WHAT IS ONENOTE?

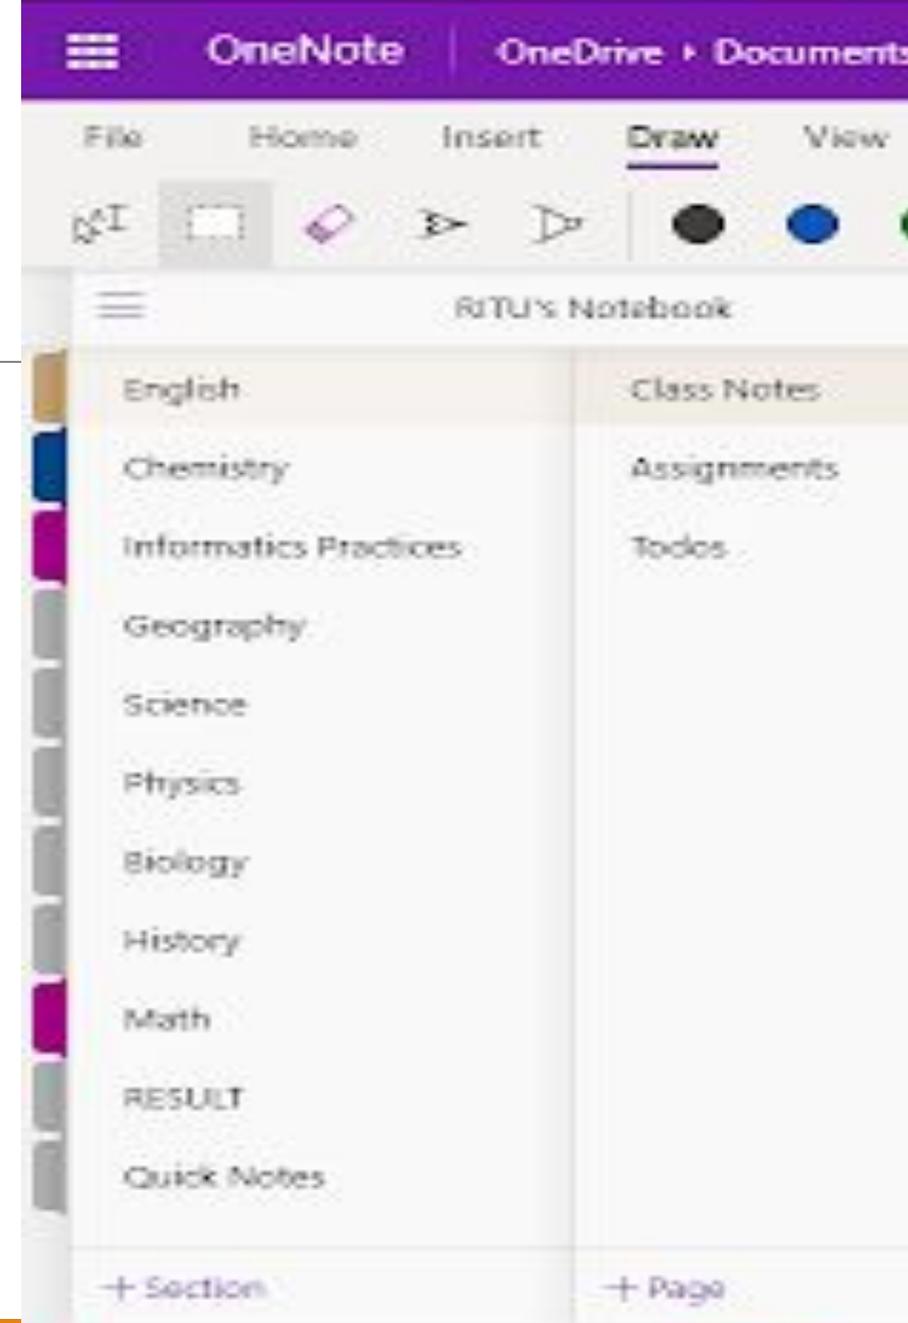

Microsoft OneNote is a personal information management app designed to help you take notes of all kinds into one digital notebook. You can organize your notes in any way you want, share them with others, and sync the content across devices, so they're always at your fingertips. But the best thing about OneNote is that it's packed full of features.

IT IS AN INTEGRATED NOTEBOOK...

Integration occurs when different things are brought together.

OneNote is the best example of the integration where we can combine resources of all the subjects in one single domain.
