ABOUT THE FESTIVAL

All India Children's Educational Audio Video Festival (AICEAVF) is one of the major children educational programme festivals of India, organised by Central Institute of Educational Technology (CIET), NCERT, Delhi. This event is being organized to promote creative expression amongst educational media professionals, teacher educators, teachers, trainee teachers and students. Originally it was started by CIET and SIETs and it has blossomed as India's major educational programme festival. The first Children Educational Audio Video festival was organized during 1988 by DECU-ISRO & SIET, Ahmedabad. As the best Audio, Video, New Media and ICT products are showcased, discussed, recognized, appreciated and awarded, such events contribute in longer run towards quality learning of the children. Over the years, the categories have been expanding as the role of digital media and web are playing ever more important role in practice. This festival showcases the best Audio, Video, New Media and ICT programmes produced in last one year for school education/teacher education. This year we have also introduced a category for Children to promote creative expression among children for making Audio, Video and New Media programmes. The theme for childrens category is 'Beat Plastic Pollution'.

This event has been evolved by the team of creative professionals who are involved in the competitions for several national events. The goal of the event is to provide an independent competition on national level that would be representative, fair, respected and open to everyone. This will foster and support the efforts of creative professional who are the contributors of their unique talents and will be acknowledged through a special recognition. These extension activities are organized to motivate students, teachers and other stakeholders to create and share educational media products. Such contests, exhibitions and festivals provide a forum for exchange of views on the quality of the educational media programmes and other professional issues.

As digital technologies are constantly evolving having far reaching ramifications on our day-to- day lives, event like this can motivate education practitioners to develop affinity with the technology itself and later integrating them in our school life. Teachers are responsible for the planning, concept, direction, design and production of digital communication in every school. So this will inspire and motivate students to own the ICT with its all potential. Through this the students can evolve and engage in the creative convergence of digital arts, technology and information.

This event offers an opportunity to different stakeholders to come at a common platform and share and learn from each other's experiences for school education in general. The rewards of this event will be the participation in the program itself than winning awards under different categories. This event will offer a chance to participants to gain substantial experience, showcase skills, analyze and evaluate outcomes and uncover personal aptitude. Along with this the students will be encouraged to adopt innovative techniques and develop their ideas and skills. This can give our students across the nation a challenge to themselves, so that they can fine tune their skills and broaden knowledge, taking learning out of the classroom and into the real world. This event can also prove to be a great source of self-evaluation for students and help nurture their experience and skills further.

CATEGORIES OF AWARDS

Best Programmes:

The best Audio, Video and ICT/New Media for different category, viz., in each of the following stages will be awarded a cash prize (For Audio Programme: Rs. 20000/- and for Video and New Media: Rs. 40000/-) along with a certificate and trophy under various categories.
