work.

Read Along: Learn to read with the magic of your voice!

A fun speech-based app to help students' independently learn and build their reading skills with the help of an in-app reading buddy

Learn to read
with the magic
of your voice.

readalong.google.com

With 1000+ stories in 11 languages, Read Along is available to users on Android and Web

Works offline, Safe and Secure and Free of charge

Impact of Read Along so far:

23Mn+

Downloads

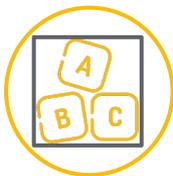

34Mn+

Children Reached

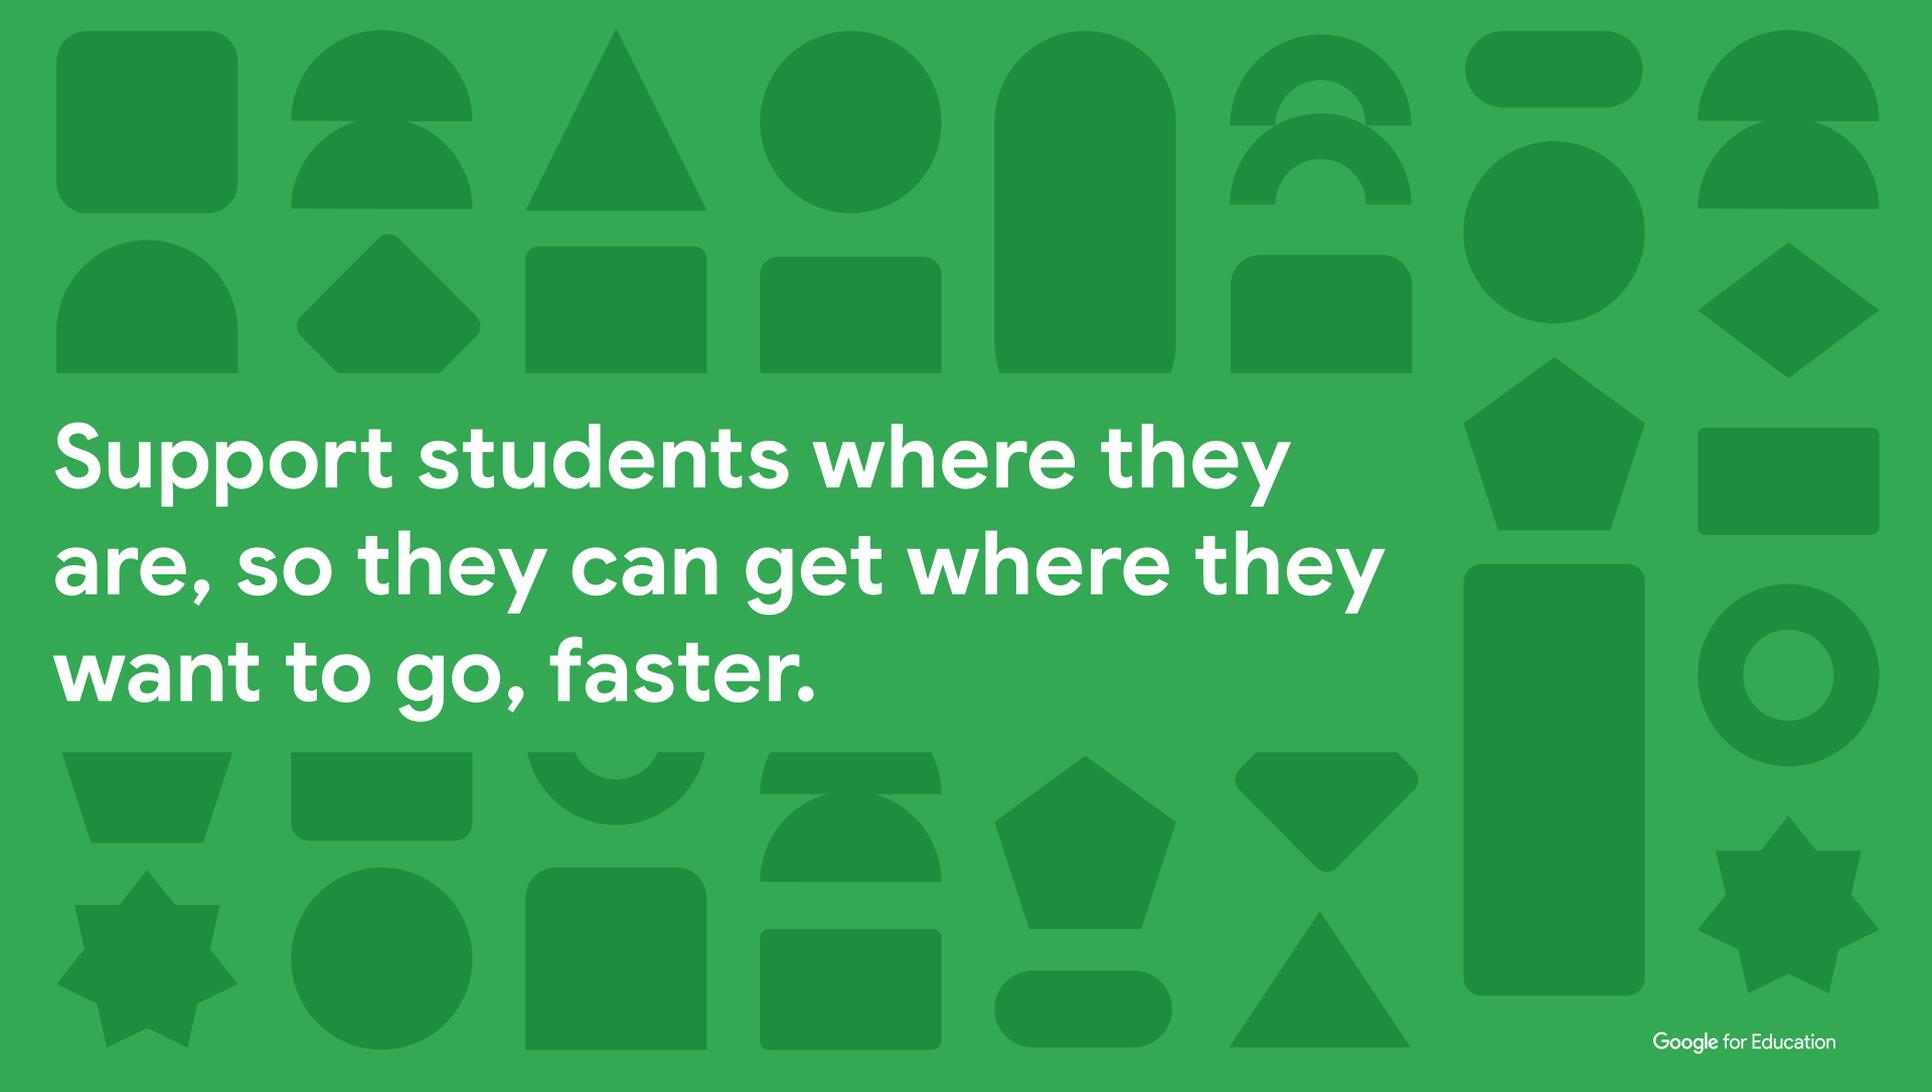

172Mn+

stories read
completely

29Bn+

words read
correctly in-app

**Support students where they
are, so they can get where they
want to go, faster.**

Elevating the teacher

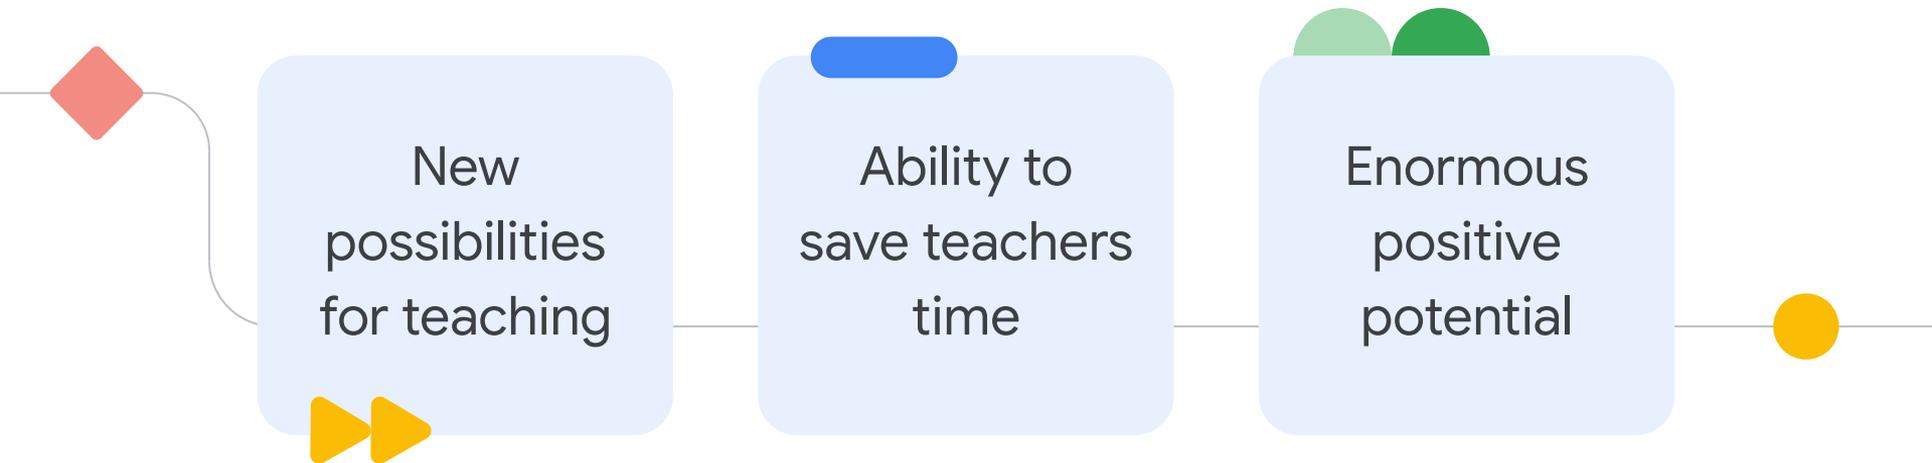

Gone are the days when teachers stood in front of a classroom and just told students what to do or taught them from a traditional textbook. Students are a lot more engaged through digital platforms that allow them to be more autonomous and creative in their learning.”

Keishia Thorpe

Global Teacher Prize Winner, 2021, English success coach, United States

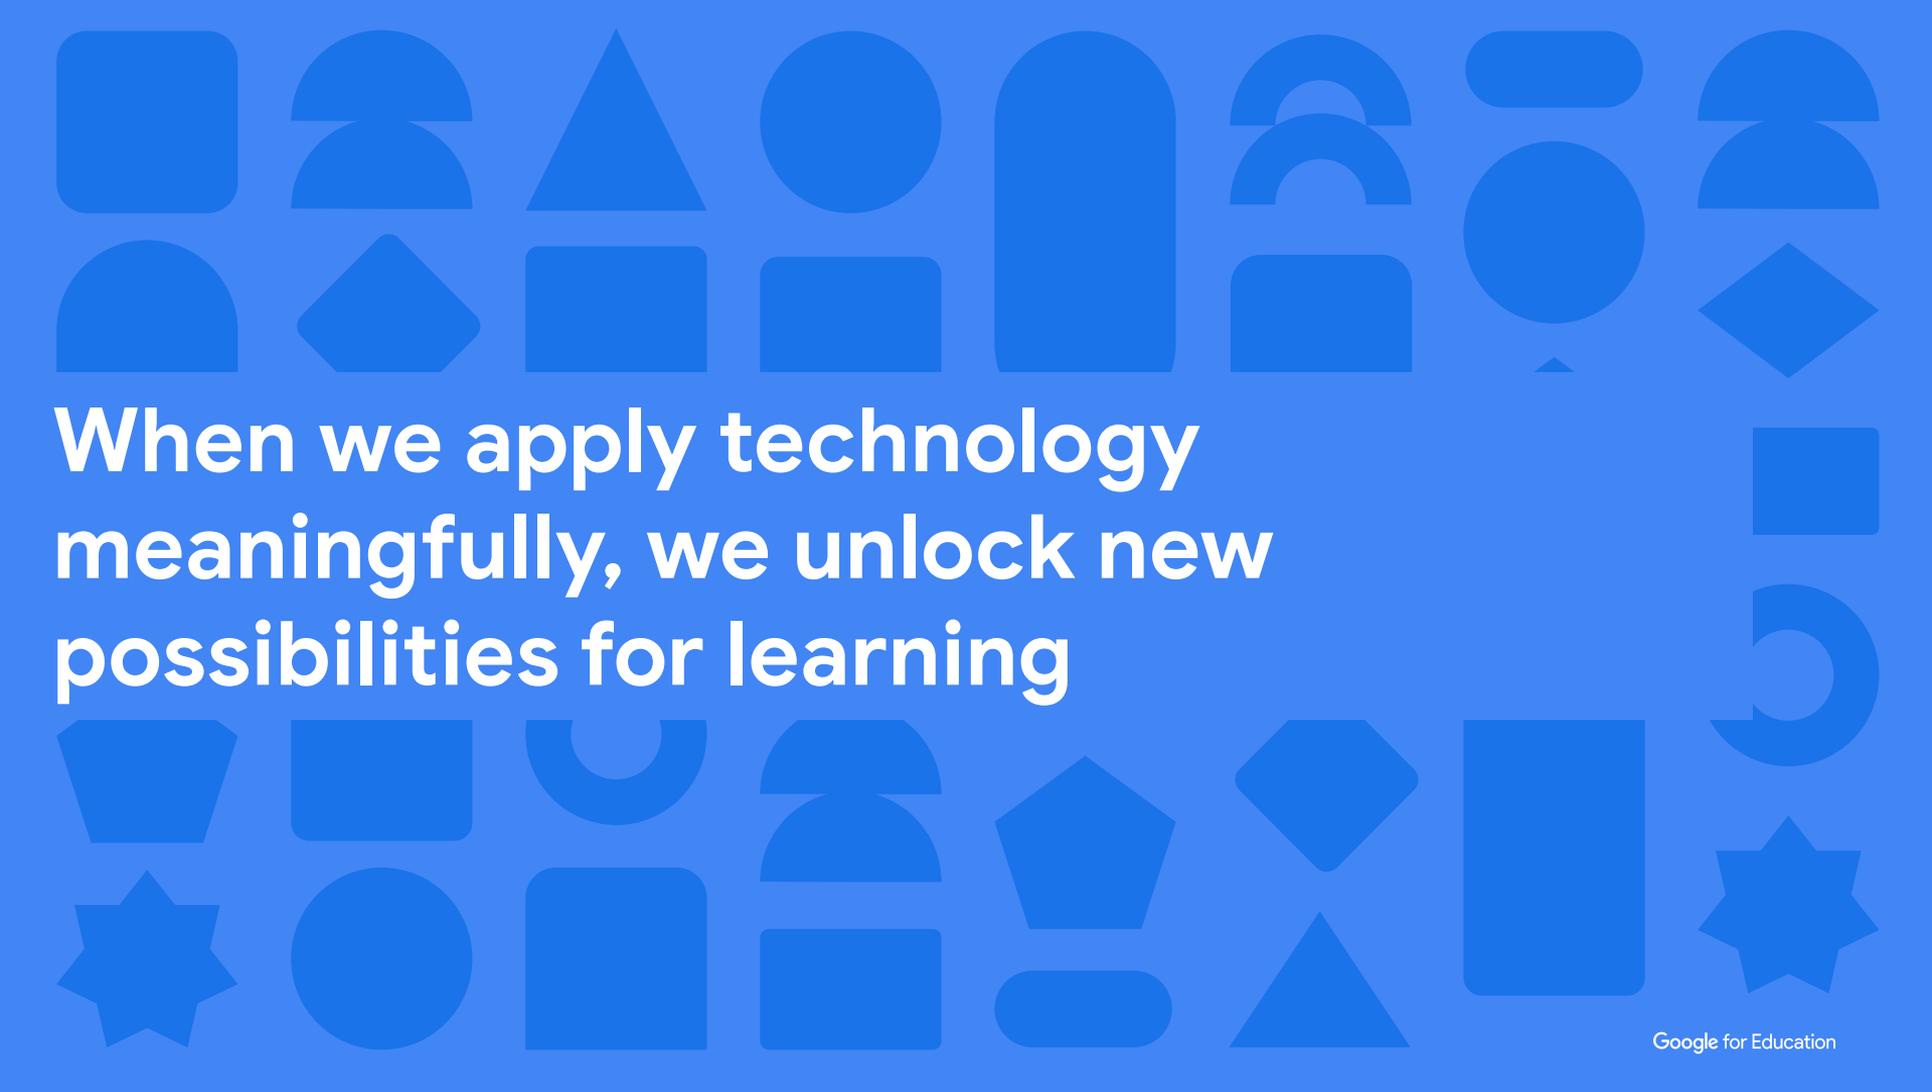

AI in education: what excites educators?

Generative AI has the potential to Power new ways of working

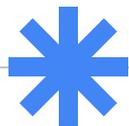

**When we apply technology
meaningfully, we unlock new
possibilities for learning**

Empowering educators with data

Three ways to empower educators with data

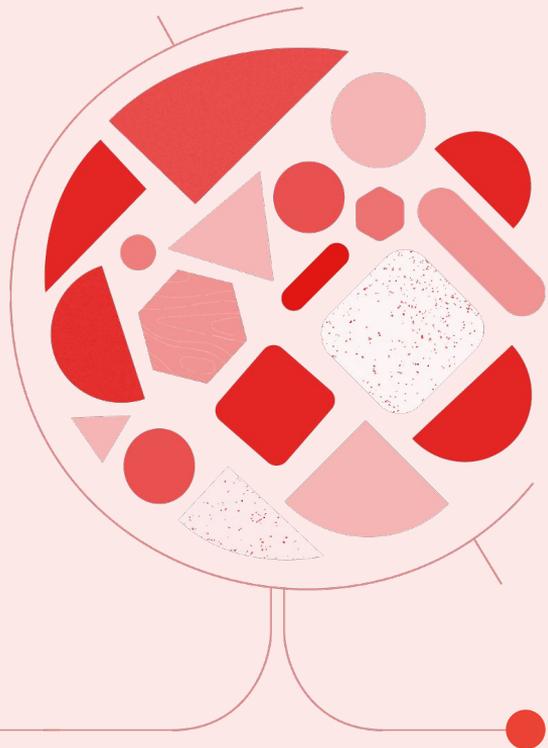

**Provide
real-time
insight into
student
progress**

**Create
inclusive
learning
opportunities**

**Visibility into
effective
instruction**

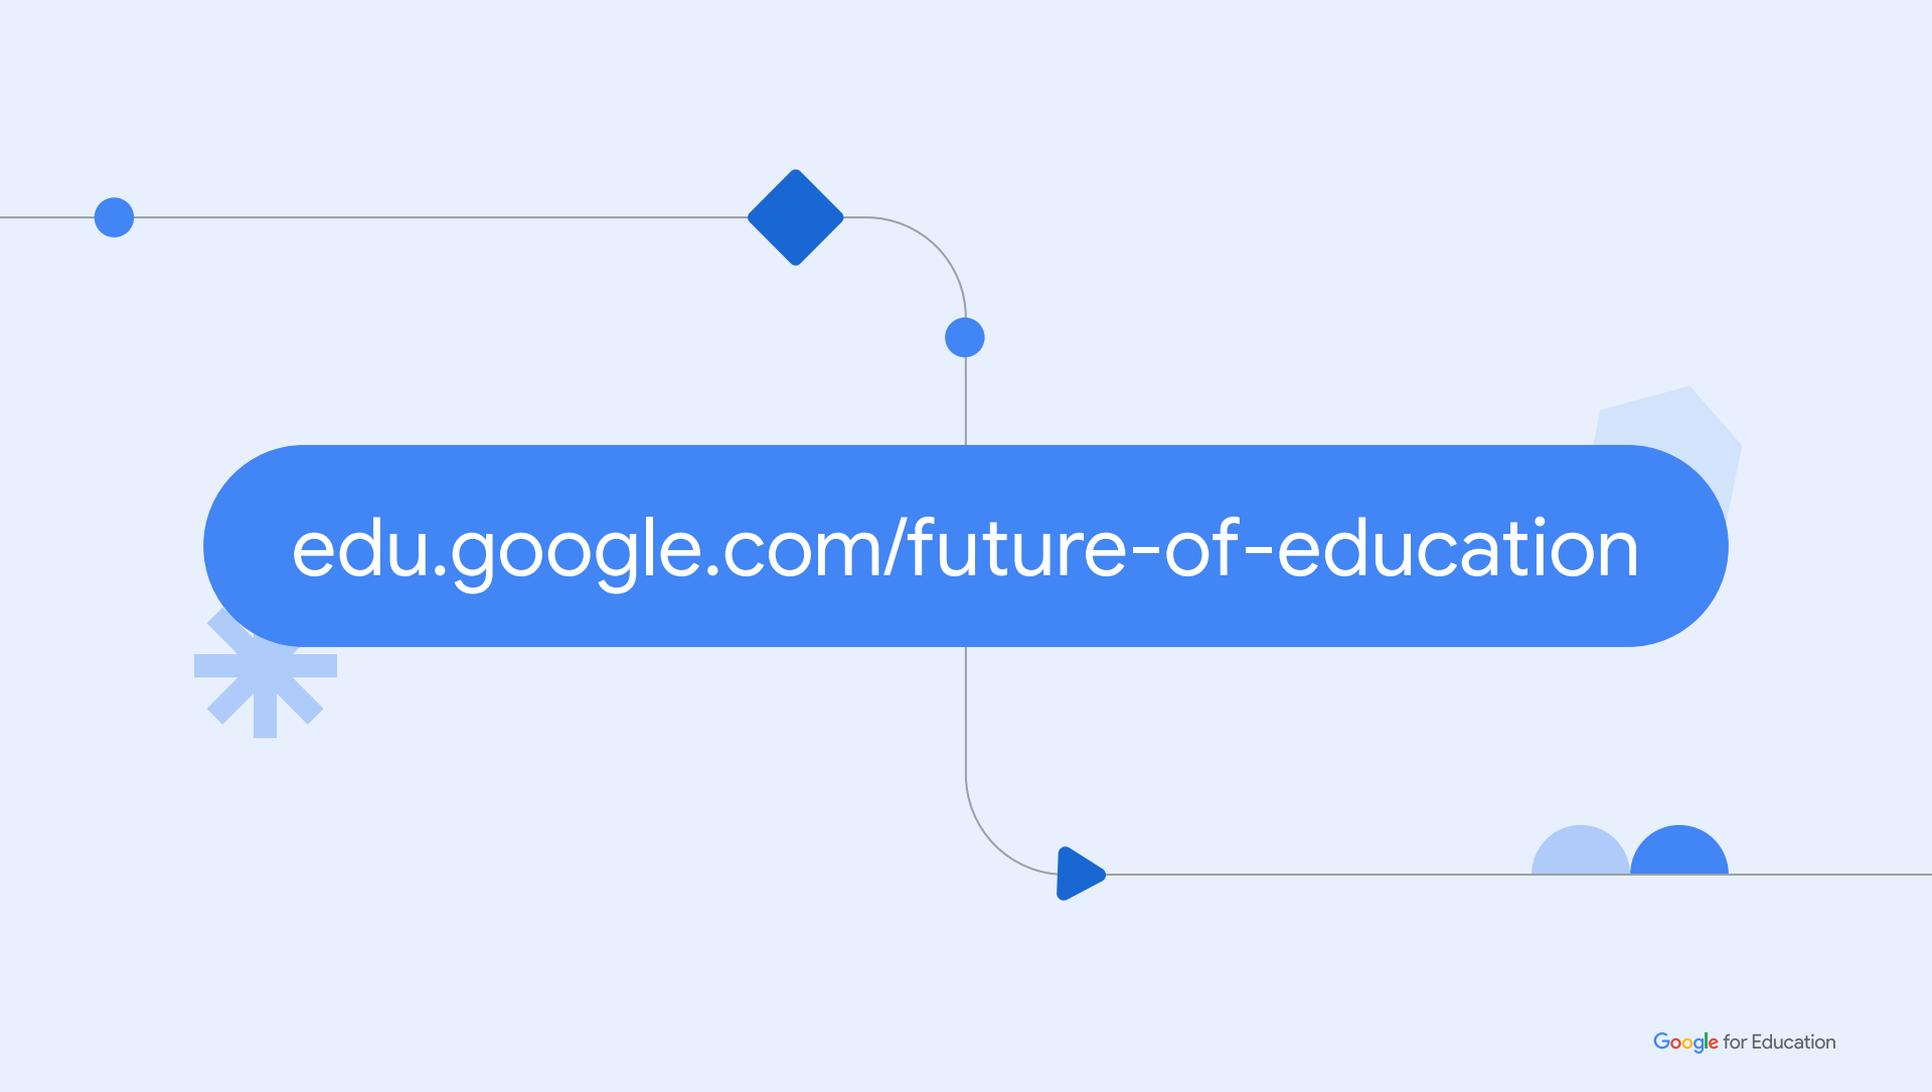

Data is the soil
Insights are the seeds
AI is the gardener

Bard generative AI response to the prompt “*Draft me a metaphor that explains the relationship between data, insights and artificial intelligence and the impact to education*”

When educators receive useful data, they are able to give their students a clear direction.
