AUDIO PROGRAMMES

PRE-PRIMARY & PRIMARY LEVEL

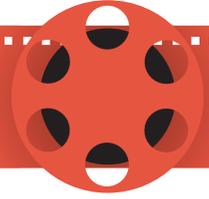

**PRODUCED BY
GOVERNMENT ORGANISATIONS**

**1**

Ph' Se Phurteela

APPGI

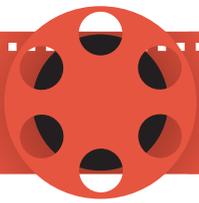

This programme is developed under the series entitled “अक्षर की कहानी” i.e. A story of an Alphabet. This series is aimed to develop the understanding of phonetic sound of an alphabet among young children. This programme is one of this series.

This programme tries to talk to children in an informal manner, avoiding classroom situation to make them open and joyously be involved in the story. In the process, programme encourages children to participate and to speak aloud by their own spontaneity. By doing so, they are encouraged to think and explore more and more words of the same phonetic having same syllable which is 'फ' “Ph” here. While concluding the program, the song is used as recapitulating tool to develop listening and speaking skill among children.

Nowadays we talk about inclusive education. The normal and specially challenged students must sit together, learn together and share the friendship. BUT generally it is seen that the normal children have a sense of hesitation in intermingling with differently abled children. Helen Adams Keller was an American author, political activist, and lecturer. She was the first deaf-blind person to earn a Bachelor of Arts degree.. The program tells about her towering success story & motivates the listeners to have a deeper understanding for differently abled children. The program is meant with two main purposes:

1. To inspire teachers to be compassionate and concerned for such children and to evolve innovative teaching methodology to teach such children.
2. To motivate children to understand that differently abled children can also do wonders if tackled with concern and care.

Most interesting aspect of this program is, the original voice of Helen Keller and her teacher are included at last.

The Giving Tree

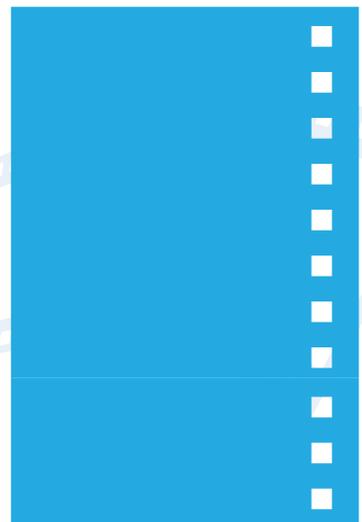

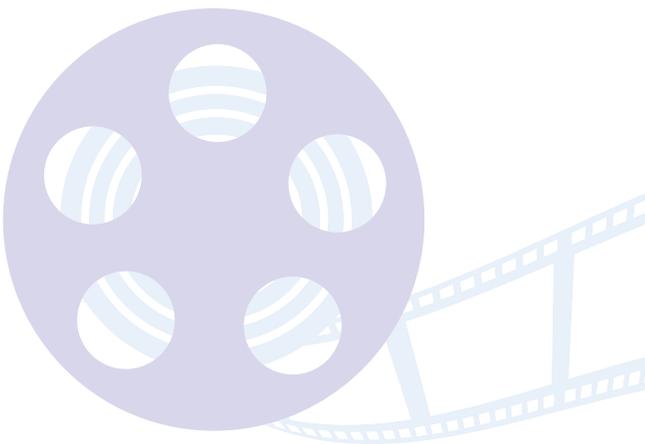

APPG3

World is now going through the crisis of climate change because of so many causes but the major cause is deforestation. This program inspires children to understand that the trees are very important for survival and they always give. Trees are the greatest givers on earth. The program is “very specifically ” designed in story telling mode so that the children can enjoy the art of story telling and develop this language art for themselves. The central message of the program is- Joy of giving is greater than the joy of taking.

Ebecha is a lovely little girl. She lives with her poor mother. She goes to her uncle's house daily to supply milk. Her uncle is a school teacher. She use to study with her uncle's son 'Bungbung' when she goes to give them milk. When seeing Ebecha's intelligence, her uncle asked her if she want to study. She replied that she want to study very much. Her uncle said he would come to her house and have a discussion with her mother. Just after lunch Ibecha use to have baby sitting in other's house. For this monthly payment is made to her mother. Next day her uncle came to her house and said to her mother about his willingness to educate Ebecha. Her mother asked her uncle about the expenditure for education. Her uncle mentioned that it could be done free of cost through the RTE Act 2009. One morning her went came to pay for milk. When her mother said it was Rs. 240/- due to be paid while her aunt replied that it was Rs. 200/- only. Ebecha showed her calculation in the calendar that her mother was right. Her aunt in a little shame left the house leaving thereby Rs. 300/-.

Storing Water

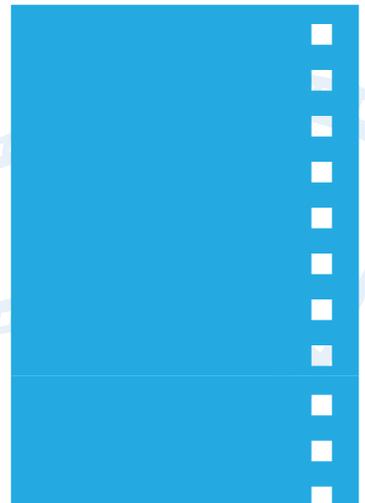

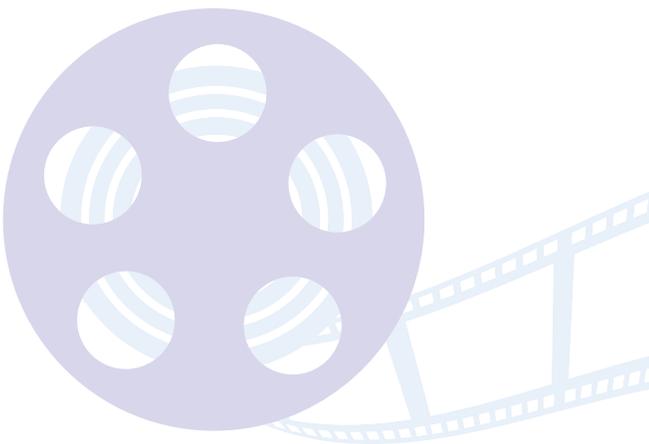

APPG5

Being thirsty, Pishak requested her mother for something to drink. Her son Tomba also wanted to drink. Tomba complained that the juice in the glass was not enough. Suddenly, it rained. The father, mother & their two children joined hands in collecting the rainwater in tanks and other utensils for conservation. The father told his children about ways of rain water conservation which the children listened attentively. Yesterday's or day before rain had made the vegetables green and fresh and they were looking at it and talking about it. During Summer Vacation they went to Singda Dam and watched it. The father explained to the children how during the rainy season Singda Dam conserved water in large amounts and during the dry season that conserved water is supplied to the public for drinking and other agricultural purposes through various canals. Thus, the performance comes to an end with the father's detailed explanation.

Producer/Director : Dr. M. Meenakumari Devi

Students of elementary level naturally have an interest in listening to stories. But children of this age are less exposed to it than the previous generation. Listening to stories is very important activity engaging in which they develop the ability to attach with their tradition and culture as well as ability to comprehend what they listen to. The story “Kalika Loga Pat-Kapoor” is from the Assamese textbook of Govt. of Assam. The idea behind development of this audio to enable the students of elementary stage to develop listening comprehension ability and grow interest in listening to stories and to comprehend it.

Why Should Children Play?

APPG7

To begin with the male presenter says a few words the importance of play in the childhood days of everyone. He says that playing games by children must lead them to achieve personality development. Then the female presenter stresses the need for play at the primary level. She says play helps children to think logically & also develop their creativity. She introduces the two characters in the audio programme. The two characters, the grandpa and granddaughter discuss the importance of playing games by children. A song sung by a mother is heard. It highlights the importance of play. The grandpa advises the girl not eat junk food. They discuss how the PET of the school trains the children who win prizes at different sports events. A presenter tells us how playing games following the rules ensure discipline and mutual cooperation among children- children also develop the quality of 'Adjustment' He then tells us about how children can create their own, new games. Then he tells us about the attitude of parents on games. Some parents want their children to concentrate of studies, not on playing games. Finally he says that parents must ensure that their children must play games at least for one hour every day. He also says children who do not play games may suffer from disease that adults get. Another song that highlights the need for playing games comes at the end of this audio programme.

Nana Nani Ke Naam

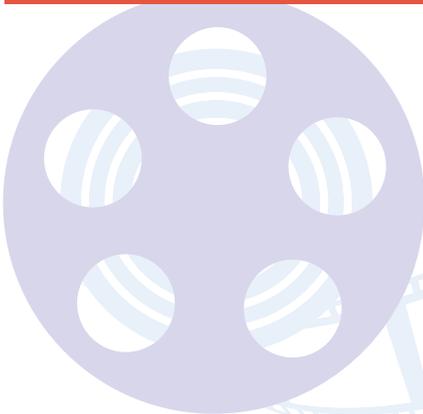

APPI2

A poem rendition in a rhythmic pattern to ensure comprehending, reciting and voice modulating skills in children of Grade 3. A poem in the form of rhyme ensures faster retention and especially in rhythmic mode becomes easier to follow. It has prelude and stanzas rendition in a rhythmic form creatively elicit response from all children and ensure complete participation. The poem has been taken from Class 3, Rhimjhim Hindi Textbook (NCERT). This audio contains different characters with their imaginary names and the crux of the poem narrates the joy of children going on vacation to grandparents and highlights the inter-generation bonding. The content has new words which are become easier for students to learn, because they are able to co-relate the words with the characters. The audio enables opportunity to explore imagination of children and focus on other skills such as listening, understanding, relating and writing apart from enhancing reading skills.

To make scientific content easier and comprehensible, efforts have been made to get into a story line with attractive characters and the medium has been fiction. With Chun Mun as a protagonist in dream goes to Mars and narrates its color, distance, placement etc., which is rather a lucid rendition with other characters interestingly woven around to make the storyline interesting filled with real facts and information. This type of innovation ensures conveying knowledge based facts with elan and easy to understand and retain. This is very different from conventional readings which do not guarantee retention or understanding of concepts and facts. There is no issue of lack of concentration or attention deficit as the story mode creates interest to learn. Apart from information, such story connects students to their life where they can relate situations and events. The voice modulation and simple background music sur creates an ambience to the storyline.

Saaf-Safai Hum Apnaayenge

APPI5

A poem rendition in a rhythmic pattern to ensure children learn about importance of sanitation and hygiene. A poem in the form of rhyme ensures faster retention and especially in rhythmic mode it becomes easier to follow. This poem is developed in a manner to teach children about the importance of sanitation and hygiene through incorporating various components of WASH in the stanzas of this poem. It also motivates the audience to adapt to hygienic behavior related to WASH by co-relating it with day to day living and motivating them to follow and disseminate in the society and is a beginning to realize the dream to get the whole country clean following hygienic practices. The soul of the music of this poem is taken from a classical Bollywood song which makes it easy to remember and instantly recollection by children as well as adults.

राजस्थान की वीरांगना पन्नाधाय के जीवन पर आधारित शिक्षाप्रद कहानी है। यह सत्य घटना पर आधारित है। मेवाड़ के सिसोदिया वंश से संबंधित इस कहानी में पन्नाधाय के शौर्य एवं वीरता की गाथा का वर्णन है। पन्नाधाय ना तो रानी थी और ना ही किसी उच्च पद पर आसीन महिला। उसके पास न ही कोई शक्ति थी और नहीं संगठन का बल परंतु फिर भी उसने अपने स्वामी और राज्य के लिए जो त्याग किया वह अन्यतम कहीं दुर्लभ है। पन्नाधाय ने अपने पुत्र चंदन का बलिदान देकर मेवाड़ के भावी सूर्य उदय सिंह के प्राणों की रक्षा की। इस प्रकार वह इतिहास में अमर हो गईं। पन्ना धाय के त्याग और बलिदान की गाथा मेवाड़ में आज भी बड़े गर्व के साथ गाई जाती हैं।

चीं चीं चिड़िया

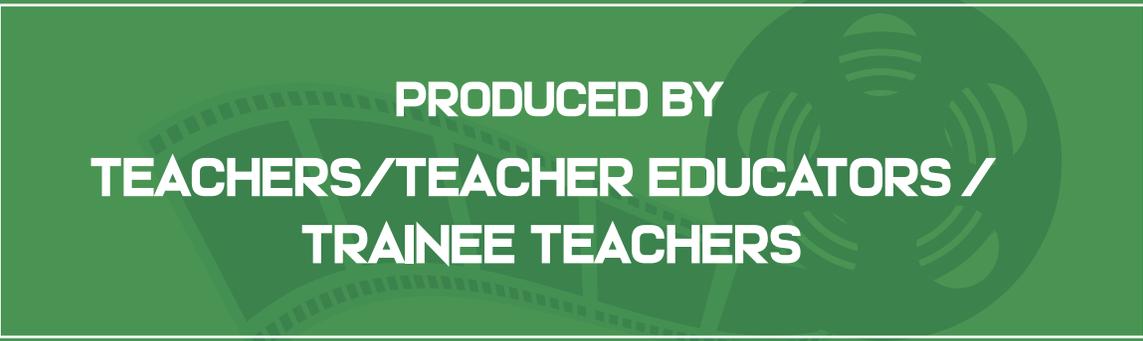

APPI7

लगभग 10 वर्ष तक के बच्चों को पशु – पक्षियों के प्रति विशेष आकर्षण होता है। इसलिए यदि पशु-पक्षियों के माध्यम से उन्हें कुछ सिखाया जाए तो वे उसे रूचिपूर्वक और भीघ्रता से सीख जाते हैं। कुछ वर्षों से एनसीईआरटी द्वारा शिक्षा में कला एवं सौंदर्यबोध शिक्षा के उपयोग पर विशेष ध्यान दिया जा रहा है और इसके लिए सार्थक प्रयत्न भी किये जा रहे हैं। इसी से प्रेरित होकर बच्चों को कला के माध्यम से गिनती समझने की दृष्टि से ही इस ऑडियो प्रोग्राम का निर्माण किया गया है। इस ऑडियो प्रोग्राम में कुछ बच्चे नानी के पास बैठे हैं। नानी उनको चिड़िया का एक किस्सा सुनाती है, जिसे बच्चे जिज्ञासापूर्वक सुनने को उत्सुक होते हैं। नानी उनको सुनाती है कि एक पेड़ पर एक चिड़िया बैठी चीं चीं कर रही थी, तभी कहीं से उड़कर एक और चिड़िया आ गयी। तो वो दो हो गयी। दोनों दाना चुगने गयी तो वहाँ पहले से ही दो चिड़िया बैठी थीं, इस तरह हो गयी चार। इसी प्रकार काव्यात्मकता और गीतात्मकता का रस लावण्य लिये कथानक आगे बढ़ता है और बच्चों को खेल-खेल में दस तक की गिनती तथा जोड़ की प्रक्रिया समझ में आती है। बच्चे भी उत्साहपूर्वक नानी के सुर में सुर गिलाकर गाते भी हैं और समझकर बताते भी हैं। यहाँ दादी-नानी की पूर्व परम्परा को भी स्मरण कराने का प्रयास किया गया है।

This is a story about a little bully boy Hari. Once upon a time lived a small boy who loved to tease the boys and girls who went to school with him. He loved to pinch and prick others. Another trick he played with others is pricking with a pin. So all the children hated hari. One day the class went for a picnic to the seaside for whole day. All the children were wild with excitement. They crowded in the train and sat but nobody sat next to hari as he always pinched. When they reached the seaside children raced hand in hand but nobody took hari's hand. So hari was angry. He went to a sandy corner near a rocky pool and took his lunch. As he was beginning on the eggs he heard a hoarse voice near him. "Good morning ! I am pleased to meet a boy like you". It was monster crab from the poolit held out his front claw to hari. When hari put out his hand to shake to his surprise and anger the crab opened his pincer like claw and hardly nipped his hand that the little boy yelled and another sandy lobster came and pinched hard in hari hand that he yelled in pain. More shrimps and prawns, crabs and another large lobster pricked hari till he was soon black and blue with their pinching. "Don't you like it. Why we were told you would love to see us because you were a champion pincer and pricker" said all the creatures. Hari leapt to his feet, crying loudly. His lunch rolled into the pool, crabs and lobsters saw it and ran to eat it. Hari ran for his life and thought "They only did what I did to the other children. But how it hurt and how I hated those crabs and lobsters! I suppose the other children hate me too. Well, I jolly well shan't pinch or prick anymore. Hari realized his mistake and decided never to pinch or prick again.

बरगद का वृक्ष

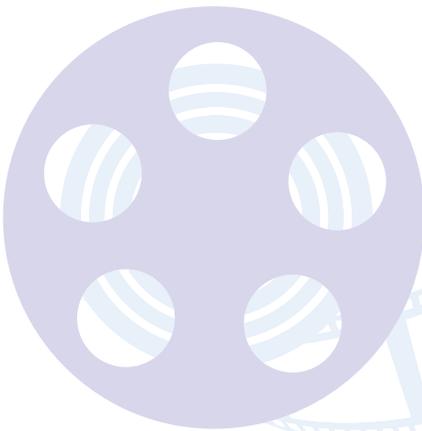

APPTS

बरगद का वृक्ष कहानी छोटे बालकों के लिए एक शिक्षाप्रद कहानी हैं। इसमें बरगद के वृक्ष के माध्यम से बच्चों को एकता का पाठ पढ़ाया गया है। साथ ही बच्चों को यह भी बताया गया है कि किस प्रकार से प्रकृति की हर चीज उपयोगी है। यह भी बताया गया है की हम सब किस प्रकार एक दूसरे के ऊपर निर्भर हैं और एक दूसरे के बिना हमारा जीवित रहना संभव नहीं है। प्रकृति के सभी जीव, कीड़े-मकोड़े, पशु – पक्षी सभी हमारे लिए बहुत उपयोगी हैं। वह किसी न किसी प्रकार से हमारा सहयोग करते हैं, और प्रकृति के चक्र को चलायमान रखने के लिए भी सहयोगी है। चिड़िया किस प्रकार से इल्लियों व छोटे जीवों को खा जाती है। यह छोटे जीव ही है जो पेड़ों के पत्तों को खाते हैं। यह सड़े हुए पत्ते जमीन पर जब गिर जाते हैं तो केंचुए इन्हें अपना आहार बनाते हैं, जिससे जमीन को खाद प्राप्त होती है और हमारी जमीन उपजाऊ हो जाती है। बरगद के वृक्ष के माध्यम से बालकों को विनम्रता का पाठ भी पढ़ाया गया है और बच्चों को यह भी सिखाया गया है कि हमें किसी भी बात का घमंड नहीं करना चाहिए। बालकों के सामाजिक विकास को गति प्रदान करती एक शिक्षाप्रद कहानी है।

आदमी का धर्म
APPT7

कहानी में एक स्वाभिमानी बालक जीवन के नैतिक गुणों को ही अपना धर्म मानता है। एक दिन वह अपनी बीमार मां के लिए एक व्यक्ति से पैसे मांगता है। व्यक्ति द्वारा उसकी पहचान पूछे जाने पर बालक कहता है कि मांगने वाले की ना कोई जाति होती है, ना ही कोई धर्म तथा अपने नाम भारत सिंह होने का कारण बताता है कि भारत मेरे देश का नाम है तथा सिंह उसका राष्ट्र चिन्ह इसीलिए मेरा यह नाम रखा गया है। बालक से बात आगे बढ़ाने के लिए व्यक्ति कहता है कि यदि तुम्हें अपने देश से इतना ही प्यार है देश भर में किसी से भी मांग सकते हो। मुझसे ही क्यों? बालक कहता है कि आप भी भारतीय हैं इसलिए मैंने सहयोगार्थ आप पर अपना हक समझा है। बालक अपनी बातों-बातों में व्यक्ति को कहता है कि मुझ पर विश्वास कीजिए मेरी माता के ठीकहोते ही मैं आपके पैसे वापस लौटा दूंगा। व्यक्ति उसकी बातों से प्रभावित होते हुए उसे पैसे दे देता है तथा इन पैसे को कभी नहीं लौटाने के लिए भी कहता है। परंतु बालक लौटाने का वचन देता है क्योंकि वह मानता है कि विश्वास की रक्षा ही उसका धर्म है तथा बताता है कि मेरी पाठशाला में गुरु जी ने मुझे सिखाया है कि मनुष्य के गुणों यथा- कर्तव्य-पालन, प्रेम, ईमानदारी, दया, सत्य, सबकी सेवा, आदि ही उसके सच्चे धर्म है। बालक की बातें सुनकर वह व्यक्ति बहुत ही खुश होता है तथा उसकी मां के जल्दी स्वस्थ होने की कामना करते हुए कहता है कि हे बालक! तेरी बात ही सच्ची बात है।

The poem "Zoo Manners" with 20 short lines is written by Eileen Mathias. As is evident from the title, the poem talks about the etiquette one should follow while visiting a zoo. The poem begins with a caution that you should be careful about what you say or do when you visit the zoo. It then tells the readers not to make fun of the camel's hump as the camel is proud of it. It also warns not to laugh much at the chimpanzee because he feels that he's equally smart as humans. The poem goes on to say that the penguins can understand whatever comments you make. It ends on a suggestive note saying that you should treat the animals at the zoo with respect. If you do so, you will always be welcomed at the zoo. The poems for kids are often written to impart some good habits or morals to the kids. Zoo Manners Poem also is one of those poems. It is one of the poems in the CBSE English Poems for Class 2 Kids.

Treat for Mosquitoes

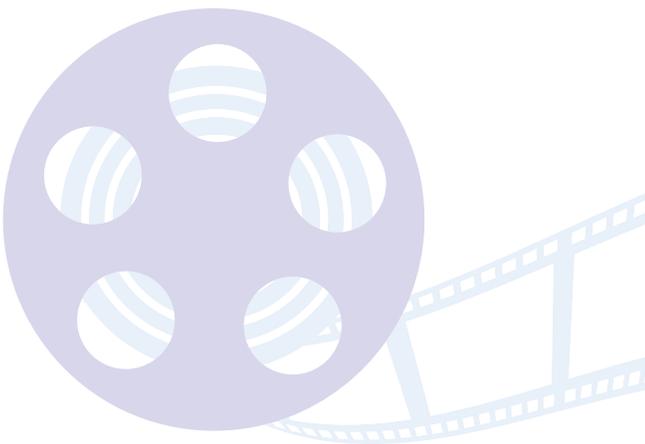

APPT9

This Audio is prepared to teach and to help students to learn about the Mosquitoes. Through this Audio programme Students learns about the harmful effects of Mosquitoes. Students learns about the disease caused by Mosquitoes are Malaria, Dengue, Chikungunya. And to avoid and protect ourselves from these diseases we should not allow water to collect around the area we live in. we should some few drops of kerosene on the stagnant water so that Mosquitoes can not breed there. Person with less hemoglobin in their body are called as Anaemia and they have to eat Jaggery, Gooseberry and Green leafy vegetables. We should keep our surrounding neat and clean and clean our water tanks and coolers from time to time. Dr. Ronald Ross did an experiment and found that Mosquitoes Malaria and Dengue as the germs found in person with malaria and Mosquitoes.

हमारे विषय का नाम है "जैसा अन्न वैसा तन"। हमने इस ऑडियो को इसलिए चुना क्योंकि सेहतमंद खाना ही तंदुरुस्ती देता है। सही अन्न से ही अच्छा तन बनता है। यह खास कर प्राइमरी बच्चों के लिए बनाया गया है। इस उम्र के बच्चों को जंक-फूड ही सबसे ज्यादा पसंद है। इन बच्चों को इस का परिणाम नहीं पता है इसलिए हमारे ऑडियो के जरिए बच्चों को पौष्टिक खाने का महत्व बता रहे हैं। हर चीज जो स्वादिष्ट है वह सब पोस्टिक नहीं होता है। इस ऑडियो में एक पौष्टिक खाना (गाजर) और एक जंक खाना (चिप्स) के बीच में एक बहस होता है। जिसमें पोस्टिक खाना जैसे की सब्जी और फल की महत्व और जंक-फूड की परिणाम बताया जाता है। जो टेक्नोलॉजी इस ऑडियो में प्रयोग करें हैं वह बिल्कुल मुफ्त है। जो पीछे का संगीत है वह डायलॉग्स के साथ में मिलाया गया है। इस ऑडियो से हम पूरी कहानी को कल्पना कर सकते हैं। यह ऑडियो इंस्टिट्यूशन के अंदर ही रिकॉर्ड किया गया है। यह सिर्फ प्राथमिक विद्यार्थियों के लिए खास बनाया गया है। इन लोगों को पौष्टिक खाने के बदले स्वादिष्ट और मजेदार जंक-फूड ही पसंद है। यह इसलिए बनाया गया है कि इसको सुनने के बाद बच्चे जंक-फूड को छोड़कर पौष्टिक खाने को पसंद करेंगे।

पौष्टिक खाओ, तन-मन जगाओ ।

जिंदगी को रखना है खुशहाल, तो रखें खाने में ख्याल।

Maut Ka Pahad

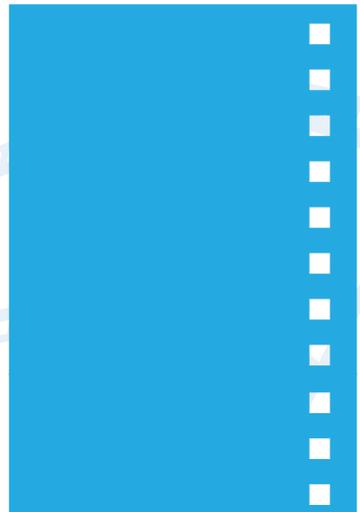

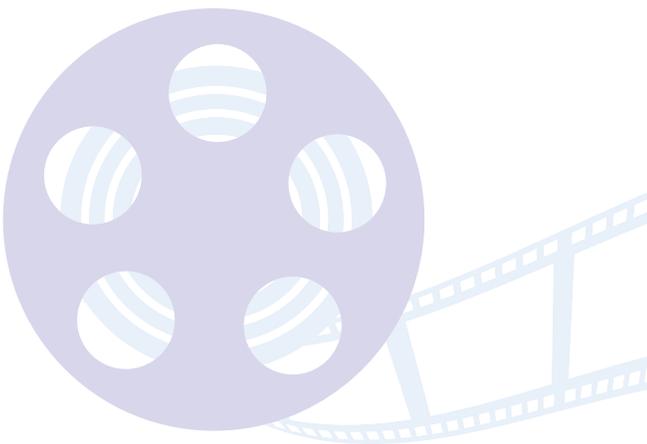

AUPGI

This program is taken from the "Doorva" the textbook of Hindi for class 7. The program is based on a story of a kingdom where the king makes the law that all the citizens who have crossed the age of 70 must be sent in isolation in a mountain to die as they have no importance in society as they are weak and unworthy to work. The story line elucidates two brothers who keep their mother at home in spite of having her attain 70 years. The story moves in an interesting manner with effective media treatment and apt sound effects and arrives on the conclusion with the repentance of the king that respecting parents and elders and taking care of them is a great virtue. The lesson of the story becomes very powerful in modern times as we see that parents are mostly left alone.

Nowadays the cinema has crossed countless milestones but wouldn't it be interesting to know as to how was the inception of Indian talking movie? Yes, This program gives an interesting account of the eventual and gradual evolution of Hindi cinema. The program interestingly provides information of the transitory period of Hindi cinema from silent to talking. The program gives historical glimpses of the amazing moments when the Indian film "AlamAra" talked or sounded for the first time.

Anangabhima Deva

AUPG3

The story chronicles the journey of Indian ruler, Anangabhima Deva III & his affection towards Lord Jagannath and the people of his dynasty. Anangabhima Deva III was a powerful ruler and reformist of the Eastern Ganga Dynasty that ruled an early medieval Odisha from the year 1211-1238 A.D. He became the ruler of the ancient land of Kalinga in the year 1211 A.D after defeating the Muslim forces of Ghiyasud dinIwaj Shah, the ruler of Bengal. The story begins with the coronation of Anangabhima Deva III where he dedicates the victory to the bravery of soldiers, support of his dynasty people and the blessings of Lord Jagannath. After few days, he visits the village of Krushnapur and how he is overjoyed with the love showered by the people due to which he orders to build Chateshwar Temple in the nearby village as he considers himself as servitor of the Almighty. Subsequently, he meets a group of Brahmin at his courtroom where he declares to donate land to them and extend all kind of financial assistance for the upkeep of Lingaraj Temple and JagannathPuri so that the world gets to see the art, culture and tradition of Odisha (formerly known as Utkala).

Water Flow

AUPG5

Ibethoi is a little girl reading in a school. The day on which her uncle Ibotomba comes home (during vacation) is her happiest moment. Her uncle always gave the right answer for every question she asked and this is what Ibetombi loves. During summer days, Ibetombi's father Ibohal and her mother Ibemhal went to their field to clean the irrigation canal. Her grandmother Loidang sent Ibotomba and Ibethoi to the paddy field to deliver milk, steamed tapioca and water for her son and daughter-in-law. Through conversation with her uncle Ibethoi knew the reason for cleaning the canal and the site for setting/casting fishing net (site for fishing using fishing net) before it starts rain. After seeing the loktak project canal at Ningthoukhong, the whole family then went to Ithai dam. From the explanation of her uncle Ibotomba, Ibethoi could understand how Ithai dam restricts water and raises water level in loktak lake, and that water by flowing through the canals at Ningthoukhong, then passing through tunnels (underneath hills) pushes against the turbine at Leimatak causing the turbine to spin and generate electricity and distribute water to the fields through irrigation canals.

The audio programme begins with the presenter telling us about a clever girl who has completed class V. She had studied at a private school. Now she wants to join a government school. The parents are ready to send her to the same old private school. But she wants to continue her schooling at a government school. Accordingly her father gets her admitted at the government school. There he learns about many new features of education provided there- spacious classrooms furniture separate toilets for boys and girls, big playing fields, drinking water, midday meal, experienced and qualified teachers, free books, free uniform free bicycles, for girls and English medium sections etc. He also comes to know about a new scheme Amma Vadi meaning mother's lap. In it poor parents of children in classes I to X, Intermediate and Degree courses receive Rs 15000 per annum. The audio programme also tells us about other new schemes introduced in government Aided, Residential schools, like (1) visit to govt. schools by Education Trainers who suggest how to choose a career to students at different levels, (2) Period of Ananda Vedika when students are helped to learn mindfulness, stories and expression skills, in a happy environment, (3) conduct of Remedial classes for slow learners, use of technology in classrooms. The Programme ends with a song which highlights the importance of education for every child.

"Mausam ke rang dadi ke sang" is a program which characterizes a small girl who visits an old lady in her neighbourhood to know about the weather. Also her friend Gunjan, comes to meet the old lady to write an essay about the 'Weather' and get a deep understanding about the same, along with his friend Bulbul. The old lady tells both the children about the Pros and Cons, Plus and Minus of the weather. She also makes the children understand the phrases and idioms used in the program. By this the children understand the importance of nature and different things given us by it. This helps the children in writing their school essay and they also understand the importance of protecting and conserving the nature.

बालक का स्वप्न एक शिक्षाप्रद कहानी है जिसमें बताया गया है कि किस प्रकार अपने विचारों को दूसरों के ऊपर प्रकट नहीं करके व्यर्थ में चर्चा नहीं करके योजनाबद्ध तरीके से उस कार्य को पूर्ण करने में जुट जाना चाहिए। जैसे कि उस बालक ने अपने स्वप्न की बात किसी को नहीं बताई और केवल एक ही लक्ष्य रखा कि किस प्रकार से अपने उस स्वप्न को सत्य में परिवर्तित कर सकें और एक दिन ऐसा भी आया, जब उसका स्वप्न सच हो गया। कहानी यही शिक्षा देती है कि हमें कर्मठता से अपने लक्ष्य को प्राप्त करने के लिए कटिबद्ध रहना चाहिए। कर्म कठोरता लगन और निष्ठा से कोई भी व्यक्ति महान बन सकता है। जैसे उस बालक ने अपनी लगन मेहनत एवं निष्ठा से उच्च पद प्राप्त किया।

आज के इस आधुनिक युग में भी अज्ञानता और अशिक्षा के कारण विशेषकर गांवों में मनुष्य अंधविश्वास में कुछ इस तरह से उलझ जाता है कि कुछ भी गलत कर जाने से नहीं हिचकिचाता। अशिक्षा एवं अंधविश्वास के कारण साधु महात्मा एवं अपनी पत्नी की बातों में आकर रामरख अपने छोटे लक्ष्मण तुल्य भाई की जान लेने को भी तैयार हो जाता है जबकि छोटा भाई अपने बड़े भाई का सहयोग करने के लिए अपने प्राणों की बाजी तक लगाने को तैयार हैं। साथ ही वह कुछ ऐसा कार्य भी करना चाहता है जिसकी वजह से उसके भाई भाभी एवं उनके बच्चे फले फूले एवं उन्हें किसी प्रकार की तकलीफ का सामना ना करना पड़े। जब वास्तविकता बड़े भाई के सामने आती है, तब उसे अपनी गलती पर पछतावा होता है। यह सब अज्ञानता व अशिक्षा के कारण ही हो रहा था। कहानी के माध्यम से जन जागृति का प्रयास किया गया है। साथ ही कहानी में यह भी बताने का प्रयास किया गया है कि रिश्तों में आपसी समझ एवं प्रेम होना कितना आवश्यक है। यदि रिश्तों में प्रेम हो तो उसमें सौतेला और अपनापन जैसा कुछ भी नहीं होता है। सौतेला होते हुए भी छोटा भाई अपने बड़े भाई पर जान छिड़कता है। बड़ा भाई भी अपने भाई से बहुत प्रेम करता है परंतु परिस्थितियां, अंधविश्वास एवं अज्ञान उसे गलत राह पर ले जाते हैं। मेरी इस स्वरचित कहानी में यही संदेश है कि अशिक्षा और अंधविश्वास व्यक्ति के मूल स्वभाव को परिवर्तित कर देते हैं एवं वह जानवर से भी बदतर व्यवहार करने लगता है। अतः हमारे समाज के इस नासूर अर्थात् अशिक्षा एवं अंधविश्वास को दूर करने के लिए हमें प्रयास करना होगा। अंधविश्वास और अशिक्षा से मुक्ति दिलाने के लिए मेरा यह छोटा सा प्रयास शायद कुछ रंग लाये छ।

Science is knowledge about the material, natural world. It is the knowledge produced from systematic observation, measurement, experimentation, and exploration about natural objects, their properties, & their interactions. Science is everywhere. Learning of science will be successful when a student will be able to co-relate and apply everything he gets from the textbook with his surroundings. The primary goal of this audio is to provide the science behind the day to day observations of food habits. This audio is based on the lesson "Food: Where does it come from?" of class-VI, science. It is an audio drama through which we are trying to explain general observations in a scientific way. A child encounters lots of happenings in his daily life, but they found no one to ask and clear their confusion. The audio is the chat between the character "Mou" and her uncle, where her uncle tries to answer all her curious queries.

We selected this topic to present awareness on diseases. The reason for selecting this content is, "we should not only gain knowledge but we should also use it practically in our real life when we need. It is specifically prepared for upper primary students. The content is related with dengue fever and its awareness. There was a boy who lived with his grandmother. His father's health is not well he went to visit him. He uses his theoretical knowledge in a practical way and takes his father to the hospital for treatment. The boy intends to share the awareness of dengue to his neighborhood too. The technology used in this audio is of no cost. The Background music's were recorded lively and also taken from creative common source. This music's were used as ground sources and merged with dialogues. It is really amazing to visualize the audio. It is recorded under the institution premises. It is highly targeted for upper primary towards practical applicability of learned content in day to day life.

One Wish

AAPT6

"The One Wish" is an attempt to incorporate the extraordinary and unique relationship between parents and offspring into a fictional short story at the present time. For parents, their offspring are neither an asset nor an asset for their assigned duties. Parents and offspring have a fictitious description of the prices. From pre-baby birth to their Ikkasala childhood, adolescence and youth parents and offspring vachena their relationship has been described by some pictures. Also, what does a parent do for enough of his son's wishes? The scenes depict life-long endeavors through the scenes with great emotion. The story also describes a parent's own offspring, his desire for a child, and what his heart desires. Through the dialogue between the parents and the offspring through the "one wish" audible story, one must be found somewhere in the present-day homes or neighborhoods, just as these pictures are depleted and the curious connection between the parents and offspring forms a bridge to building a grand India and on both sides. It is for the purpose of understanding that the parents and offspring's affection for each other flows with unwavering and unique emotions. This story is portrayed from the ground up.

How a radio drama is made?

ASSG2

Drama has been an inseparable element of amusement of human society. This program is taken from the book. "Abhiwakti Aur Madhyam" the textbook of class 11. The book deals with different forms of communication skills. The program portrays in very interesting manner as to how a radio drama is created with specific point of view that radio is not the visual medium and thus every thing or scene has to be created just by voice modulation and sound effects.

Acharya Ramanuja

ASSG4

The story narrates the journey of one of the greatest Indian philosophers, Sri Ramanuja and how he advocated the philosophy of service to mankind, the concept of Universal Love and the need to eradicate the discrimination existing among human beings. Sri Ramanuja was the one who promoted the thought of how Moksha can be attained by sheer devotion and service to Lord and His devotees. According to him, there is no distinction between high and low and touchable and untouchable. He is respected by millions of people around the world for his immense knowledge on acharya-bhakti and its impact on social consciousness. There is an instance in the story of how Ramanuja dispels the thought of untouchability when a young girl refuses to sit in his courtroom as she feels she belongs to the untouchable section of the society. He advises the people that all human beings are sons and daughters of God and everyone should be treated with kindness, affection and compassion.

The programme 'Tri-colour Flag in Moon' is a programme on Indi's Moon Mission. India has started its space exploration in the beginning of sixties. India's eagerness to land on Moon blossomed in 1999. When the rocket was invented man sent space shuttles over there and got ready to go there. He landed there and walked over there and returned to earth. He did this not merely once, but six times. So far twelve persons have gone there. After 50 years he again gets ready to go there to build up a settlement. India is also preparing for the missions to explore Sun and Mars. Gaganyaan which brings Indians into space has been in its workshop. We are going to have our own space station in the near future. The programme clearly depicts. India's intense exploration in space science which has been continuing unabated.

Today's burning problem in front of us is Abuse on women and children. The main objective of the play is to aware children on child Abuse. The persons who are below 18 years age are considered as children. Children should be aware of how to identify and how to face the wicked situations. Children have to train up against abuse from the childhood in homes as well as in schools. Regarding this what should be done in cases of offenses to children and women? Whom should you ask for help? The answer to such questions as this is an attempt to bring to light the child abuse and remedies.

Malang Knongchat (Travelling in Space) ASSG8

The main theme of the programme is to show case not only the first person to have travelling in a space craft but to also show who are the Indians to have travelled in a spacecraft. Sanathoi fell sleep thinking about the stars and the planets. The almighty creation came in his dream and talked with him. Sanathoi asked the creation if it was true that the mother earth was covered with a layer of air. The creator answered in the affirmative and further told Sanathoi that beyond the layer of air cover is the never ending void of space. The almighty creator told Sanathoi that the first person to have travelled in a spacecraft through the void empty space is called Yuri Gagarin and the first person to have ever landed walked on the moon is Neil Armstrong. When Sanathoi asked if there wasn't any Indian to have travelled in a space on a spacecraft the creator told sanathoi that Rakesh Sharma, a pilot and squadron leader was first Indian to have travelled in space in a spacecraft. Sanathoi next asked if there was not any Indian to have travelled through space in a spacecraft the creator told Sanathoi in detail how the India born (New dead) Kalpana Chawla travelled in a spacecraft and what things she did in space. After this, the creator further told Sanathoi about Sunita William's space travels. As Sanathoi wakes up the play story comes to an end.

"Asathomaa sadgamayaa,"
 "Thamasomaa jyothirgamayya,"
 "Mruthyoma Amruthangamayya",
 "Om Santhi, Santhi, Santhihi."

The teacher gives the meaning of the sloka. He then tells the pupils how man progressed in all field since the ancient times. There is some interaction between the teacher and the pupils. Their interaction leads to the task of education hundreds of people around each person. Then a blind pupil asks the teacher how she can do it the teacher tells her about the Braille script for blind people. He tells her about the great Indian Emperor Akbar who had some eye problem. At the time a young woman approaches the teachers. She introduces herself after reminding him that she was his student. She recalls how he encouraged her although she heads a disability, how she took his support and how she becomes the District Collector recently. She expresses her deep gratitude to him. Then the woman addresses the villagers and the pupils and exhorts them to utilize the welfare schemes introduced by the govt, with stress on everyone getting education. Finally the presenter wants every educated person must one person literate every year.

Millions of years ago from the time when Man occupied Mother Earth, he was curious to know about many things that surprised him – the wide world that he surrounded him; the dazzling light giver, the Sun; the round headed moon bright in the night sky; the sparkling stars; thousands and thousands of galaxies. He kept on searching for the truths. That journey brought him closer to exploring the space. He got to know of many things and the learning still continues....

Cyber Safety Tips for Students

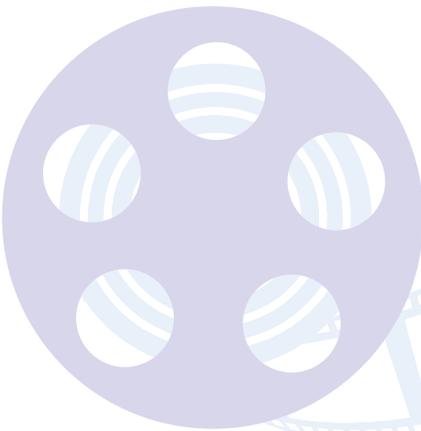

ASSI2

आज के समय में इंटरनेट ने आम जन तक अपनी पकड़ बना ली है । आज छात्र भी इंटरनेट के माध्यम से अपनी पढ़ाई में सहयोग ले रहे हैं, साथ ही नित्य प्रतिदिन के सामान्य कार्य भी इंटरनेट की सहायता से सरलता से कर रहे हैं । सरकार द्वारा मुद्रा के डिजिटल स्वरूप का ज्यादा से ज्यादा इस्तेमाल करने के प्रयासों से आज छात्र भी बैंकिंग जैसी सुविधाओं से जुड़ गए हैं । लेकिन आज सोशल मीडिया के माध्यम से कई तरह के हेकर्स भी सक्रिय हैं, जो बच्चों को अपना आसान शिकार मानते हुए उन्हें साइबर ठगी का निशाना बनाते हैं । बालक ज्यादा समझ नहीं होने के कारण, इनके आसानी से शिकार बन जाते हैं । इस ऑडियो के माध्यम से हम बच्चों को कुछ साइबर सेफ्टी टिप्स दे रहे हैं, जिससे वे कुछ सावधानियां रख सकें और साइबर ठगी के शिकार होने से बच सकें ।

निर्वासित
ASSTI

'निर्वासित' कहानी जीवन की ढलती संध्या में अपने बड़े बेटे के पास रह रहे वृद्ध दंपति की हृदयस्पर्शी एवं बेहद मार्मिक कहानी है। रिटायरमेंट के बाद वृद्ध दंपति खुशी-खुशी बुढ़ापे में अपने बेटे पोतों का सुख देखने के लिए हृदय में बहुत सी आशाएँ लिए हुए बेटे के घर चले जाते हैं। इस कहानी में यह वास्तविकता दर्शाई गई है कि वर्तमान में माता पिता बच्चों पर बोझ के अलावा कुछ नहीं होते। माता पिता किस प्रकार अपनी हर इच्छा को मारकर अपने बच्चों की इच्छाओं को पूरा करते हैं। बच्चों को इस बात की कोई परवाह नहीं है कि उनके माता-पिता अलग-अलग कैसे रह पाएंगे। बच्चों ने अपना फैसला सुना दिया कि माता-पिता अलग-अलग दोनों भाइयों के पास रहेंगे। इससे वृद्ध दंपति की अंतिम आशा भी टूट जाती है। बच्चे केवल अपना स्वार्थ देखते हैं। माता पिता अपने दो चार या 8 बच्चों को भी एक साथ पाल लेते हैं परंतु बच्चे केवल अपने माता एवं पिता का भार भी वहन नहीं कर पाते हैं। अपने कटाक्षों के द्वारा उनके हृदय को छलनी कर देते हैं। बाण बिद्ध क्रॉच युगल की बेहद ही मार्मिक कथा।

From Chaos to Classification

- A Radio Talk Show

ASST5

The Radio Talk Show ‘From Chaos to Classification’ is prepared to facilitate the study of Periodic Classification of Elements in Chemistry for the students of Senior Secondary Classes. It is based on ART Integrated Education, which is based on collaboration between teaching of Chemistry with performing art in the form of radio talk show. This integration of art and Chemistry makes learning interesting and joyful, moreover, students learn to have a greater appreciation and understanding of the art form utilized for teaching of Periodic Table in Chemistry. In the Radio Talk Show, the Modern Periodic Table is discussed. Information is given about Groups and Periods of the Modern Periodic Table. There is also a Quiz round where questions are put up to the audience. The question-answer format tells about various facts of the Periodic Table. The Radio Talk Show makes the teaching-learning process of the Periodic Table very interesting and innovative.

प्रिय बापू, आप अमर हैं

बापू मैं अपनी समाधि पर अकेला उदास हताश बैठा हूँ आज आपकी बहुत याद आ रही है। बापू आज आपकी पुण्यतिथि हैं..... मैं प्रातः काल के घोर कुंहा से के बीच आपसे बात कर रहा हूँ मुझे अपनी अस्थिर प्रतिमा से फडफडाने ओठों पर बुदबुदाहअ की भाब्द ध्वनि सुनाई पड रही ह। अच्छा मैं और आपके पास आता हूँ ठीक से से मैंने अपने कोना को सचेत कर लिया है। हां हां बापू जी अब बोलिये. ताकि मैं दुनिया को बता सकूँ कि आपने दे । को कहां पर देखा है। हां बापू पूछ रहें हो कि मेरा भारत कैसा है। अच्छा अपना भारत तो दुनिया में सभ्यता और संस्कृति का पाठ पढा रहा है। जैसा आपने उसे सिखाया था वैसे ही धर्मग्रंथ और संस्कृत मंत्रों का उच्चारण आज भी करता है। आपने मां की सुनाई हुई कहानी सत्यवती हरिश्चन्द्र के बारे में बताया था वो भी उसे अच्छी तरह याद है। और कठियावाड़ मे आपने माता पिता की सेवा से जो संस्कार दिया था आज भी उसका पालन करता है। आपने ही उसे सिखाया था कि दक्षिण अफ्रीका में लोगो के बीच मन में पीड़ा ,भुखमरी,गरीबी,लाचारी है। बस वैसे ही ये भी दुखी है। परंतु संतोशी, कर्मठ,धर्मगुरु,माटीपुत्र है। ईमान का रोटी वाला है। अब भी वो बहुत जुझारू है भोला भाला सीधा है। लेकिन उसका चेहरा तेजस्वी है। आंखो मे सपनों की चमक है। हां बापू कभी कभी उसकी अंतरात्मा आहत होती हैं लोगो ने उसके भोलेपन और सादगी को स्वार्थ में निचोड कर भोशण कर डाला है। बहु चीत्कार कर रो पडता है। फिर आपकी याद करते करते सुबकते हुये सो जाता है। उसे मालूम है। उसकी आत्मा कभी कलुशित नही हुई उसे अपने मुक्तिदाता पर पूरा भरोसा है। एक दिन उसे भी पीडित दे । की गुलाम अंतरात्मा की तरह स्वर्ग में मुक्ति प्राप्त होगी बापू आपको याद है ना वो चंपारण के किसानों से अंग्रेज सरकार जबरन गन्ना,कपास,नील की खेती करवा कर उन्हे अपना गुलाम बना रही थी। चंपारण वाले आज भी उस किसान आंदोलन को याद करते हैं। कहते हैं हम तो स्वाधीनता आंदोलन के गांधी सैनिक हैं.....

Juvenile's Heart

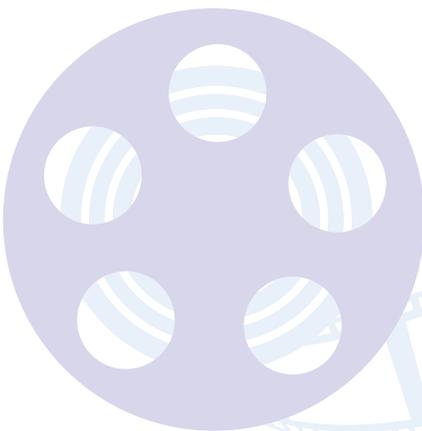

ASST7

This topic expresses the feelings of a juvenile after being punished. This is made to create awareness among students in Adolescence. They should know that the few incidents which are made for fun can turn into crime without their own knowledge. This audio specifies how a boy named Naveen committed a prank just for fun on his friend's request. But it turned out into a crime which was out of his knowledge. So, he expresses his feelings to a reporter who takes an interview of him. Finally, the adolescent is a stage where emotions are inter-related with each other. It is a time when we are not aware of the seriousness; everything seems to be liberal. The boy passes on the message through the interviewer that we should be able to control over the emotions in all situations.

Well said by Evo Morales “ Sooner or later, we will have to recognise that the earth has the right to live without pollution. What mankind must know is that human being can't live without mother earth but the planet can live without human.” Nowadays , all of us are very familiar with the world 'PLASTICS' as it is an integral part of our life. In the 1950s to 70s , only a small amount of plastic was produced, so plastic waste was relatively manageable. Around the world ,one million plastic drinking bottles are purchased every minute , while about 5 trillion single use plastic bags are used worldwide every year . Today we produce about 300 million tonnes of plastic waste every year. That's nearly equivalent to the weight of the entire human population . Only 9% of the total plastic waste ever produced has been recycled . About 12% has been incinerated, while the rest 79% has been accumulated in landfills , dumps or natural environment. A staggering 8 million tones of plastic ends up in the world's oceans every year .Some rivers alone carry more than 90% of the plastic waste that ends up in the oceans like:- Indus ,Nile, Megha.. By clogging serves & providing breeding grounds for mosquitoes and pests , plastic waste- especially plastic bags- can increase the transmission of vector borne disease like malaria. There are few ways to beat plastic pollution: a) Avoid plastic cutlery , cups etc., b) Teach children the harmful effects of plastic, c) Simply if you can't reuse it , then refuse it.

Plastic is used everywhere. It is easily available, cheap, lightweight and flexible which has increased its consumption. But it is non-biodegradable. The plastic amount is increasing day by day. Because of not proper handling and disposal of plastic, it is causing a number of life threatening diseases. It has results a new term: PLASTIC POLLUTION. It is found everywhere in the form of plastic dumped in landfills, in oceans, abandoned in nature which is poorly recycled too. Problems caused: release toxins in air on burning, threat to marine life, choking of drains and sewers. To beat the plastic pollution, we all should adopt the methodology of 5 Rs i.e., REFUSE, REDUCE, REUSE, RECYCLE and REMOVE. Refuse plastic items like straw, disposables. Reduce by using jute & cotton bags instead of plastic bags. Reuse by using discarded plastic for different purposes like as storage container. Recycle by using old useless plastic items like plastic chairs, tables for making some useful items. Remove by removing the plastic around our self, in any form. It is the time for all of us to come together and take necessary steps to stop this deadly Plastic Pollution and save the life and environment too.

Beat Plastic Pollution

AC9

Plastic pollution is a major problem that the world faces today, which could lead to disastrous consequences and a depletion of our natural resources, gradually leading to the demise of all living forms. The responsibility of cleaning our environment rests on us and we need to act quickly and sternly towards cleaning our community, streets, roads, water bodies etc. from plastic waste. People must be made aware of the hazards of plastic pollution and the danger that it poses to the environment as well as to our future generation. How plastic is a slow poison for our water bodies, soil, and air and to the environment. Tell them about the steps that could be taken to reduce plastic pollution like using alternative materials, shunning plastic bags, carrying your own water bottle etc. We need to slow the flow of plastic at its source, but we also need to improve the way we manage our plastic waste.

Our planet is only a tiny part of the vast cosmic tapestry, a starry fabric of worlds yet untold. Yet, at this moment here, we face a critical branch point in the history of humanity. It is well within our power to destroy our civilization or to design a better world for every inhabitant of this planet. Every thinking person fears pollution, yet every technological industrialist plans for it. Be it Starbucks or Costa Rica, or another MNC, they all use one plastic cup per person. Surely that is for the benefit of the customer, but what about the benefit of the earth. Our model “cupmate” is such an instrument that takes into account the needs & benefits of both customer & earth. Prepare to behold your Sights, For our model so Bright. A ship is always safe ashore, but it isn't once it goes into the sea, similarly a cup is harmless until it's used but that isn't when not used for anymore, it's made to be used and we want it to be reused. Each day millions of cups are used for only coffee, our cupmate can recycle each cup to function about 300 times longer thus I think that any person is capable enough to discern the benefits of our project. Our project is specially designed; it's a simple holder for used cups. When the cup is kept on the utensil, a process starts that uses minimal resources & energy to re-create about 100 cups in every course of 10 minutes, it balances their pH, rotten odour, makes them gluten free, refines their shapes and removes filthy bacteria. Hence, NO MALICE FOR CALICE (this word doesn't seem right.)

Beating Plastic Pollution

ACT1

The theme "BEAT PLASTIC POLLUTION" urges government, industries, communities and individuals to come together and explore sustainable alternatives. It also urges this target group to reduce their production and excessive use of single use plastic. Plastics are organic polymers of high molecular mass and often contains other substances .Due to their low cost ,ease of manufacture ,versatility ,non-corrosiveness and imperviousness to water, plasticare use for multipurpose at different scales . The critical impacts of plastics are that plastics has become an indispensable material in modern society .In 2015 scientists said that "of the nearly 7 billion tonnes of plastic waste generated ,only 9% recycled ,12% incinerated, and 79% accumulated in landfills or the environment". Researches exploring the arctic have found a very high level of micro plastics trapped in the ice . In reality ,we can not eliminate plastic use from our day to day activities . However, we should not allow plastic to reach the soil and water. The govt. should restrict plastic production and encourage recycling through appropriate policies . We should act as responsible citizens with our determination towards maintaining clean our surroundings. Every shopkeeper should go in for a biodegradable encourage the use of bio – degradable packing of materials while shoppers should use cloth bags. We cannot transform our world into a "PLASTIC THEORY" . What is needed is collective public effort to stop plastic pollution and safe guard our ecosystem.

Beating Plastic Pollution

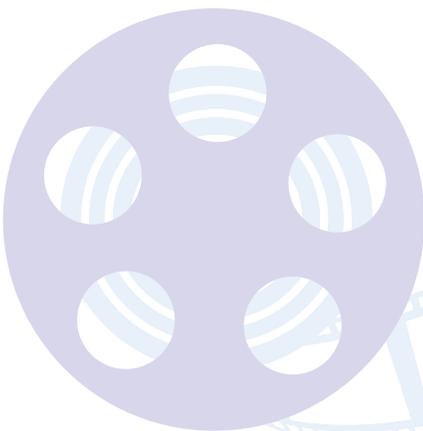

ACT3

The programme deal with the following themes: What is plastic? The world plastic derived from the Greek (plastikos) meaning capable of being shaped or moulded. Plastic are organic polymers of high molecular mass & often contain other substances. They are usually synthetic, mainly derived from petrochemicals. Plastic is everywhere, in our home, school work, playground, parks, & beaches. "plastic does not biodegrade. Why do we use so much of plastic products? Why should we avoid using plastics? Plastic is a very harmful product that produces harmful gases.

The programme is a poem recitation.

घर-घर भाहर- ाहर, डगर-डगर हम कहर-कहर
खेतो के हम जहर-जहर, अरे गंदे पानी ठहर-ठहर
बच्चे बूढ़े और जवान, सब घायल हो जाओगे मिटा
देंगे हम तुम्हें तुम हमें मिटा न पाओगे!!

ना सड़ते ना गलते हम तुमसे ज्यादा चलते हम
जलकर भी ना जलते हम का लिख बना भी उड़ते हम
घुस जाएंगे छाती में, रोक ना हमको पाओगे
मिटा देंगे हम तुम्हे, तुम हमें मिटा ना पाओगे!!

देख प्लास्टिक खड़ा हुआ है जिद पर अपनी अड़ा हुआ है
हर कोने में पड़ा हुआ है सिर पर तेरे चढ़ा हुआ है।
उतार सको तो उतार दो पता है तुम ना कर पाओगे
मिटा देगें हम तुम्हें, तुम हमें मिटा न पाओगें।

प्लास्टिक है हम सबके लिए घातक यह है देश के लिए विनाशक
आओ मिलकर वचन ले, प्लास्टिक को मारना है और वातावरण को स्वच्छा बनाना है।

Beat Plastic Pollution

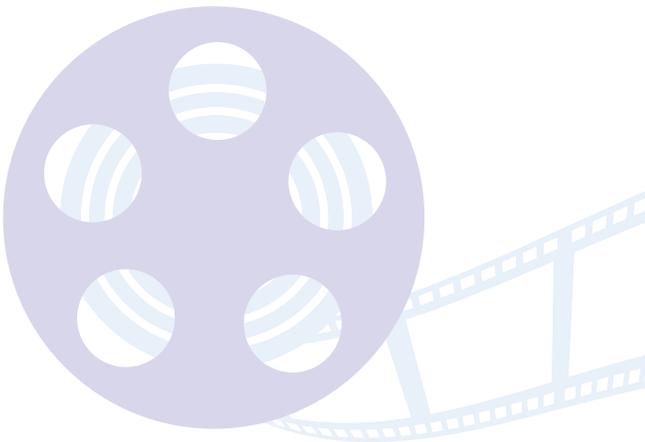

AC19

One of the most deadly things on earth is plastic. Because of it millions of people die every day on our land, water bodies get polluted. Every day many animals die because of it. To prevent plastic pollution we have many ways like not to use plastic bags and only jute bags, cloth bag or any eco-friendly bag. We should treat the waste water. Avoid the food which is packed in plastic packages, by recycling plastic and don't throw plastic in oceans.

**18****Beat Plastic Pollution**

AC21

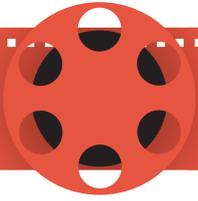

As you all know that our school has taken the responsibility to be a part of this cleanliness drive and is trying to raise the consciousness of people so that we all can come forward for this campaign and make it a huge success. However, this is not enough because I feel that there still exists one major source of pollution in our surroundings and unless we do away with it, our mission will remain unaccomplished. And, that is plastic pollution! From over 50 years, both manufacture & consumption of plastics are on a constant rise globally despite our government putting a ban on their use and more so because the world's population is relentlessly growing; the amount of garbage too is growing. Even though in our day to day lives, we preferably use disposable products like water bottles and soda cans; the build up of such products has resulted in the increase of plastic pollution. To put it in simple terms, plastic pollution is caused when it is strewn everywhere on the roads, lanes, dumped into the rivers, etc. So I earnestly request everyone to completely shun the use of plastic bags and switch to paper or cloth bags even while going on a shopping. So let's come together and pledge to protect our natural environment at all costs because if we don't then no one else will and our next generation will have to bear the brunt. The sooner the better.

AC26

The audio presentation is an autobiographical account, wherein Plastic, the central character, recounts its origin and man's relentless fight against pollution. The presentation shares information on chemical composition of plastic, the process involved in its production and its multiple uses. It goes on to highlight the pollution, adverse effects on human body and climate change that indiscriminate use of plastic has resulted in. The presentation envisages of a society, free of plastic of all kinds and the human initiatives that shall aid in realizing it. The need of the hour is our persistent efforts to become completely free ourselves from the over indulgence & dependence on plastic and adopt on war footing revolutionary approaches towards a greener planet.

Plastic is very harmful to our life and our environment also. It helps in many ways but it harms more. If we dig the plastic inside the soil, the plants and trees will be affected. Then we cannot breath fresh air. From the morning to the night we are seeing plastic everywhere. Some plastics are there which can be reused. That process is called recycling through plastic, we can make many things and we can decorate our houses and classes etc. If we dump plastic inside the soil which was fertilized by humans, then the micro-organisms will be affected. The micro-organisms which convert the dead plants and animals to humans are known as decomposers. These micro-organisms play an important role in the forests. And the animals, who are living under the soil, are also affected. In the year 2016, the Government of India has initiated a new mission known as "Swachh Bharat".

A warm good morning to all my loving listeners , myself Pranit Nath, a student of KV Masimpur, Silchar, Assam . It's a great opportunity that I got a chance to share my opinions on a very important but unfortunately ignored topic that is Plastic Pollution let me start with a short detail about current situation of management of plastic in our world, every single person in India use products made in China and we all know goods made in China are mostly of plastic that's the reason why China is with number 1 position in producing waste plastic and in this situation I feel proud of my India because we are on 20th position but that's not enough .We should not be in the list of producing waste plastic. Now let us talk about some easiest way to control the use of plastic that is to use paper . We all know paper is a nature friendly thing, so in place of plastic bags we can use paper bags. We all know that there are a lot of factories that recycle plastic and reuse it so we can also give our used plastic to them that will also benefit you , maybe you can get some amount for your donation. Now let us be practical, how many of my listeners literally think before using plastic that it is harmful for our environment . No one ! According to me people don't even care about this, they just show that they care about this, but in reality they are also using it. I am also sharing my opinion on beat plastic pollution but I am also using it in my daily life. I know that a complete ban on the use of plastic is impossible but we can control the usage of it. So, I will not take much time for my listeners to just end up my words with a humble request that if you are here and listening to me than from now onwards you have to less the usage of plastic. So, I wish that my loving listeners will show respect to my words and follow that in their life. So , I end my words , thank you for listening to me, have a great day.

**34****Beat the Plastic Pollution - Song**

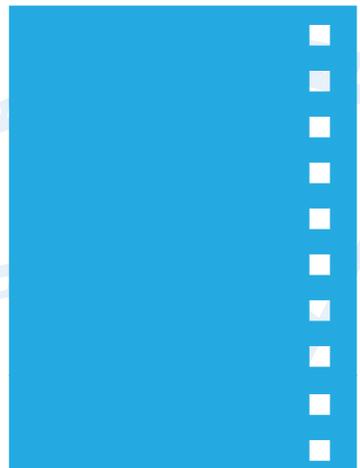

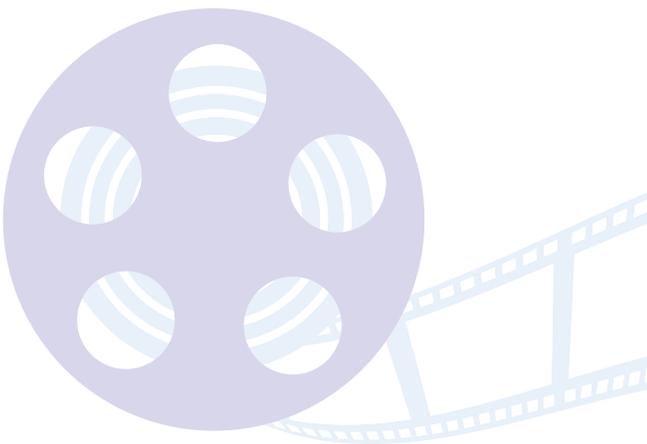

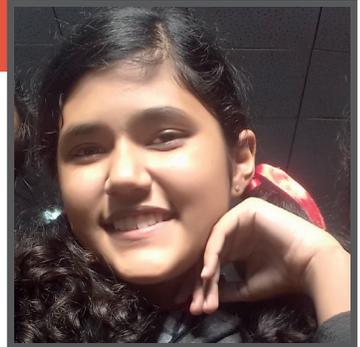

AC40

It is a musical piece of work in Audio format (mp3) composed and sung by Vedansha Singhal of class X of Kendriya Vidyalaya No.3 Agra Cantt. for making awareness of plastic pollution among the people. In this song, the background music has been taken from a Spanish song "No Tengo Miedo De Amar" as a Karaoke. The Software used for editing the background music is Audacity. This song tells about the pollution which is mainly created by the use of single use plastic in the form of plastic bottles plastic carry bags etc. since plastics are cheap, versatile and strong, it is used magnificently without knowing its harmful effects on our environment. Plastic pollution is emerging as a big threat to our ecosystem. We need to find a solution by stopping using it and propagating awareness about its hazards. So, this song will be a finest method to reach around the world.

प्लास्टिक प्रदूषण आज के समय की सबसे बड़ी समस्या है इस समस्या का समाधान तभी संभव है जब हम जागरूक बनेंगे और अपने दैनिक दिनचर्या में प्लास्टिक के उपयोग को कम करना प्रारंभ करेंगे। किसी भी बदलाव का प्रारंभ एक व्यक्ति से ही शुरू होता है अगर आज हम शपथ ले कि प्लास्टिक का उपयोग बिल्कुल बंद कर देंगे तो वह समय दूर नहीं जब पूरा विश्व प्लास्टिक मुक्त हो जाएगा। इसलिए खुद जागरूक बने और अपने आसपास के लोगों को भी जागरूक करें ताकि स्वच्छ भारत का सपना साकार हो सके और हम प्लास्टिक के दुष्परिणामों से बच सकें। अगर हम ऐसे ही लापरवाही बने रहे तो आने वाला समय और आने वाली पीढ़ियाँ हमारी इन गलतियों के लिए हमें कभी माफ नहीं करेगी।

The most important thing currently is to create awareness among people and we have found that through the means of paper and social media which has now become the most common and available means for mass media. We agree that plastic has really become our necessity but we should also know how to put a limit to it. The pollution caused by plastic does not only affect us but also all living organisms. Not only the government is responsible for the pollution caused and also the damages & diseases caused and spread by it. We should take steps from now on or else we'll be inviting our own doom. We not only are putting ourselves prone to danger but also are dragging other life forms. To influence the young minds, we could secretly replace the programs they watch on the media or on the T.V by with those which promotes the use of dustbin so that would influence their minds and could also teach the future generations to follow the same guidelines provided. In the end we just want to say that we are the only one to save our future, it's in our hands to change our destiny/fate.

Beat Plastic Pollution

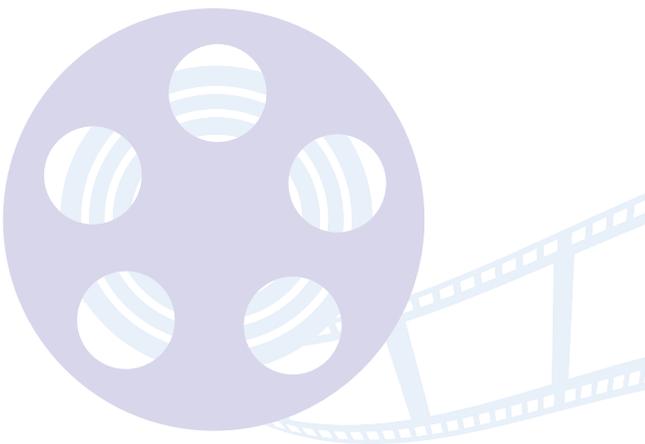

AC46

Today plastic is found everywhere. People are using it endlessly just for comfort. Why So? I think main reason is plastic is very cheap, long life and easy to use. It is available in different forms. Incessant manufacturing & indiscriminate use has made plastic omnipresent. However, no one realises how it is harming our planet. The haphazard use of plastic has resulted in the dumping of tons of plastic waste into our landfills & oceans. According to a study, millions of tons of plastic is being produced worldwide, of which only 20% gets recycled/incinerated. The biggest challenge is how to beat plastic pollution. I think the best way to face the challenge is work with 3-D's i.e. DETERMINATION, Dedication & DISCIPLINE. We should DETERMINE to beat plastic, work with DEDICATION and be in DISCIPLINE. The responsibility of cleaning our environment rests on us. We need to act quickly & sternly towards cleaning our planet from plastic waste.

While plastic has many valuable uses, we have become addicted to single-use or disposable plastic — with severe environmental consequences. Around the world, one million plastic drinking bottles are purchased every minute, while up to 5 trillion single-use plastic bags are used worldwide every year. In total, half of all plastic produced is designed to be used only once — and then thrown away. Plastic waste is now so ubiquitous in the natural environment that scientists have even suggested it could serve as a geological indicator of the Anthropocene era.

**40**

Beat Plastic Pollution

AC48

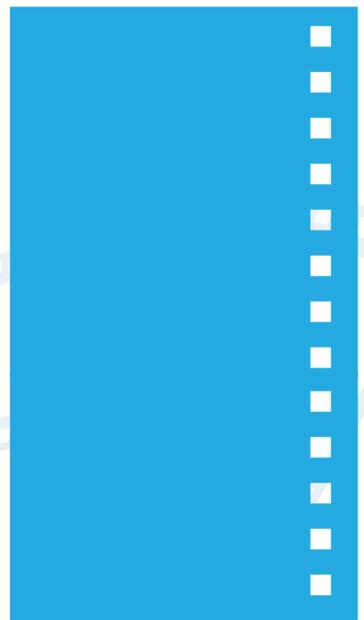

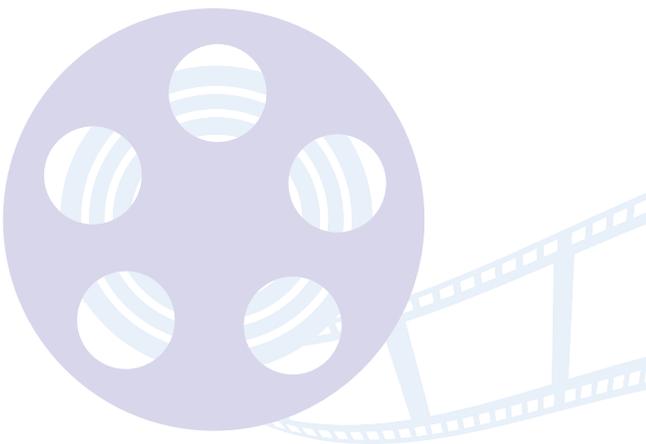

Plastic pollution has become one of the most pressing environmental issues, as rapidly increasing production of disposable plastic products overwhelms the world's ability to deal with them. Plastic pollution is most visible in developing Asian and African nations, where garbage collection systems are often inefficient or nonexistent. But the developed world, especially in countries with low recycling rates, also has trouble properly collecting discarded plastics. Plastic trash has become so ubiquitous it has prompted efforts to write a global treaty negotiated by the United Nations. The solution is to prevent plastic waste from entering rivers and seas in the first place, many scientists and conservationists—including the National Geographic Society—say. This could be accomplished with improved waste management systems and recycling, better product design that takes into account the short life of disposable packaging, and reduction in manufacturing of unnecessary single-use plastics.

WASH App

IPPI2

This WASH (water, sanitation and hygiene) App is developed by SARD with the financial support of WaterAid India to disseminate information, by teachers to instill best practices of WASH, among children and their families. The need for WASH App stemmed from the fact that Children dropped or were truant to school due to health issues, which was tracked to unhygienic practices lacking precaution to a healthy lifestyle, leading to poor health and hygiene. SARD's wider outreach in schools, meaningful partnership with WATER AID and promotion of healthy practices through WASH activities formed the basis for this mobile phone application, to effectively address the issue of unhealthy behaviors. The mobile application shall provide a sustainable impact and take the practices of WASH beyond classrooms and reach the families/homes to create a society conscious of health and hygienic practices. This application was field-tested with course corrections based on practical feedback to ensure the relevance of content and its wider acceptance and manifold outreach. School children of classes Nursery to class V standard shall be the primary audience, through them it shall reach family members. Teachers act as a conduit by using this as part of their classroom process.

To familiarize grade 4-5 children towards the concept of fraction, by constructing sequential knowledge and reduce misconception using visual medium in an interactive mode and variety of examples. Majority of Children of Grade 4 & 5 passing out from Government schools were observed to be weak in fractions and lacked conceptual clarity, this led to poor understanding of further mathematical concepts in higher classes. The “Fraction e -content” is advancing in this direction to ensure clarity among children and sustain interest and understanding on a complex concept for that age group. Providing an interactive format to the concept of fraction essentially has been inspired with a perception that digital interactive interface are easily accessible among children and finds easy acceptance. The applications address sub-concepts but also provide a visual explanation so that a student can learn the important aspects with no further conceptual gaps. The entire modules also consist of fun interactive puzzles and games and it has been seen that students develop interest with such platforms and day to day examples. The application also ensures the understanding of students evolved throughout the learning of concept with interactive assessment and reassures that the student completes the exercises with clarity and understanding. This will be come a visual tool for students to learn the concepts through interactive. This will also increase the capacities of the teachers in effectively using e-content and technology to improve the performance of their school and children. Additionally, it is assumed that people with hearing impairment greatly benefitted from such content.

'ShekhiBaaz Makkhi'

IPPI4

To promote listening, comprehending, reading and writing skills among grade-3 of, NCERT Rimjhim Text Book, children through a graphic illustrative video displaying the same language subtitle, with an aim to increase language (Hindi) proficiency levels. Children in early grades often have difficulties in comprehending, reading and writing. This video is unique in nature because of graphics animation, which is the best option available for children to develop their reading habits while improving their skills in comprehension. A simple storyline and catchy portrayal of different characters with a 'House Fly' as a protagonist, instantly elicit the attention of children with different voice modulations matching the animal characters in the play. Children get attracted and start learning instantly the phrases used by distinct characters, which only gets reinforced with the same language text scrolling down as subtitles. The combination of sound and illustrative visuals makes learning fast, allows retention of the learning & its application in daily contexts. Similarly, the scrolling text also enables children to comprehend and read much faster than the conventional reading of books. This storyline is a reproduction of Class 3 prose from Rhimjhim Hindi Text Book of (NCERT).

To improve upon reciting, reading and comprehending skills through rhythmic recital to enhance memorizing and emphasizing voice modulation. The Animated video is developed primarily to benefit students from grade IV. This video is unique in nature because of graphics animation, which is the best option available for children to develop their reading habits while improving their skills in comprehension. The areas of skill improvement addressed in this poem animation focus on listening abilities and to ensure co-relation to content read, listening and gaps experienced in writing. The classroom situation has been a contrast without links with what they listen and read, so care has been given in this video with animation to ensure children learn, read and write what they see and are made to co-relate with things they recite. "Koi Lake Mujhe De" content is taken from Class 4, Rimjhim Hindi Textbook (NCERT). Every word gets highlighted with voice and the students can repeat and read the text accordingly. In this manner students will be able to relate the word with its sound. It helps the students to practice correct pronunciation. The subtitles of characters appearing on screen improve the curiosity of children with a strong desire to read and understand the words. The animation has characters expand their imagination for better understanding and retention of content taught.

Mera Digital Khilona (मेरा डिजिटल खिलौना) IPPI6

पुराने समय की यदि हम बात करते हैं तो प्राथमिक विद्यालयों में पहली कक्षा के विद्यार्थियों को प्रतिदिन उपयोग में आने वाले फल एवं सब्जी, घर आंगन में उगे हुये विभिन्न प्रकार के पौधे, आस-पास विचरण करते हुए विभिन्न पशु-पक्षी एवं अन्य वस्तुओं को दिखा कर बच्चों को उनसे परिचित करवाते थे और इन सब के पहचान की सहायता से अक्षर ज्ञान करवाया करते थे। उदाहरण के लिए अनार खाने के काम आने के कारण उसे "अ" से "अनार" याद हो जाता है और प्रतिदिन सड़क पर आने-जाने से "स" से "सड़क" याद हो जाता है। आज हम टेलीविजन, सिनेमा, कम्प्यूटर, प्रोजेक्टर के माध्यम से भी बच्चों को सिखाने लगे हैं। किन्तु वर्तमान समय मोबाइल युक्तियों का है। इसी तथ्य को ध्यान में रखते हुए मैंने इस मोबाइल एप को तैयार किया है। अंग्रेजी भाषा में इस तरह के एप उपलब्ध हो सकते हैं किन्तु हिन्दी भाषा में ऐसे एप अभी बहुत कम हैं। इसी बात को ध्यान में रखते हुये यह मोबाइल एप हिन्दी भाषा में बनाया गया है ताकि हिन्दी भाषी विद्यार्थी भी इस आधुनिक तकनीक का उपयोग कर मनोरंजक तरीके से सीख सकें। इस क्रम में विद्यार्थियों को शीघ्रता तथा मनोरंजक तरीके से सिखाने के लिए इस मोबाइल एप को डिजाइन किया गया है, जो गूगल प्ले स्टोर पर उपलब्ध है। पहले बच्चों को फोटो दिखा कर उनकी पहचान करवा कर अक्षर का ज्ञान करवाया जाता है। अक्षर ज्ञान होने के बाद अक्षरों से शब्द बनाना सिखाया जाता है। शब्द का उच्चारण कर अभ्यास भी करवाया जाता है। इस मोबाइल एप की सबसे बड़ी विशेषता यह है कि यह किसी भी प्रकार से उपयोगकर्ता की मोबाइल उपकरण के सम्बन्ध में कोई भी जानकारी एक्सेस नहीं करता। इस मोबाइल का उद्देश्य विशुद्ध शैक्षिक जानकारी देना है। इस एप की एक विशेषता यह भी कि इसमें गुगल हिन्दी ऑडियो का उपयोग किया गया है, जिससे विद्यार्थी के हिन्दी शब्द के उच्चारण में भी सुधार होगा। यदि शब्द का सही उच्चारण नहीं होगा तो शब्द का अर्थ ही बदल जाता है।

English is a global language. It is the medium of communication among people in different countries. So it is necessary to acquire globally accepted and understandable pronunciation and accent of English. Listening to English, reading aloud and speaking is the only way to acquire these skills. This New media / ICT Interactive resource titled 'The Magic Ring: An Interactive Story' will help children of the age level 5-10 to practice listening, speaking and loud reading skills in an interactive and interesting way. This interactive resource gives chances to listen to a story part by part. There is the technique to test their listening ability which helps them to assess themselves without any external help. This program gives them an opportunity to record their reading and speaking and Replay and Save their recording. Listening to one's own recording is the best way for self-correction. When they listen to their own recording they can assess their pronunciation and accent with the audio provided in the file. This program allows them to listen to and record at the same time. It provides the children with an opportunity to imbibe sentence structure using another type of interactive files. The program will also help them to develop imagination and a taste for stories and reading. This interactive program is originally aimed at the 3rd standard students of Kerala State syllabus. The story narrated and the images used in the program are taken from the English Text Book of standard III of Kerala State syllabus.

Learn Tamil Easy

IPPT7

It is an interactive Tamil learning H5P application. Learn Tamil in a very effective way and interactive manner. This improves our memory skills and improves concentration. Touch the letter card and find the same card from the given cards. While you touch the card the name of the letter in the card is pronounced i.e the actual sound of the letter. Students are eager to learn language by playing this game. It also is more effective and improving students' individual skills in academic and personal evaluation. This application is also very useful to the students of other regions in learning the letters of the language, and practice the language easily. This application is installed by people all over Tamilnadu to improve the Tamil language skills among the slow learners in schools and also useful for our kids.

Safety of a child

IPPT9

Every human being is happy during his/her childhood stage. We can say that “today’s” children are the pillars of the future. But currently, the children are facing many problems in society both physically and mentally, no matter if it is a female child or male child. Due to sexual abuse, child gets affected, physically, mentally and also emotionally. To keep a full stop for this sexual abuse the doctor advises that it is a primary duty of the parents is to give some knowledge about sexual abuse and it is the primary duty of a mother to make the children understand and recognize the different types of touches [i,e] what is a good touch and what is a bad touch or a touch with a malign intent. A good touch is just like a mother’s love and affection. The children should know that the bad touch results in painful action [i,e] hurting, beating and injuring. We should be alert to spend time with the children to share with the children about their daily habits, the people they met etc. If we find something is going wrong we should not get nervous instead we should handle the problem diligently. The parents should insist on the ways children can safe guard themselves from all dangers. So Child protection is the protection of children from violence, exploitation, abuse and neglect. Physical and mental development is needed to lead a healthy life and to grow with a distinct personality.

All living things require clean water for survival and rivers are an important source. But unfortunately, human activities tend to add waste material to water that makes water unfit for use or pollutes the water. Polluted or dirty rivers or water bodies also affect the lives of plants and animals to the point of making them unhealthy. So, the need of the hour is to provide for a sustainable, clean water ecosystem. This can be achieved by sensitizing our young students, who are our nation builders to the issue through simple simulations. So we have created a simple game in scratch which models a river with pollutants in it. The simulator prompts the player to clean the river free of pollutants consisting mainly of waste plastic items such as festival decorations (which is a common practice in India), plastic bags, leftover food items etc. The game/simulator consists of two stages with points for each stage. In the end when a requisite number of points are earned, the player gets a congratulatory message. This small activity can help sensitize young students from a very early age to keep the rivers and other water bodies clean. This also helps them understand the hazards of plastic pollution. I intend to add more stages to the game wherein, the plastic waste can be used to make structures like school buildings.

FunBola - Tambola based gamified learning: Factors and Multiples

IPPT11

Gamification in eLearning is an effective technique to engage and capture learners' attention along with entertainment. The success of gamification in eLearning is driven by the power of the concept that it is based on the theme of the game which challenges, engages, teaches and entertains the learner. The gamification mode of learning increases creative thinking, learning engagement and long-term learning. Keeping this concept in mind a game simulating Tambola game is created in which random questions are generated whose answer is a number. This game can be played in a classroom with Tambola tickets and calculation based questions can be stored in text files in sequential order of 1 to 99 number. Current project demonstrates the questions based on Factors and Multiples. (Question and answer files can be stored in the folder with different names as the code is capable of playing with any text file). The program asks for the sign-in /sign up process to authenticate the user. After signing in it shows the instructions (for details, see the script file). This game is equally enjoyable as tambola game, only the difference is it provides knowledge and enhances the computational skills of the learner. FunBola is developed with Python 3.7.32 and Tkinter package to provide GUI based application. This game can be played with any class, any subject with a set of 99 questions in a text file. Gamification provides an effective, informal learning environment, & helps learners practice real-life situations and challenges in a safe environment. This leads to a more engaged learning experience that facilitates better knowledge retention.

As a country with strong Mathematical traditions and with the brightest mathematical minds the world is expecting more from India. But somewhere we are lagged behind in producing more brilliant minds due to some learning gaps that occur at the elementary level. Learning difficulty in Mathematics appears in students from lower primary stages when they start learning numbers and encounter odd numbers and even numbers. To overcome this challenge The Game "Catch It" is developed with an objective to attract the attention and interest of the students of primary school in a joyful and playful way so that they can easily identify and differentiate between Odd and Even Numbers. In addition to that, the students will get a new media to learn mathematics without getting bored and they will learn while playing without knowing that actually, they are learning. ICT in education is a very effective way of transacting a class. It makes learning very interesting to 21st century learners. Teachers can also take advantage of this game because it has the scope to evaluate a learner in a particular area of number learning. It is not simply a game, it's a self-learning material, and an evaluation tool also. It also helps to develop skills like Self-confidence, problem-solving, IT skills, Time management etc.

The Happiness App

IPPT13

Social and emotional abilities are said to be indicators of how well a person adjusts to his or her environment, adapts to change and, ultimately, how successful she or he will be in life. Happiness, Empathy, Emotional stability, and a positive attitude are some traits that can help a child to grow up to be a responsible and sensitive human being. We as educators need to help imbibe these skills in a student. Keeping all this in mind and inspired by the “Happiness curriculum” introduced by the DOE in state - run schools and also to make it easy for educators to adopt socioemotional learning skills as a pedagogy, I have created the “Happiness App”. This is a small step towards achieving the goals of SEL in education. The app is divided into sections. There are tips for a happy classroom, happy teacher tips, happiness surveys and happiness tools which can be used to enable a teacher to inculcate a habit of happiness in students. There are two surveys, one for the teacher and the other for the student with a complete analysis of the results. The app is available on the Google PlayStore with the name “the Happiness App”

Maths is always abstract to the students. Students learn multiplication for the first time in school. So they feel multiplication would be very complicated. In order to reduce stress, I introduced this H5P interactive multiplication tool and I tried it with my school students. It gives much knowledge about multiplication and a better understanding of the students. Students enjoy a lot while learning through this tool. It is better to teach basic concepts of mathematics in this way.

The "CURSIVE WRITING PRACTICE" Android application is developed for primary grade children so as to improve their handwriting in English Language. The app gives practice in writing all the 26 letters from a to z in cursive script. Children could also learn the sound of each alphabet. The app contains 27 slides. The first slide contains the main menu with all the alphabets. When the children touch the alphabet it moves on to that particular slide which contains that particular alphabet. From slides 2 – 27 each alphabet is given in every slide. The app provides a PREVIEW OF THE HOW TO WRITE the cursive pattern in the top half and the bottom half contains a WRITING CANVAS with the image of the alphabet so that the children can trace the cursive pattern as shown in the top half. There is an extra option given in this cursive writing practice app i.e. if we SHAKE OUR MOBILE in the slide of any alphabet, we can HEAR THE SOUND of that particular alphabet.

Share and care, animation film explains the story of four chicks. One among the chick is blind. When the grain is thrown to them, all, except the blind chick peeks the grain. The blind chick stumbles and falls down. Mother hen watches this and she observes the sad condition of the blind chick. Mother hen calls all the chicks, except the blind one. Mother hen asks the small chicks whether they have noticed the condition of the blind chick. When they say no, mother hen asks them how we can help the blind chick. Small chicks answer that they will eat only after the blind chick eats. Mother hen teaches human quality , sympathy through this story. Story of the chicks and the other short stories are depicted in such a way that students can learn English language using ICT methods. New words are introduced to the children through this animation film. Various language learning activities are introduced in this film. Digital media allows students to self-pace their learning to further deepen their understanding of a topic, and delivered in a medium that engages them with the content on a platform that they are familiar with.

Yadein Bapu Gandhi Ki - यादें बापू गांधी की IUPG3

This program is specifically produced with the purpose to highlight the moral values of Bapu Gandhi on which he lived throughout this life. This programme recalls some of the heart touching memories of Sh.Hamidullah Afsar, one of the freedom fighters who spent some precious moments of his life with Gandhiji in person. The main menu of this 'New Media audio Package' facilitates children\listeners to navigate through different areas of the life of the Mahatma in an interactive manner. The areas can thus be navigated through 5 different buttons provided in the package. The buttons are :

1. Bapu Ki Kahaniyan - Contains 3 stories based on real incidents.
2. Gandhi Smriti Aur Swadhinta Ki Sargam - Contains songs sung during the freedom struggle by masses in public functions.
3. Champaran Mein Gandhi ji Ka Aagman - Contains historical information about the advent of Gandhi Ji in the freedom struggle of India. After coming from South Africa, it was his first and successful experiment of non-violence movement of Satyagraha In India. It was used as the most effective and great TOOL TO GET FREEDOM, which later inspired the world.
4. Bapu Camere Ki Nazar Se - Contains some of the photographs showing Gandhiji in different moods and gestures
5. Anmol Wachan -
 - A. Contains quotations by Gandhi Ji Himself
 - B. Contains quotations by the great world personalities.

"Monuments of the Ahom Period" is an interactive content developed in H5P. The theme of the content is on some important historical monuments of Assam constructed during the Ahom period. The idea is that students of Primary school will appreciate the social and aesthetic values of these monuments to preserve our own heritage and develop a sense of respect for the monuments of the past. The H5P format used for the content is the Course Presentation consisting of 12 slides including audio, video and text contents. Interactives like multiple choice questions, drag and drop, true/false etc. are embedded with the content so that attention of the students of primary standard can be ensured while watching the content, a joyful learning through games can be experienced by them and learning outcomes can also be ensured after watching the content. Audio, video and text are used in the content so that students with visual impairment or hearing impairment can also be benefited.

From Trade to Territory: Advent of British East India Company

IUPG5

This Video is based on NCERT Class VIII History Textbook, OUR PASTS III. PART I. It is about how the British came to India as a trading company and subsequently established their control all over the subcontinent. The video refers to the major kingdoms emerged in India before the establishment of Mughal Empire and their territorial coverage, the Decline of the Mughal Empire and emergence of regional kingdoms and also coming of different European trading companies to India for trade. This Video is helpful for the Children of Class VIII Students develop an understanding about the political and economic scenario that led to the establishment of British power in India.

इंटरैक्टिव फिलप पुस्तक

पढ़ने पढ़ाने की प्रक्रिया के दौरान हम सब का सामना मुख्यतः चार प्रकार की प्रकृति वाली विषय वस्तु से होता है—

1. तथ्यगत (Factual)
2. अवधारणात्मक (Conceptual)
3. प्रक्रियात्मक (Procedural)
4. अनुभूतिगत (Meta cognitive)

विषय वस्तु की प्रकृति के अनुसार पाठ्यपुस्तकों में बहुत से तथ्य, अवधारणाएं, प्रक्रियाओं और अनुभूतिगत प्रसंग होते हैं जो अमूर्त (abstract) होते हैं तथा जिन्हें बिना मूर्त प्रत्यक्षीकरण (concrete visualization) के छात्रों के लिए समझना और शिक्षकों के लिए समझना पाना कठिन होता है। सामान्यतः आई. सी. टी. के प्रयोग में माहिर शिक्षक ऐसी अवधारणाओं को डिजिटल कंटेंट का प्रयोग करके समझाने की कोशिश करते हैं पर यदि यही डिजिटल कंटेंट, ऑडियो, वीडियो एवं लर्निंग आउटकम आधारित इंटरैक्टिव आकलन के रूप में पाठ्य पुस्तक में ही मिल जाये तो शिक्षकों और छात्रों को विषय को समझने समझाने में अधिक आसानी होगी और विषयवस्तु को सीखना और समझना मनोरंजक रूप से ग्राह्य हो जायेगा। इसी बात को ध्यान में रखते हुए Html based “Flip PDF Professional” सॉफ्टवेयर का प्रयोग कर यह इंटरैक्टिव फिलप बुक तैयार की गयी है। जूरी के समक्ष इस पुस्तक का तीसरा अध्याय प्रस्तुत है जिसमें यथास्थान ऑडियो, वीडियो और H5P कंटेंट का प्रयोग करते हुए पुस्तक को अधिक एंगेजिंग एवं ग्राह्य बनाया गया है। पुस्तक एवं कविताओं के लेखन में तो निर्माता की भागीदारी रही ही है इसमें प्रयुक्त एनीमेशन एवं H5P कंटेंट का प्रयोग करते हुए पुस्तक को अधिक एंगेजिंग एवं ग्राह्य बनाया गया है – पुस्तक एवं कविताओं के लेखन में तो निर्माता की भागीदारी रही ही है इसमें प्रयुक्त एनीमेशन एवं H5P कंटेंट का निर्माण भी निर्माता के निर्देशन में हुआ है।

Virtual Tour of Rajghat (Gandhi Smadhi) IUPII

1

Rajghat is a world renowned place in Delhi, India. It is also known as Smadhi Sathal of Mahatma Gandhi. The virtual tour of Rajghat was developed by using sophisticated technologies like VR cameras which provide an immersive view of the area. The tour can be viewed on TV, Laptop and mobile by using a Virtual Reality box. VR technology is futuristic technology and currently used as a commercial. This Virtual Tour is an attempt to use VR technology in Education within the area of New Media. While watching this VR tour, the viewer has to see around by using a VR Box.

Museum Tour via VR (Virtual Reality): Interactive H5P E-Content IUPI2

आज शिक्षण कार्य में आईसीटी का महत्त्व बहुत बढ़ गया है। आज की पीढ़ी पहले से ज्यादा तकनीकी को महत्त्व देती है। अब शिक्षा केवल किताबों तक सीमित नहीं है, छात्र नवीन तकनीकी से भी ज्ञान अर्जित करते हैं। इन तथ्यों को ध्यान में रखते हुए हमने VR ई – कंटेंट विकसित किये हैं जिन्हें आपन सोर्स वेबसाइट पर प्रकाशित भी किया है। पहले से बने विडियो में केवल वही दिखाई देता है जो रिकॉर्ड है, लेकिन वर्चुअल रियलिटी की सहायता से हम किसी भी स्थान/वस्तु को अपने हिसाब से चाहे जिस तरीके से देख सकते हैं। इसमें हमें उसी स्थान पर होने का भ्रम होता है। इस कंटेंट को वेबसाइट, कंप्यूटर या मोबाइल की सहायता से देखा जा सकता है। मोबाइल में देखने के लिए सर्वाधिक उपयुक्त वीआर बॉक्स होता है, जिसमें मोबाइल लगाने के बाद हम खुद को उसी जगह पर खड़ा महसूस करते हैं जिस जगह का कंटेंट हम देख रहे हैं। इस कार्यक्रम में हम संग्रहालय का वर्चुअल टूर करने जा रहे हैं, जिसमें हम छात्र को बिना संग्रहालय ले जाये वहां की सभी गैलरी दिखाए जा रहे हैं। छात्र जैसे ही एक गैलरी में जायेगा, उसे दूसरी गैलरी में जाने का बटन मिल जायेगा, उस पर क्लिक करने पर छात्र अगली गैलरी में चला जायेगा तथा पुरे संग्रहालय का वर्चुअल टूर कर सकेगा। इस तरह से हम छात्र को विश्व की बहुत सारी जगह कक्षा कक्षा में ही वर्चुअल रूप में दिखा सकते हैं, जिससे छात्र आसानी से अधिगम कर सकेगा। आशा है यह तकनीकी शिक्षण में नए आयाम स्थापित करेगी।

Interactive Poetic devices

IUPTI

The use of poetic devices is what makes a poem attractive. Students should learn to identify and appreciate them from an early age. This interactive program helps them to learn about the poetic devices like Rhyming words, Alliteration and Visual images. The files present various poems and definitions of poetry with felicity to listen to the poems. This interactive program is originally aimed at the 7rd standard students of Kerala State syllabus. The poem referred and the images used in the program are taken from the English Text Book of standard VII of Kerala State syllabus. It contains html files with interactive nature. The home page of the program is the file named main.html. To start the program, double click the file main.html. When a user opens it, that page leads to Other : pages. From 6th page the user can navigate to various poetic devices like Rhyming words, Alliteration and Visual images and do the activities as per the directions given in each page.

Cryptology (Information Processing)

IUPT3

Cryptology is defined as the science which is concerned with communication in secured form. Practice and study of hiding information. Cryptology is the practice and study of techniques for secure communication in the presence of third parties. More generally cryptology is about constructing and analyzing protocols that prevent third parties or the public from reading private messages. Various aspects in information security such as data confidentiality. In cryptology, we start with the unencrypted data, referred to as plain text. Plain text is encrypted into cipher text, which will in turn be decrypted back into usable plaintext. The encryption and decryption is based upon the type of cryptology. Cryptology intersects the disciplines of mathematics, computer science and engineering. Application of cryptology include electronic commerce, chip-based payment cards, digital currencies, computer passwords and military communications. In today's world, security in information is a fundamental necessity not only for military and political departments but also for private communication. Today's world of communication has increased the importance of financial data exchange, image processing, biometrics and e-commerce transactions which in turn has made data security an important issue.

Learning Science through Stop Motion Animation IUPT7

Stop motion Animation : is a technique to bring static objects to life on screen. This is done by moving the object inch by inch and photographing each frame (movement). When all the frames are played in sequence it shows movement as Animation. While making Animation : videos the students learn the targeted science concepts. The Research: will develop certain interpersonal skills among children like discussion, team work, peer learning, collaboration etc. As the students can have a look at what they have photographed prior to computer processing, this will add interest and will encourage students in each step. This Research: will develop certain 21st century skills like critical thinking, creativity, collaboration and communication.

This is an E-Learning game on the basis of Multiple-Choice Questions. This game has 5 levels and 5 different topics. By playing the game the user will definitely reach the nearby point of snake and ladder. At that time a question will be asked to the user. If he/she attempts to question correctly then the tick will go up with the ladder. And if attempted incorrect then snake will bite and the tick will fall to the snake's tail. In this game the Multiple-choice questions are included on the basis of Maharashtra State Competitive Exam Like Scholarship & NAS (National Achievement Survey) . Student will play this game and prepare for that exam. This game requires Internet connection. The Questions are hosted online, that's why it should be updated regularly. This game is made with HTML5 and JavaScript. Snakes and Ladders Is an ancient Indian board game regarded today as a worldwide. A number of "ladders" and "snakes" are pictured on the board, each connecting two specific board squares. The object of the game is to navigate one's game piece, according to die rolls, from the start to the finish helped or hindered by ladders and snakes, respectively.

**9****Excavation**

IUPTIO

Excavation is the process in which people dig the Earth to find things that were used long ago. Archaeologists study the history of humans and places through excavation and find artefacts that were used. The things that Archaeologists find during excavation are called artefacts. Archaeologists can tell a lot about people who lived there by looking at their houses, clothes, bones and Other : artefacts. Any place where human activity has occurred and artefacts have been found is called an archaeological site. The excavations have shown interesting findings that help us understand the rich cultural heritage of Tamil Nadu.

The jobs of the future will be very different from what we have today. They will require skills which are well above mere academics. The skills of creativity, critical thinking, collaboration and communication. Critical thinking is a skill that needs to be cultivated in students from the very early childhood. It can be done by inculcating in the children the habit of solving simple math word problems. This project aims to help students of class 3rd and 4th to learn how to solve simple arithmetic word problems on their own. I have created an arithmetic chatbot both in English and Hindi which explains the simple operations of addition, subtraction, multiplication and division through every day examples. The bots each have a simple quiz embedded as well to help the students test their knowledge. All this has been embedded in an easy to use and access app. The chat bot has a child friendly appearance. It will interest the child as it will be responding to the child's queries in an intelligent manner. This will help develop the requisite skills as students will learn how to solve simple arithmetic word problems in a highly interactive manner.

Solar System

IUPT12

The content "Solar System" is made with an objective to create awareness and interest about our solar system amongst students of Upper Primary school. It provides basic facts about the Sun and the planets which will allow students to understand the design of our solar system. Information such as temperature, distance, size and components of land mass and atmosphere details are provided in the content to create basic awareness along with creating interest in our future space enthusiasts. Teachers can also take advantage of this content because using only chalk and talk method will not be suitable in teaching this topic. It is not simply an e-content, it's a self-learning material also.

Types of quadrilaterals and their properties are very important and interesting area. Students find very difficult to remember the properties of various shapes. So in this video I animated the properties of the quadrilaterals based on their sides, diagonals and angles. The quadrilaterals properties are explained in this video in a sequence. Their relationships with one another are also well explained by animation. At last all the properties were consolidated. Students can remember the properties by visualizing the animation they seen.

NEW MEDIA/ICT PROGRAMMES

SECONDARY & SENIOR SEC. LEVEL

**PRODUCED BY
GOVERNMENT ORGANISATIONS**

CG-MMTB is an android mobile app, created by SCERT Raipur. The aim of this project is to design the textbook (Mathematics, English, Science, Social Science, Hindi and Sanskrit) into a series of videos that can be used by Teachers, Students and parents. This project is supported by the Government of Chhattisgarh and the National informatics center is the technical collaborator. Here the objectives:

1. Some of the concepts can be understood better through Animation, Videos, and pictures.
2. To build the internal capacity of SCERT, The entire project is designed and prepared in-House.
3. The Contents are available in Hindi (and Subtitled in English), So that not only students from Chhattisgarh but other Hindi Speaking regions will get benefit from it.
4. Currently, Contents are available for grades 9 and 10th for a better understanding of different concepts. So hands-on learning experiences videos are carefully designed by SCERT with NCF pedagogical pillars.
5. Storing Content on the cloud that it could be read/view by user's phone without a functional internet connection.
6. Authentication and authorization checks that could be a 2 step Process using mobile number.
7. Continuous feedback system established between designer and user to make it more robust.

Bonds of Love is a story of a young boy named Mikali who is living in an Armenian refugee camp. Mikali could not seek a job because he had to bore on his back his new born brother who is continuously crying because of hunger. He is knocking on all the doors and finally a China man helps him. He is taking Mikali to his home and his wife fed Mikali's little brother. Mikali explains his pathetic story to his friend. He says to his friend that, "the pain and trauma I have gone through all these days is beyond description." The pathetic condition of the refugee camps and the agony of the children living there is revealed through the story. Story of Mikali and the other short incidents are depicted in such a way that students can learn English language easily. New words are introduced to the children through this animation film. Various language learning activities are introduced in this film. The technique of language learning using ICT method is applied here. The visual nature of this animation film means that its use can be valuable for providing additional cues that add further to the context of the textbook. The animation film is meant for secondary school children.

Today, the importance of ICT in education is not hidden from anyone. Teachers also make learning easy by using ICT in teaching, but even today many of our teachers have not been able to adapt themselves to ICT, they are unable to do anything without training. To solve this problem, we have created a website platform TestAgain.co in which teachers can create e-content without any investment which will create new learning opportunities for students. Now you can start new courses which include Accordion, Arithmetic Quiz, Chart, Collage, Dialog Cards, Essay, Fill in the Blanks, Find the Hotspot, Find the words, Flashcards, Image pairing, Image Slider, Memory Game, Multiple Choice, Personality Quiz, Questionnaire, Quiz (Question Set), True / False Question, Virtual Tour (360), Interactive Video. Now our teachers can also give digital identity to their knowledge without technical knowledge. In today's digital era, studies are not limited only to books, by using new technology in education, we can make it reach people in a very simple way.

It is very important for educators to mould their teaching to prepare students to live, work and excel in a 21st century world . We have to incorporate new ways of teaching to maintain student interest by helping them see how they are learning prepares them for life in the real world and to instil curiosity which is fundamental to lifelong learning. Blog is one place where teachers can use a variety of new technology tools to cater to the needs of our digital learners . It not only helps students to build their technological, information and media fluency but also encourages them to be active learners. All the new tech tools like flash cards ,quizzes ,animations , presentations , videos , worksheets , crossword , online testing tools etc. are embedded in my subject blog. This blog is an initiative to provide 24 X 7 help to students of our school and other schools. I share best practices of students (Like best paper , Mind maps made by students Acronym to learn , best project etc.) with others through blog . Subject expert videos , articles and videos of topics beyond syllabus and career guidance are also shared through blog. Students can put their doubts ,comments and suggestions which are addressed by me . All the teachers should be made aware of the power of blogging and how can they effectively curate content through blogs for their digital learners.

Interactive lesson of double circulation ISST2

This interactive lesson is prepared in the DIKSHA portal through which any student with DIKSH app can access this content. This lesson constitutes 17 slides. The first slide is displayed with the title. The arrow at the right side of the slide takes us to the second slide which contains the video of the double circulation played dramatically by the students and the flow chart explained by the students under my guidance. The third slide contains the interactive explanation to double circulation which enhances learning the process at their own pace. The remaining slides contain the assessment part with the multiple-choice question sets. These question sets help the students to check their learning outcomes. It can be used for individual learning and in the DCR classroom to the whole classroom as a target. It gives playing experience (Like video games) to the children which is the most fascinating thing to the children.

If Interactive: An Interactive Resource to learn and practise different types of Conditional Sentences

Conditions arise in almost all situations in our life. Those conditions may be possible ones. Sometimes they may be improbable or even impossible. So it is necessary for us to know how to express these three types of conditions correctly or it will lead to unnecessary issues in life. This interactive resource titled 'If Interactive : An Interactive Resource to learn and practise different types of Conditional Sentences' tries to transact the structurally correct use of three types of conditional sentences. The program starts with the story of an athlete. Three different situations from an event form his life elaborate the three conditions and from there go deeply into the structure of each type of condition. Ample opportunities are provided to practise each type separately and together with interactive files which are attractive and interesting to children. These materials allow self correction and encourage the user by providing feedback. This interactive program is originally aimed at the 9rd standard students of Kerala State syllabus. The story narrated and the images used in the program are taken from the English Text Book of standard IX of Kerala State syllabus.

**4****hcchoudhary.online**

ISST4

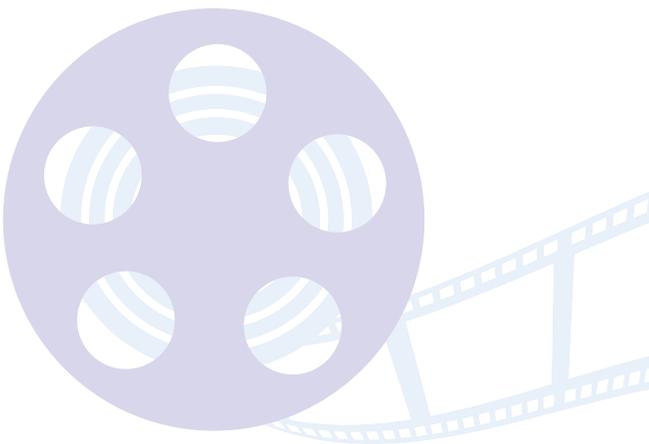

www.hcchoudhary.online is a mobile app making platform that provides free guidance in app making. The main objective of creating this website has been that students and teachers can easily create e-content on educational subjects. You can make a mobile app using the available templates in very easy drag and drop methods. In this, any student or teacher can message our WhatsApp helpline and get it registered for free. After that you can learn mobile app making in our entire guide. If any student wants to create an app by making a PDF of the notes of any subject available with him, it is so easy that he can create and publish his app in less than 1 hour. With this small effort, we are trying to connect the educational scenario to ICT.

Recombinant DNA technology is the joining together of DNA molecules from two different species and inserting it into a host organism to produce new genetic combinations that are of value to science, medicine, agriculture, industry and so on. The deliberate modification of an organism's genetic information by directly changing its nucleic acid genome is called genetic engineering and is accomplished by a collection of methods known as recombinant DNA technology. This ICT program catches the student's attention through an attractive introduction of Glofish, which then continues with the steps of r DNA technology with simple (easy to understand) and real video clips. Thus it enables the students with a clear observation and better understanding. And it opens into an amazing world of genetic engineering and its applications.

Snell's window

ISST6

An interesting effect occurs when light goes from a denser medium (high index of refraction) medium travels towards a rarer (low index of refraction) medium. In this case if the angle of incidence is greater than the so-called critical angle, light rays get reflected. This effect is called total internal reflection. While studying the applications of total internal reflection following questions arise in the minds of the students. This video gives answers for all questions. After watching this video, my students understood the concepts of total internal reflection and The animations are done using Impress presentation, GIMP, PPT, etc. Very few animations are done in flash. The audio editing is done by using audacity and the video editing is done by using open shot video Editor ∴. The output format is in mp4. The pictures and illustrations used in this video are created by myself using GIMP. Some photos are taken with the help of my mobile camera. Also, I added captions to all frames. It will help the hearing-impaired students to learn better. If you hear the audio alone without seeing visually, you can understand the concept well. So, even children with visually challenged can hear the audio part of this video.

The Fibonacci sequence is a sequence of numbers where a number other than first two terms, is found by adding up the two numbers before it. The sequence goes 0,1, 1, 2, 3, 5, 8, 13, 21, 34, and so forth. Written as a rule, the expression is $F_n = F_{n-1} + F_{n-2}$ with $F_0 = 0, F_1 = F_2 = 1$. Named after Fibonacci, also known as Leonardo of Pisa or Leonardo Pisano, Fibonacci numbers were first introduced in his Liber abaci in 1202. Fibonacci sequence in nature is an example of the family tree of honey bees. On many plants, the number of petals is a Fibonacci number.

Fun With Electronic Configuration

ISST14

All matters in this world are made up of atoms. The atomic structure of each element differs from each other, most of the children's found difficult in remembering electronic configuration of elements. Every atom has different types of shells and orbits. Students find it difficult in distributing electrons in respective shells and orbits. If they visualize the filling pattern of electrons, there is no need for the students to memorize the electronic configuration of 118 elements. The rule behind filling of electrons in shell is given by Bohr and Bury. This media emphasizes the rule and clearly explains the allotment of electrons in each shell. Children will able to design and prepare the self- learning toy on electronic configuration and practice with fun. The content delivery is designed in interactive format and good picture. Sure it will attract the learners and enrich their learning.

Hacking Python - Fully interactive & student friendly Python Website ISST16

In order to facilitate anytime, anywhere learning for the students of XI and XII grade who have opted for Computer Science as a subject for their class XII CBSE examination, this website have been created, 'Hacking Python'.The website is free, robust, mobile friendly and contains accurate content that is easily and freely available. The website is fully interactive with a built in Editor : where students can enter Python code and check their outputs. The resources are organized in easy to access drop down menus with chapter wise notes, assignments, programs and online quizzes on all the topics covered in the syllabus. The USP of the website is that it contains sections to facilitate slow learners . A section Learn with Fun provides students with game based learning experience. I have also embedded a chatbot, My Python Buddy, that helps one to one interaction of the student/ website visitor with me. There is a section " ExamTime" which has mock papers and answers, and short notes which helps students to prepare ahead of exams.

Although cyber threats and security topics are part of the curriculum but often students do not take this topic seriously. They sit on the internet for hours not only for playing games and social networking but also for the Research : on the various topics of their subjects. They are hardly bothered about simple things like keeping a strong password, not sharing their personal information online with unknowns and many others. Sometimes they are caught in this and find it difficult to escape. Even younger children play games on the internet and are easily lured by the free gift coupons popping on the internet. They also become victims of cyber-crimes like cyber bullying etc. A need is also felt to sensitize parents and community towards this sensitive issue. People merely use computers as scapegoats to avoid responsibility. This is why it is of utmost significance to educate people about the power and potential abuses of computer technology. It is only in doing so that society will acquire a firm grasp of computer ethics and handle moral dilemmas regarding computing in an ethical and proper manner. To apprise everyone from age 8 to 80 years of basic cyber threats and how to safeguard themselves I developed an Android gaming app: SMART NETIZENS. To increase the reach the game has been designed in seven Indian regional languages Gujrati, Kannada, Malayalam, Marathi, Bengali, Telugu, Tamil besides English and Hindi. The game is easy to play and helps people understand how they can remain safe online and how they can keep their devices safe.

e-Kaksha–Inclusive Classroom with Equal Access to All ISST18

The motive of this project is to empower students with accessible technology that enables personalized learning. This Notebook e-Kaksha is created using OneNote App which comes as a part of Hotmail free Apps. In this notebook we can create different sections and sub sections, where users can post/embed content in order to organise, share and collaborate. The e-Book is created initially for English and in process for other subjects of class XI. The shared link can be given to students to view the content and edit link can be shared with other teachers / Subject experts. This App has features to help students with special needs and make every child enable to learn without any barrier. With the help of Immersive Reader, students can listen to the lesson, identify the syllables and enhance the Pronunciation, Reading and Listening Skills. Students can record their voice and listen again to improve upon. Translation feature can translate into other languages which helps to understand the lesson better. This e-book enables students to learn at their own pace 24x7 and related videos (NCERT) can be embedded. For mathematics, practice tests can be generated automatically as per the given question. OneNote can work in Online and Offline mode. Working on Online Mode is free for all.(using Hotmail Id)

**20****Functional Group**

ISST22

Science is knowledge about the material, natural world. It is the knowledge produced from systematic observation, measurement, experimentation, and exploration about natural objects, their properties, and their interactions. But it is hard for the secondary students to observe or interact with things like the molecular and chemical structure of compounds. They sometimes found it is difficult to visualize such structures. If the students got promoted to higher classes with such a confusion of visualizing molecular structure, their learning will be stuck at some point in time in their learning journey. To overcome this challenge The E-Content "Functional Groups" is developed with an objective to attract the attention and interest of the students of secondary school. In addition to that, the understanding of the compounds and the concept of their formation will be cleared by this content. This content is created based on chapter-4 "Carbon and its compound" of Class-X. Teachers can also take advantage of this content because using only chalk and talk methods will not be suitable in teaching science. . ICT in education is a very effective way of

Beat Plastic Pollution

IC1

If someone asks you what plastic is you will reply that it is a non-organic material and something that does not easily get decomposed , I will also say that but I will also add the point that plastic is a threat . This threat is the main topic of our video. Plastic can sometimes be very useful and most of the time can be very harmful. In this video we would be discussing the harmful things of plastic.

The use of plastic in daily life is increasing day by day. This is harmful for our environment and animals. If we continue to encourage the use of such plastics, then in the coming time, serious problems will have to be faced. Now the time has come for us to change our habits and try to get away from plastic in daily life. We can start this by reducing the use of plastic in our daily habits. Stop using single use plastic. Make limited use of plastic bottles, Tiffin, cups and plates and close them slowly. Whenever going to the market or traveling, keep a water bottle and empty cloth bag with you. One step taken by us will inspire others and the day is not far when we will be able to realize the dream of a plastic-free India.

Bhashasangam

IC3

To celebrate the spirit of national unity, the program "One India Best India" has been launched. Language confluence marks the unique symphony of our country's languages and is an expression of our shared dreams, hopes and aspirations for India. The prosperity of India is marked by its cultural, ethnic and linguistic diversity. To celebrate these unique features of our country, NCERT Delhi is launching a program for schools and educational institutes under the Bharat Sangam Initiative under the title India, to give students multilingual exposure to the Indian languages listed in Schedule I of the Constitution of India. This initiative is the beginning of a journey aimed at generating interest and eagerness to learn more in these languages. This will be followed by other activities. The program was worked with a consciousness by the children of Sri Dharampur Primary School and through which the objectives of language confluence in the children and in the society as a whole. To introduce school students in all 22 Indian languages in Schedule VIII of the Constitution of India. An outstanding effort was made to increase linguistic tolerance and respect and to promote national unity.

Beat Plastic Pollution

IC11

Plastic pollution is the accumulation of plastic objects and particles (e.g. plastic bottles, bags and microbeads) in the Earth's environment that adversely affects wildlife, wildlife habitat, and humans. The distribution of plastic debris is highly variable as a result of certain factors such as wind and ocean currents, coastline geography, urban areas, and trade routes. Human population in certain areas also plays a large role in this. Plastics are more likely to be found in enclosed regions. It serves as a means of distribution of organisms to remote coasts that are not their native environments. This could potentially increase the variability and dispersal of organisms in specific areas that are less biologically diverse. Plastics can also be used as vectors for chemical contaminants such as persistent organic pollutants and heavy metals

Beat Plastic Pollution

IC15

One of the major threats to the environment is plastic is a lay man's term is a synthetic material which can be easily molded in any form and is non-biodegraded. The incessant manufacturing of plastic and its indiscriminate use has made it omnipresent. Today plastic is found in every-thing from a small toy to a big transport vehicle. The indiscriminate use of plastic has resulted in the dumping of tons of plastic waste into our landfills and oceans. According to a study in 2018, 380 million tons of plastic produced the world over, out of which only 9% get recycled and 12% the word over get incinerated. The rest goes to our given below-Don't buy water bottles, shun polythene bags, ditch plastic cups, use recyclable bags, leave no litter, wear recycled, go plugging, make bulk purchases, community cleanup, aware people. There plastic pollution is a major problem that the world faces today. Which could lead to disastrous consequences and a depletion of our natural resources, gradually leading to the demise of all living forms the responsibility of cleansing our environment rests on us and are need to act quickly and sternly towards cleaning our community, streets, roads, water bodies etc. from plastic waste.

This video is related to the effect of recklessly use of plastic in our daily life. In this video a boy saw a dream that on the earth people use plastic on a large scale. After using plastic they threw it on roads. That plastic may be eaten by the innocent animals and they can die by eating it without any fault of them. After seeing all this activity God became angry and changed a heap of plastic garbage into a monster. Then the monster started teasing people. Everyone got frightened and started crying. People started praying to God for mercy. Suddenly the boy woke up and realised that he was seeing a dream. This dream changed the direction of his life. From that day onwards , he started to make people aware that plastic is very harmful for our environment.

Kuldeep Singh

We created a video that can hopefully change the people to stop dumping plastics. We shot this video in thiruvananthapuram. We decided to take a walk in the city to find whether our city was clean. Unfortunately, we did not find our city clean. We took photos of waste. We also have more photos relating the same thing. It took us a few days to shoot the videos and edit it. The photo was taken from a place called kaitha mukku, thiruvananthapuram.

Beat Plastic Pollution

IC19

“Beat Plastic Pollution” was the theme of 2018 World Environment Day and our country played the host on June 5. It is important that we, as the responsible citizens of our country realize the need of the hour. And the present calling is that we completely ban the use of plastic which acts as a really toxic substance for our environment. But it is not possible unless we all come together and work in unison. We should therefore try to invite more and more people to come forward in this initiative and do every bit in preserving our environment. In fact, you can write a speech on beat plastic pollution, spread awareness amongst the people and move people with the power of words.

Beat Plastic Pollution (HTML Description) IC24

In this project headed as “Beat Plastic Pollution” expresses how we as a team feel about the plastic pollution that is currently a very serious problem in this world. This web page constitutes of the current scenario of plastic pollution and explains the effect of it on different stakeholders. At last it tells about the solutions of the problems caused by plastic pollution. We as a group think that this is a very serious problem that should get cured as it can take away the life of this beautiful nature and the living organisms. As this project can be a very helpful page for the people to be aware about the problem and its causes with the solutions that we can apply in our daily life to make life healthier and safer.

Stop plastic pollution

IC26

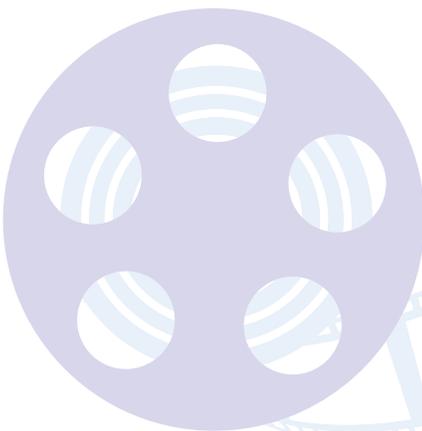

“Enough is enough, no more ocean full of plastic”with this beautiful quotation I would like to say about my website, why I make this website? I am making this website because I want to make people aware about this dangerous topic. Today we are living in a technological era as well as we can say plastic era because in today's life, we are using plastics things from dawn to dusk. In ancient time or previous time, we were using leaves disposable plates which were not harmful and have no side-effects. If I am talking about it's harmful effects than I'll say when we use any plastic's materials to pack anything that will lose toxic chemicals which are harmful for our health it can cause heart problems, sometimes animals can eat plastic and it to animals digestive system which can cause death. So, we want to use our old and gold steel utensils because they don't have any side-effects.

**25****Quizzery**
IC30

Quizzery is a quizzing app which acts as a testimonial of one's quizzing skills and knowledge. This app is based on the topic "Beat Plastic Pollution" and contains questions ranging from Technology to Our Environment, enriched with knowledge about the formation, contents, and consequences of using plastic. Our app contains statistical information extracted from numerous surveys conducted by various organisations. Also to increase the difficulty level of the quiz, the questions come with 4 different options. All the information gathered by us is divided into broad categories which guides the user to the correct information. This database is also updated periodically to keep the user up to date regarding the topics mentioned above. Our quizzes have no time limit that enables the user to answer as per his own comfort. Our app tries to provide the user a clean interface with simple transitions to remove visual clutter. The app also allows the users to send their own ideas to beat plastic pollution from within the app and help make the world a better place. All this information acquired will make people realise the worsening effects of using plastic and encourage them to conserve Mother Nature.

This project highlights the harmful effects of plastic pollution. In today's world, the major concern is about the harm caused by plastic to the environment and how using plastic poses a risk on everybody's health. We analyze different ways to reduce it by converting this waste into useful things like for making clothes etc. Our project showcases the innovative ways of reducing plastics and suggests the alternative for the same. This primary objective behind making it is to create awareness among the population about harmful effects of plastic pollution and to mobilize people to help in reducing its use, as well as to look for better options to switch to rather than using plastic.

Beat Plastic Pollution

IC35

This project aims to deal with the drastic effect of plastic pollution on the abysmal earth. Plastic, a very common assassin of our mother earth is widely used even though people are aware of its consequences. To convey a message one needs to develop interest straight into the heart of the public. For that purpose we have invested our creativity in the field of animation. In this video there will be two guys – Paheli and Bhujjo. Paheli being curious wants to know about the plastic pollution and Bhujjo being a kind guy and has tapani accent helps her to know more about it. They discuss how humans can drastically destroy what they are blessed with but there are certain humans who adore their receiving.

Plastic pollution is the accumulation of synthetic plastic products in the environment to the point where they start creating problems. Plastic is used on a large scale nowadays due to its lightweight, versatility etc. People use plastic excessively and it has hazardous effects on the living organisms. It is not possible to remove plastic from our lives in one day but, with combined effort and wise steps, the battle against plastic pollution can be won. Some easy day-to-day steps can help us beat plastic. Such as, using banana leaves for serving plates, paper bags etc. Plastic pollution is a vast problem and one should think about it.

Beat Plastic Pollution

IC37

While plastic has many valuable uses , we are addicted to single use or disposable plastic. Half of all plastic produced is designed to be used only once. We need to slow the flow of plastic as it source. Rivers carry plastics waste from deep islands to the sea, making them major contributors to ocean pollution.

To Beat Plastic Pollution

IC47

The World is drowning in plastic pollution and the environmentalists around the globe are calling on people everywhere to take concrete steps to beat plastic pollution in their own lives. There are so many campaigns across the world to protect our Earth from the hazardous effect of plastic waste. Today, we produce about 300 million tonnes of plastic waste every year. That's nearly equivalent to the weight of the entire human population. Plastic wastes have affected the world in such a way that it cannot be revoked. It is one of the biggest reasons behind the decline in maritime wildlife and increase in land waste and waste in waterways. One of the reasons for the increase of plastic waste is that it has positive sides like it is versatile, light weight, flexible, strong, durable, cheap and waterproof. It has become easily accepted in society and became an inevitable part of the daily life of people. People cannot curb the use of plastic but we can limit it so that we can reduce it drastically. There are various types of plastics like poly ethylene terephthalate, high density polyethylene, poly vinyl chloride, poly propylene etc. Different researches are being carried out to study the harmful effects of these plastics. India, right now, is battling plastic pollution with all its might. It will take time to become eco- friendly as there are people of different mindset out there. But individually we can do our bit. These are the ways we can beat plastic pollution: re place plastic with jute or cloth bags, reusable water bottles, biodegradable straws, Policies to save environment, avoid using micro beads, cut down of period waste, avoid contamination of water bodies and blogging. Our government has initiated a ban on plastic bags and this is a good start. But this only will not be sufficient to destroy the evil of plastic pollution; we need to do more to be plastic free.
