## Video Lecture on Green Jobs

Video lecture by Taruna Mongia, India on Green Jobs

## Views through Padlet on Green jobs

**Taruna Mongia's Class - Green Jobs**  
Share your views regarding "Green Jobs". If you know someone who are doing a green job then share his/her success story. You can post photograph of that person too. Give your views "Why we need Green jobs in India?"

- Shailja kaushik**  
Indraprastha International School, new Delhi  
With the growing pollution in India, green jobs are the need of the hour
- Taruna**  
View this presentation. This can be used as a teaching tool to present a lesson in class to know more about "Green jobs"
- Kokila, Sri Lanka**  
In Sri Lanka we are also emphasising on Green jobs. I have used this PPT this has not only the information regarding Green jobs but various tools to use social media are also explained well. Well Done Taruna
- Harriet, Taiwan**  
Good job dear. This is what I am looking for my students. Kindly make ter page too on "Carbon Footprint"
- Rea, Canada**  
Hi Taruna Its very interesting and informative PPT.

**What do you want to be in future????**

Create to Inspire**

# Learning During Global Project

#	Exercise	Environmental Learnings
1	<b>Valuing Biodiversity</b>	Understanding the value of the natural ecosystems and bio-diversity. Linkages between the daily choices people make and the impact of those choices on the bio-diversity.
2	<b>Mimicking Nature</b>	Understanding nature's design which does not produce any waste. Concepts of Bio-Mimicry and Industrial Symbiosis.
3	<b>Turn Off, Save On</b>	Conducting simplified energy audits at homes and schools. Understanding energy losses when devices are in standby mode; Relevance of buying products with high BEE star rating.
4	<b>Demystifying Carbon Footprint</b>	Quantifying the impacts of daily lifestyles on environment using carbon calculators. Understanding what changes in our lifestyles can help reduce our environmental impacts.
5	<b>Design for Environment</b>	Developing environmental design thinking amongst students. Equip students to self-differentiate between products with low and high environmental impacts.
6	<b>Think Before Buying!</b>	Understand and evaluating - Needs vs. Wants; Identify environmental implications from impulsive buying and hoarding; Promoting giving, reuse and sharing of resources; Concept of environmental backpack.
7	<b>The Journey of Waste</b>	Understanding of the lifecycle of various wastes we produce.

8	<b>Unpacking the Packaging Waste</b>	Understanding the issues related to packaging; Analyzing obsession of people with packaging of new products. Creating solutions to eliminate packaging and inspiring people to return packaging which is not needed. Understanding of waste generation from electrical and electronic goods at the end of their life.
9	<b>E-wareness</b>	Collection of e-waste and its responsible recycling by an authorized recycler. Understanding environmental impacts from our daily transportation habits.
10	<b>Be 'Fuel'ish or be Smart</b>	Enabling actions to optimize travelling and encourage ride sharing.
11	<b>Green Job in Every Job</b>	Exploring careers in the field of environment; Identifying how can students make an environmental contribution in any job role they take in the future.
12	<b>Be a Petitioner- For a Cause!</b>	Understanding how to create a societal movement and action on environmental issues that matter to a student.
13	<b>Water: Everywhere to Where Where!!!</b>	Understanding the threat on availability of clean water. Conducting simplified water audits at homes and schools.
14	<b>Organic Food – Good for You! Good for Earth!</b>	Introduction to the environmental impacts of fertilisers and pesticides; Benefits of going organic and sourcing locally grown food items.

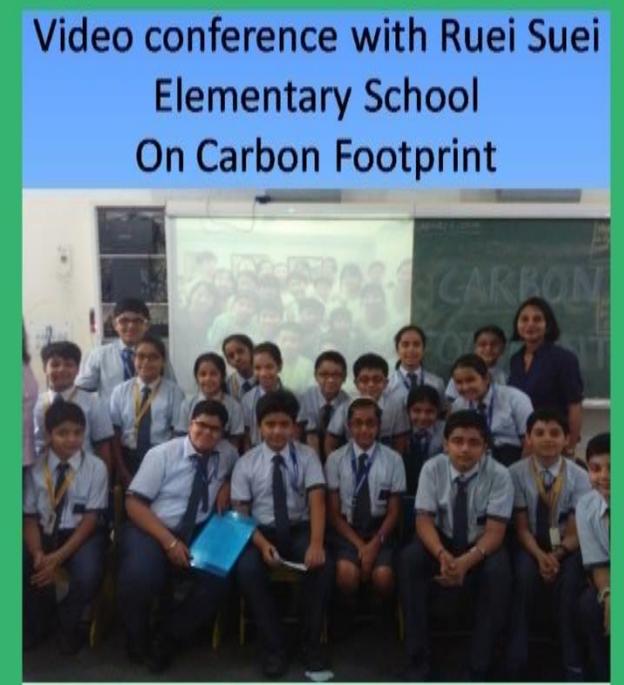

**We are working on the Project Valuing Biodiversity with Boralanda Dharmapala School, Sri Lanka under British Council**

A partnership between Boralanda Dharmapala Vidyalaya and Indraprastha International School

**BRITISH COUNCIL**

Mission statement  
*This project will provide opportunity for the students to understand the value of bio diversity for our day today life and survival. This project aims to share findings, compare and contrast differences & similarities on bio diversity of both countries. We wish to provide students with skills of collaboration and critical thinking. By doing this project students will identify and practice behavior changes to protect bio diversity.*

**21<sup>st</sup> CENTURY SKILLS**

The students of Rueil Sui Elementary School in Taichung City Taiwan, tried to make the fruit leftover into fertilizer. We will use the fertilizer on our vegetables. We plant and eat our own vegetables to reduce carbon footprint.

Harriet Liao
