About Telegram :

Telegram is a free and open source, cross-platform, cloud-based instant messaging software. This service also provides end-to-end encrypted video calling, VoIP, file sharing and several other features. It was launched for iOS on 14 August 2013 and Android in October 2013.

Founder :

Pavel Durov is the founder and owner of messaging app Telegram, which has more than 500 million users worldwide. Durov has made Telegram free to use; it competes with messaging apps like WhatsApp, which is owned by Facebook.

Features of Telegram:

- Screen Sharing in Group Video Calls
- High resolution videos – without opening your camera app
- Bot Menu : In chats with bots, quickly send commands using the menu button
- Turn on your camera or share your screen with up to 1000 people in group
- Unlimited audio-only participants.
- Personal Pinned Messages.

Features of Telegram:

- Telegram Web : Open Telegram in your browser on any device – desktop or mobile.
- Groups : Up to 200,000 people can talk, text and share media in group chats.
- Groups can be private or public and offer powerful admin tools to manage discussions of any size.
- the number of read-only members is unlimited.
- Send Without Compression : Photos and videos can be sent at their full quality and size up to 2 GB per file.

Features of Telegram:

- Auto-Delete : Set a timer in any chat to automatically erase messages 1 day, 1 week or 1 month after sending.
- Your phone number is hidden : By default, it is only visible to your contacts. In groups and chats, you will always appear as your chosen name.
- Global Search : Use the search field at the top of your chat list to find people by their usernames, as well as messages or media from all your chats.

Features of Telegram:

- Global Search also shows public channels and groups that you are welcome to join.
- Polls can be created in your groups or channels.
- Messages, chats, call history and groups you created can be completely deleted at any time.
- You can save your chat history with all media and files from Telegram to word file.
- You can use the 'Saved Messages' chat to bookmark important messages.

Features of Telegram:

- You can use Telegram on any number of devices at once, including computers and tablets.
- Edit or Delete Messages: Fix typos or remove anything you send by accident. Edited messages show an *edited* label, and deleted messages leave no trace and no placeholder in the chat.
- Scheduled Messages: Hold the '*Send*' button in any chat and select '*Schedule Message*' to automatically send things at a specified time in the future
