Kahoot is a fun and interactive game based online learning platform

It helps us to run game like multiple choice answer quizzes.

It is a synchronous type of interaction where the questions are displayed on teacher's screen and students have to reply using their devices

The students can make use of devices such as computers, laptops, tablets or smartphones to respond to the quiz.

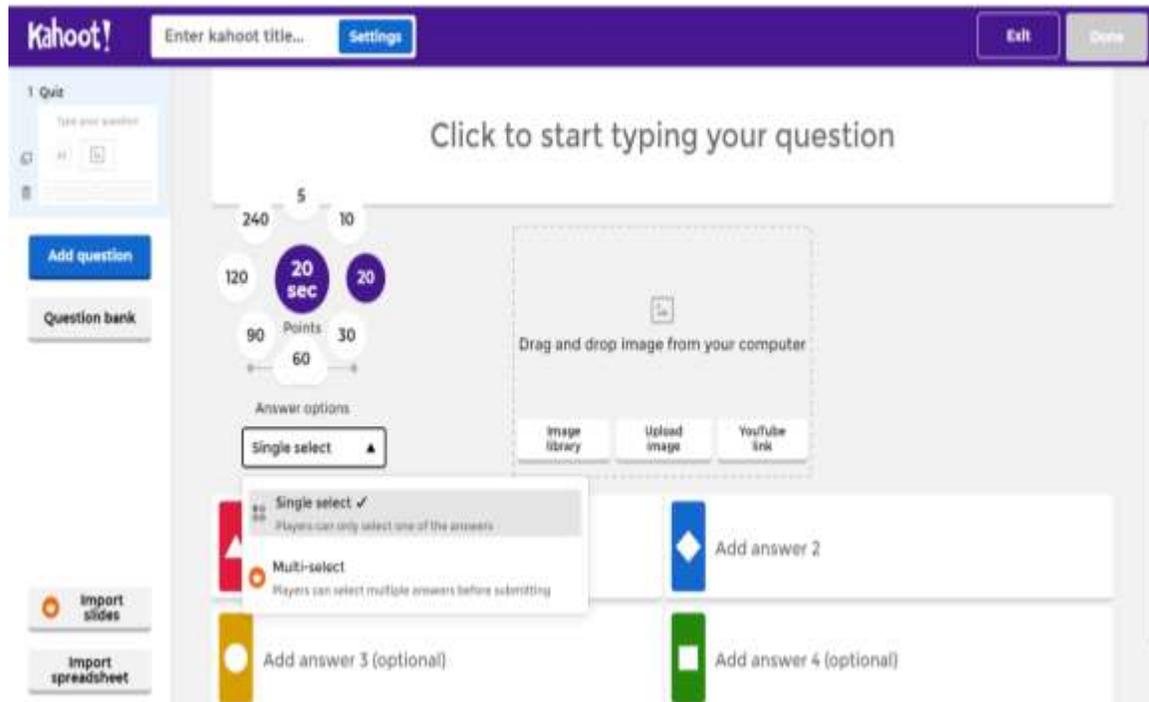

Advantages

- **To perform a formative assessment of the whole class at one time.**
- **We can use other member's resources also to conduct quiz.**
- **Immediate feedback and results can be shown.**
- **Requires minimum technical expertise for creating quiz and surveys as well as conducting quiz.**
