Evaluation (Formative,
Summative)**

Why e-Resources for Education?

**Educational Resources
(Textbooks,
Other
Reading
Materials, etc.)**

**E-Resources
(Digital Textbooks,
Other
Weblinks, YouTube, etc.)**

What do Teachers do in Teaching-learning?

- ❖ Planning
- ❖ Accessing
- ❖ Creating
- ❖ Sharing
- ❖ Presentation
- ❖ Interaction
- ❖ Assessment

Why Content Curation?

- ❖ In older days, curation was for libraries and museums
- ❖ Internet and Media is a store house of information/content
- ❖ Now a days every teacher or learner is a curator of information

What is Content Curation?

- ❖ Content curation is the act of discovering, gathering, and presenting the best digital content on subject specific matter, in a meaningful and organized way.
- ❖ Content curation is the art and science of finding and sharing quality content on a specific topic

Process of Content Curation?

Find/Explore

Organize

Share

Finding/Locating Information/Content/Resources

- ❖ Look for repositories of Open Educational Resources (OER). *NPTEL, Spoken Tutorials, OERCommons, NDL, ePathshala, DIKSHA.*
- ❖ The content in MOOC platforms. *SWAYAM, edX, Coursera, FutureLearn, etc.*
- ❖ Video hosting sites such as *YouTube*, and search engine like *Google* may be used to access the content released under a Creative Commons license.

eTextbooks

Access digital textbooks for all classes on this portal

Four small grey circles are visible below the store icons, indicating a carousel of images.

Explore. Create. Collaborate.

OER Commons is a public digital library of open educational resources. Explore, create, and collaborate with educators around the world to improve curriculum.

Fine tune your search with our [advanced search](#).

Support a vibrant, educator-focused Commons

The tens of thousands of open resources on OER Commons are free - and they will be forever - but building communities to support them, developing new collections, and creating infrastructure to grow the open community isn't. Grassroots donations from people like you can help us transform teaching and learning.

ICT in Education Curriculum for Students

Guided by the National Policy on ICT in School Education (see §3.1), the curriculum for students is designed to promote creativity, problem solving, and intro the world of information and communication technologies with the specific purpose of widening their horizons and better informing them of choices in their c particular, the curriculum focuses on training the student to working with a variety of resources; learning to critically appraise information and resources; i productive, ethical and legal use of these resources a habit.

Students are also introduced to ICT outside the classroom context. Their curiosity and desire to learn will prompt them to more intensely participate in ICT activities. While introduction to social networks and blogging would become inevitable, making them aware of cyber bullying or other means of violating their rights should become an essential part of the training. While experimenting with hard and software the range of learning is very high. Channelising these tendencies and co-opting them into the teaching-learning process can help teachers create able support to the ICT system in the school.

The impact of ICT on the overall development of the personality can be extremely significant. In particular its effect on the improvement of communication skills is treated as a central goal of the ICT curriculum. Language barriers and isolation can deny students access to the wide range of digital information and resources. Physically challenged particularly the visually impaired and auditory impaired needs additional support. Heightened awareness on the part of the system will help address these students' problems of access.
